Referral Guide

The Doctor-to-Doctor Line (FOR PHYSICIANS)
Collaborate with knowledgeable R.N. facilitators to find the right service at the right time for your patients’ clinical needs, including:
- Outpatient appointments
- Telephone consults
- Expedited inpatient transfers
Monday-Friday, 8:30 a.m.-5:00 p.m. On-call physicians available after hours.

Find-a-Doctor (FOR PATIENTS)
617.667.5356 OR TOLL FREE 800.667.5356
Telephone service representatives can help your patients find the right physicians and facilitate routine appointments, Monday-Friday, 8:30 a.m.-5:00 p.m.

Find-a-Doctor Online (FOR PHYSICIANS AND PATIENTS)
bidmc.org/findadoc
Visit Find-a-Doctor online for up-to-date physician listings.

Inter-Hospital Transfers
To transfer a patient to BIDMC from another facility, call:
Cardiology transfers 617.CAR.DIAC (617.227.3422)
ED to ED transfers 617.754.2494
All other transfers 877.MD.BIDMC (877.632.4362)
617.667.2020

WE APPRECIATE YOUR FEEDBACK. Please email RefGuide@bidmc.harvard.edu with your comments regarding this guide and your suggestions for future editions.
Referral Guide

history & tradition

[1] A New England Deaconess Hospital nurse tends to a patient in one of the hospital’s private rooms in the 1940s. [2] Palmer Laboratory, circa, 1927. Headed by pathologist Shields Warren, the Palmer Laboratory was located between two major operating rooms. Palmer staff members were able to complete frozen section diagnoses on tumors in four to five minutes. [3] Russell Cowing, radiological physicist, with a 2,000,000-volt X-ray machine in 1956 – one of the most advanced machines of its time. [4] Deaconess Hospital operating room, 1907. The hospital’s new surgical facility was an improvement over the single surgical bed and gas lamps of the original site.

technology & innovation

[1] A nurse cares for a patient on BIDMC’s general medical/surgical unit. BIDMC has a long tradition of exceptional nursing care that dates back to the beginnings of Beth Israel Hospital and Deaconess Hospital. [2] Pathologists at BIDMC joined with colleagues in several clinical departments to establish multidisciplinary clinics designed to optimize patient care. In 2008, the divisions of anatomic pathology and clinical pathology at BIDMC conducted 6.7 million tests. [3] BIDMC’s Interventional Neuroradiology Suite with the new 3-D bi-plane imaging unit from Siemens. [4] The CardioVascular Institute’s hybrid catheterization/surgery/electrophysiology operating room combines highly advanced equipment; skilled surgeons, cardiologists and anesthesiologists; and specialized nursing and technologist staff to perform complex cases that involve two or more major cardiac services.

The department of anesthesia, critical care and pain medicine offers anesthetic care for patients undergoing surgical and other procedures. Board-certified/board-eligible anesthesiologists provide preoperative assessment, anesthesia care during procedures and medical management in the postoperative care unit. Anesthesiologists also care for patients requiring postoperative or respiratory intensive care, postoperative acute pain management, and comprehensive evaluation and therapy for all types of acute and chronic pain.

### CRITICAL CARE

The division of critical care is a major part of the multidisciplinary critical care service, which specializes in the support and management of seriously ill patients.

### PAIN MANAGEMENT

Phone 617-278-8000 Fax: 617-278-8065 24-Hour Inpatient Chronic Pain Consult: Call 617-632-2337 and page 3-OUCH (3-6824). Inpatient Postoperative Pain Consult: Call 617-632-2337 and page 3-PAIN (3-7246). Night/Weekend Emergency: Call 617-667-4700 and ask to speak to the pain doctor on call for the chronic pain service. The Arnold Pain Management Center offers comprehensive care to patients with complex acute or chronic pain. We specialize in diagnosing and treating patients who have not responded to conventional therapies. Our success reflects the experience and excellence of our multidisciplinary team that includes anesthesiologists, neurologists, psychologists, nurses, and physical therapists. We treat back or neck pain, whiplash injury, myofascial pain syndrome, cancer pain, headache, fibromyalgia, nerve pain including neuropathy, phantom limb pain, reflex sympathetic dystrophy, post-herpetic neuralgia, post-surgical pain, and any other complex pain syndrome. We do not treat patients with opioid addiction requiring an addiction specialist, or patients in need of a short- or long-term detoxification program. Our team will provide the patient with a comprehensive evaluation and offer a treatment plan tailored to each unique situation. Treatment modalities include medications, infusion therapies, injection therapies such as nerve blocks, lumbar, thoracic and cervical epidural steroid injections, sympathetic blocks, selective nerve root blocks, implantable spinal cord stimulators and intrathecal drug delivery systems, psychological counseling, hypnosis and biofeedback, and physical therapy. You may refer your patient to the Arnold Pain Management Center by sending a referral email to painref@caregroup.harvard.edu. Our goal is to see your patient within one to two weeks for an initial evaluation and development of an individualized treatment plan. In order to facilitate the first visit, please forward pertinent medical information including test results, prior therapies and current medications, the patient's date of birth, home and work telephone numbers, address and insurance information. The Arnold Pain Management Center accepts all major health insurance plans. It is our pleasure to assist patients in obtaining the necessary insurance authorization. Please be aware that delays in appointment scheduling may result due to complicated insurance requirements.

### PERIOPERATIVE ANESTHESIA

The section of perioperative anesthesia is responsible for the assessment of, consultation with, and preparation of patients for anesthesia. Anesthesia is provided to patients during surgical, obstetric, therapeutic and diagnostic procedures.

The CardioVascular Institute (CVI) integrates, coordinates and manages all cardiology, cardiac surgery and vascular surgery hospital and physician services at BIDMC and manages a regional network of referring cardiologists and cardiac and vascular surgeons. The services at BIDMC include: the cardiac, vascular and endovascular operating rooms (ORs) and post-operative recovery areas; three inpatient nursing floors; two intensive care units; cardiac testing and ancillary services such as the cardiac catheterization laboratory, the electrophysiology laboratory, EKG testing, stress testing, echocardiography and MR; ambulatory physician office visits; and the vascular laboratory. The hospital services encompass 100 patient beds, 2,500 OR cases and 5,500 discharges (which account for about 20 percent of all BIDMC inpatient medical/surgical services), 4,000 cardiac catheterization procedures and over 25,000 ambulatory office visits. There are about 475 nurses, technicians and staff at the CVI who are employees of BIDMC. The 40 cardiologist and 10 cardiac and vascular surgeons are employees of the full-time faculty practice plan, Harvard Medical Faculty Physicians (HMFP) at BIDMC, in a separate division called CVI Professional Practice (CVIPP) under the direction of the CEO of the CVI. They have teaching appointments at Harvard Medical School. The physician services include $14 million in professional revenues, making it the sixth largest division within HMFP. Hospital/academic appointments for cardiology are through the department of medicine and those for cardiac and vascular surgery are through the department of surgery.

### CARDIOLOGY

### GENERAL CARDIOLOGY

Beth Israel Deaconess Medical Center offers a full range of preventive, diagnostic and non-invasive cardiac services, as well as a number of programs designed to manage the cardiac diseases of specific patient populations.

### GENERAL CARDIOLOGY PROGRAMS

#### Advanced Heart Failure Clinic

**Patient Scheduling:**

617-667-8800

The Advanced Heart Failure Clinic offers a multidisciplinary approach to ambulatory heart failure management and optimization of medication regimens. Patients receive one-on-one education from a nurse practitioner regarding heart failure, nutrition, exercise and lifestyle adjustments at initial and follow-up visits. Intensive management of symptoms and titration of medications are provided by phone between visits as needed. The team works closely with referring physicians, specialists and home healthcare agencies to decrease chronic incidence of hospitalization. Patients also have access to active congestive heart failure (CHF) clinical standard therapy. In addition, the clinic offers formal on-site assessment for cardiac transplantation through a collaborative program with New England Medical Center. The clinic offers access to the newest diagnostic and therapeutic modalities available for evaluation and treatment of heart failure patients, including cardiac MRI, novel drugs and devices, and an outpatient Nesiritide infusion clinic.

**Patients Appropriate for Referral:**

- Patients with moderate to severe heart failure and newly diagnosed CHF patients

#### Cardiology Second Opinion Program

**Patient Scheduling:**

617-667-8800

The Cardiology Second Opinion Program ensures that all new cardiology patients are seen within 48 business hours of a referral, and all necessary evaluation and testing is performed judiciously. Cardiologists offer a second opinion and discuss the wide variety of treatment options available for individual diagnoses. This team works closely with patients and their primary care physicians to develop the most appropriate treatment plans. Patients Appropriate for Referral: Patients with known or suspected cardiac disease.

**Patients Appropriate for Referral:**

- Patients with known or suspected cardiac disease

#### Cardiovascular Care for Women

**Patient Scheduling:**

617-667-8800

The Women’s Cardiovascular Clinic specializes in the unique cardiac health needs of women and is staffed by clinicians who are able to provide comprehensive cardiovascular care. This program offers; evaluation and management of cardiovascular risk factors; treatment for coronary artery disease, cardiomyopathies, valvular heart disease, and arrhythmias in women; pre-pregnancy cardiac risk evaluation; and care for the pregnant woman with established cardiac disease. Patients Appropriate for Referral: Women who have heart disease • Women who have heart disease who wish to undergo a risk assessment before becoming pregnant • Pregnant women who have cardiothropy. Women who have risk factors for cardiovascular disease and are concerned about their future cardiac risk.

**Patients Appropriate for Referral:**

- Women with heart disease
- Women with heart disease who wish to undergo a risk assessment before becoming pregnant
- Pregnant women with cardiovascular disease
- Women with risk factors for cardiovascular disease and who are concerned about their future cardiac risk
**Cardiovascular Health and Lipid Center**

**Patient Scheduling:**
617-632-0586

Established in 1989, the Cardiovascular Health and Lipid Center is a multidisciplinary outpatient prevention program. The center’s services include: assessing overall cardiovascular risk based on individual patient assessment; tailoring treatment to lower risk through a combination of lifestyle changes, including diet and exercise; and prescribing and monitoring medications when appropriate. Patients are evaluated by a team of physicians who specialize in preventive cardiology, a cardiovascular nurse and a registered nutritionist. In addition to identifying traditional risk factors, team members also assess additional risk factors and perform non-invasive testing to determine the presence of occult coronary heart disease when necessary. Treatments focus on reducing the risk of developing cardiovascular disease, lowering the risk of future cardiovascular events for patients with established coronary heart disease, and diagnosing and managing complex lipid disorders. Staff at the center also evaluate, treat and monitor patients with severe hypertension who are provided with ambulatory blood pressure monitoring devices.

**Patients Appropriate for Referral:**
- Patients with established coronary disease or patients seeking primary prevention
- Patients with a variety of lipid disorders including hypercholesterolemia, hypertriglyceridemia and hypoalphalipoproteiemia
- Patients with uncontrolled hypertension

**Program for Patients with Diabetes**

**Patient Scheduling:**
617-667-2377

A joint initiative of Beth Israel Deaconess Medical Center and Joslin Diabetes Center, the Program for Patients with Diabetes offers a full range of cardiac evaluation, testing and treatment services including exercise testing, cardiac catheterization and the most sophisticated treatment options available. A specially trained, multidisciplinary team consults with patients and referring physicians about relevant issues such as medications, glucose control, management of elevated cholesterol and other lipid disorders, treatment of hypertension, the need for specific non-invasive or invasive cardiac testing, and other issues related to the heart health of patients with diabetes. The program’s goals are to identify and treat diabetic patients who are at risk for heart disease before problems occur and to offer state-of-the-art treatments for those with established cardiac illness.

**Patients Appropriate for Referral:**
- Patients with diabetes that are at high risk for or who have established cardiovascular disease

**Russian-American Cardiovascular Program**

**Patient Scheduling:**
617-667-4811

The Russian-American Cardiovascular Program provides comprehensive cardiovascular evaluation and care for patients whose primary language is Russian. All necessary evaluations and treatments are performed at BIDMC. Our bilingual cardiologists provide longitudinal care to patients for a full range of cardiovascular disorders. These cardiologists are aware of the unique medical needs of the Russian immigrant community, and work closely with the referring primary care physician to develop the most medically appropriate, judicious course of testing and treatment. For all other services at BIDMC, 24/7 on-site translation services are standard.

**Patients Appropriate for Referral:**
- Russian-speaking patients with known or suspected disease

**Arrhythmia Monitoring Laboratory**

**Patient Scheduling:**
617-632-0550

The BIDMC Arrhythmia Monitoring Laboratory performs more than 2,000 studies annually. These include 24- or 48-hour Holter monitors and patient-activated event recorders for a two-week duration of monitoring. The laboratory employs state-of-the-art monitors and rhythm analysis equipment and provides an unparalleled, one-of-its-kind service in the Boston area. Scans are performed by certified arrhythmia technicians and scanning quality is superior. Recordings are reviewed immediately by a cardiologist/electrophysiologist, who promptly notifies referring physicians and patients when significant rhythm abnormalities are noted. The laboratory works closely with the electrophysiology service to identify patients at high risk for sudden cardiac death and other serious arrhythmias, and to monitor patients on antiarrhythmic drugs.

**Patients Appropriate for Referral:**
- Patients with suspected rhythm abnormalities with or without symptoms
- Patients being started on antiarrhythmic drug regimens

**Cardiac MR Center**

**Patient Scheduling:**
617-667-8555

Since its establishment in 1995 as a joint effort of the Beth Israel Deaconess Medical Center departments of medicine (cardiovascular division) and radiology, the BIDMC Cardiac MR Center has been one of the world’s leaders in this new imaging modality. The laboratory features a state-of-the-art ST dedicated Phillips Cardiac MR system, providing the full range of cardiac MR applications. All studies are interpreted at reading sessions staffed by both cardiology and radiology physician faculty.
Patients Appropriate for Referral:
- assessment of quantitative left and right ventricular function/mass
- assessment for suspected pericardial disease
- assessment of myocardial viability
- cardiomyopathy assessment including ARVD, hemochromatosis, etc.
- congenital heart disease
- evaluation for coronary anomalies/coronary artery and coronary bypass graft integrity

Cardiovascular Clinical Physiology Laboratory
Non-imaging, Metabolic and T wave Alternan Stress Testing Stress Echocardiography (Pharmacologic & Exercise) Nuclear Stress Testing (Pharmacologic & Exercise) The Clinical Physiology Stress Testing Laboratory at Beth Israel Deaconess Medical Center was established in 1981. The laboratory performs more than 7,250 cases per year using a multidisciplinary approach. The staff is comprised of physicians, physiologists and technologists. The laboratory features state-of-the-art equipment and has a national and international reputation as a core laboratory for research projects utilizing stress testing as an outcome measurement. Clinically, the laboratory is utilized to provide detection, prognosis and risk stratification of various forms of heart disease. Modalities of testing include exercise testing with non-imaging, nuclear perfusion and echocardiography/wall motion or gradient. Pharmacologic or pacing stress is used as indicated. Metabolic (oxygen consumption) and oxygen saturation testing can be performed in conjunction with select stress testing. T-wave alternan can be utilized to detect patients who are at increased risk for sudden cardiac death syndrome.

Patients Appropriate for Referral:
- chest pain syndrome
- unexplained shortness of breath
- unexplained arm, neck, back or jaw discomfort
- fatigue or weakness
- palpitations
- dizziness or fainting episodes

Echocardiography Laboratory
Patient Scheduling:
617-667-3219
The Beth Israel Deaconess Echocardiography Laboratory performs more than 12,000 studies annually, including over 600 transesophageal echocardiographic studies and almost 1,500 stress echocardiograms. The laboratory features state-of-the-art imaging systems with real-time electronic report generation. Study interpretations are provided by staff physicians who have passed the National Board of Echocardiography Examination of Special Competency in Adult Echocardiography. Procedures include: transthoracic (surface) echocardiography transeophageal echocardiography, stress (physiologic and pharmacologic) echocardiography and contrast echocardiography.

Patients Appropriate for Referral:
- Patients with known or suspected valvular heart disease, ventricular dysfunction, congenital heart disease, cardiomyopathy, congestive heart failure, pericardial disease, cardiac source of embolism or coronary heart disease

Electrophysiology
Established in 1992, The Harvard-Thorndike Electrophysiology Institute and Arrhythmia Service is an internationally recognized leader in diagnosing and treating cardiac arrhythmias. Institute members have helped pioneer the development of modern cardiac electrophysiology, and most recently developed the Carto system, which allows staff to perform complex ablations in both laboratories simultaneously with complete electroanatomic mapping of the heart to better understand the pathophysiology of arrhythmias. Electrophysiology staff conduct cutting-edge research to increase understanding of arrhythmias and develop advanced treatment modalities. Clinical and research studies are conducted in both bipline laboratories equipped with Carto and non-contact mapping systems. Cardiac electrophysiology services include: ambulatory arrhythmia management in an outpatient clinic setting for patients with even the most complex arrhythmias arrhythmia clinic with a special focus on treating unexplained syncope (fainting) invasive electrophysiologic (EP) evaluation to diagnose both clinical tachyarrhythmias and bradyarrhythmias, and test the effectiveness of medications catheter ablation during which physicians deliver radiofrequency or cryothermal energy to abnormal areas of the heart to control or cure a variety of cardiac arrhythmias including supraventricular tachycardias and atrial fibrillation implanting defibrillators and permanent pacemakers (including biventricular pacemakers and defibrillators for the management of patients with congestive heart failure) with follow-up in a pacemaker/device clinic that provides continuing education, support groups, and a transvenous lead extraction using the latest techniques to extracts chronically implanted pacemaker and defibrillator leads Patients Appropriate for Referral: Patients who have: bradyarrhythmias or tachyarrhythmias congestive heart failure with wide QRS complexes high-risk post infarction the need for risk stratification for sudden death, including those with congenital abnormalities (e.g. long QT, Brugada syndrome, arrhythmogenic right ventricular dysplasia)

Electrophysiology Programs
Arrhythmia Clinic
Patient Scheduling:
617-667-8800
The Arrhythmia Clinic is available to help manage patients with tachyarrhythmias, bradyarrhythmias, syncope, hereditary disorders of the heartbeat, and those who require risk assessment for sudden death.

Atrial Fibrillation Clinic
Patient Scheduling:
617-667-8800
The Atrial Fibrillation Clinic is dedicated to clinical management and research of atrial fibrillation. Services include: arranging and performing cardioversion counseling on decisions regarding antiarrhythmic medications initiation and follow-up of antiarrhythmic therapy counseling on decisions regarding anticoagulation counseling on decisions about and performance of radiofrequency ablation of atrial arrhythmias
**CARDIOVASCULAR INSTITUTE (CVI)**

**Electrophysiology Laboratory**

**Patient Scheduling:**
617-667-8800

Beth Israel Deaconess Medical Center performs more than 1,300 cardiac electrophysiology procedures annually. Our electrophysiology suite includes two biplane laboratories equipped with Carto and non-contact mapping systems and intracardiac ultrasound. The Carto system allows staff to perform complex ablations in both laboratories simultaneously with complete electroanatomic mapping of the heart to better understand the pathophysiology of arrhythmias. In addition to diagnostic electrophysiology studies, electrophysiologic interventional procedures include: • catheter ablation • defibrillator and permanent pacemaker implantation • transvenous lead extraction

**Patients Appropriate for Referral:**
- Patients experiencing episodes of cardiac arrhythmia
- undiagnosed palpitations
- syncpe
- supraventricular and ventricular tachycardias
- atrial flutter fibrillation
- Wolff Parkinson White syndrome
- risk of cardiac arrest
- congenital or acquired bradyarrhythmias
- conduction disturbance not diagnosable by ECG alone

**Pacemaker Device Service**

**Patient Scheduling:**
617-667-8800

In addition to performing extensive research on implantable devices, including devices used to treat ventricular tachyarrhythmias and pacemakers for the treatment of bradyarrhythmias, the Electrophysiology and Pacing Service at Beth Israel Deaconess Medical Center offers a daily outpatient clinic and an inpatient consultation service for patients who require pacemakers or other implantable devices.

**Patients Appropriate for Referral:**
- Patients with ventricular tachyarrhythmias and/or bradyarrhythmias for whom implantable devices are a viable treatment/management option

**INTERVENTIONAL CARDIOLOGY**

**Patient Scheduling:** 617-CARDIAC (617-227-3422), 617-632-7461 The cardiac catheterization laboratory at BIDMC is among the busiest in the country, performing more than 4,000 catheterizations and 1,500 interventional procedures annually. Its staff continue to play a major role in the pre-clinical and clinical development and evaluation of cutting-edge technologies for the treatment of complex cardiovascular disorders and are involved in lecturing and teaching throughout the world. Interventional procedures performed at BIDMC include: • complex conventional angioplasty • coronary atherectomy • coronary stent placement • directional and rotational atherectomy • intravascular ultrasound • intracoronary laser treatment • endomyocardial biopsy • balloon aortic and mitral valvuloplasty • ASD/PFO closure • a full spectrum of peripheral vascular angiography and revascularization procedures The cardiac catheterization suite includes five catheterization laboratories and features state-of-the-art digital imaging for enhanced resolution with lower radiation. The equipment also enables cardiologists to fax preliminary findings and recommendations to referring physicians within minutes of completing each case. The section is nationally renowned for technical expertise, research and superior patient care. More than 15 alumni of the Interventional Training Program have been appointed to leadership roles as catheterization laboratory directors throughout the United States.

**INTERVENTIONAL CARDIOLOGY PROGRAMS**

**24-Hour Angioplasty Program**

**Patient Scheduling:**
617-CARDIAC
617-227-3422

See program description under the Emergency Medicine Tab.

**Cardiac Catheterization Laboratory**

**Patient Scheduling:**
617-CARDIAC
617-227-3422

Beth Israel Deaconess Medical Center performs more than 5,000 cardiac catheterizations and 2,400 interventional procedures annually. The cardiac catheterization suite includes five catheterization laboratories and features state-of-the-art digital flat-panel imaging. This laboratory supports an acute angioplasty program and allows cardiologists to fax preliminary findings and recommendations to referring physicians within minutes of completing each case. Interventional procedures include: • complex conventional angioplasty • coronary atherectomy • coronary stent placement • directional and rotational atherectomy • intravascular ultrasound • endomyocardial biopsy • balloon aortic and mitral valvuloplasty • peripheral procedures • brachytherapy The laboratory maintains a "Just Say Yes" policy for referring physicians. All patients referred for cardiac catheterization will be accepted without question with only one phone call.

**Patients Appropriate for Referral:**
- Patients with known or suspected cardiac disease
Intravascular Brachytherapy Program

Patient Scheduling:
617-CARDIAC
617-227-3422

A multidisciplinary program of cardiology and radiation oncology, the Intravascular Brachytherapy Program uses radiation to treat arterial restenosis. Patients with coronary artery disease are frequently treated by placing a stent in the narrowed artery. In some patients, an exaggerated healing response causes the development of renarrowing within the stent, or in-stent restenosis. To treat this condition, the blockage is reopened and a radioactive source guided to the lesion site delivers a radiation treatment to prevent the recurrence of in-stent restenosis.

Patients Appropriate for Referral:
- Patients with restenosis

Peripheral Cardiovascular and Peripheral Interventions Program

Patient Scheduling:
617-CARDIAC
617-227-3422

Since its establishment, the Peripheral Cardiovascular and Peripheral Interventions Program has grown to be one of the busiest in New England. The program is designed to assess cardiovascular and peripheral vascular disease in all patients. Patients with carotid disease, claudication, non-healing ulcers, renal vascular disease, upper or lower extremity vascular obstruction, thoracic or abdominal aortic aneurysm or venous disease can be evaluated and treated. The peripheral catheterization suite includes the latest technologies in peripheral vascular imaging with digital capabilities to include imaging all major vascular beds. The program is involved with the latest investigational trials and devices including carotid, renal and lower extremity trials. Peripheral vascular interventional procedures include:
- conventional arterial revascularization with angioplasty or stenting
- complex arterial revascularization with angioplasty or stenting
- periperal vascular athrectomy or thrombectomy
- carotid artery revascularization and stenting
- renal artery revascularization
- peripheral brachytherapy
- abdominal aortic and lower extremity intervention and revascularization
- thoracic or abdominal aortic aneurysm thrombectomy or thrombolysis for acute limbs

Patients Appropriate for Referral:
- Patients with known or suspected peripheral vascular arterial or venous disease

CARDIAC SURGERY

BIDMC has one of the largest cardiac surgery programs in Massachusetts, performing approximately 800 procedures annually. The program offers diagnostic, treatment and follow-up expertise for a full range of cardiac and cardiovascular conditions including:
- off-pump coronary artery bypass graft (OP-CABG)
- minimally invasive valve repair and replacement
- minimally invasive (endoscopic) vein harvest
- complex aortic surgeries such as aortic root reconstruction and total arch and thoracic aorta reconstruction
- angiogenic therapy
- surgical treatment for arrhythmias

Beth Israel Deaconess cardiac surgeons have developed cutting-edge devices and procedures to enhance the patient experience while improving surgical outcomes, including:
- the Cohn Cardiac Stabilizer – a device that allows the heart and lungs to continue to support the body during coronary artery grafting;
- NextStich – a suturing system that enhances efficiency and precision during valve replacement surgery; and techniques to perform valve repair, valve replacement and coronary artery bypass endoscopically.
The division of vascular surgery assesses and manages a wide variety of vascular disorders, including problems in the circulation to the brain (carotid artery surgery), kidneys (renal artery surgery), abdominal aorta aneurysm and obstructive arterial disease (endovascular aortic stent grafts), intestines (mesenteric and celiac arteries), and problems in the circulation of the legs, including those associated with the complications of diabetes mellitus. Patients who have disorders of the venous system, including varicose veins and leg ulcers, are also seen.

### VASCULAR AND ENDOVASCULAR SURGERY PROGRAMS

#### Aortic Aneurysms and Dissections

**Patient Scheduling:**
617-632-9959

Modern management of aortic aneurysms and aortic dissections includes the application of direct surgical and endovascular technology. This allows tailoring of treatment to specific patient needs.

**Patients Appropriate for Referral:**
- Patients with thoracic aneurysms, abdominal aortic aneurysms or aortic dissections

#### Carotid Artery Surgery/Stenting

**Patient Scheduling:**
617-632-9959

Beth Israel Deaconess Medical Center surgeons are recognized for exemplary results in carotid endarterectomy for stroke prevention. The overall combined stroke and mortality rate of carotid endarterectomy has been 1.6 percent, with less than one percent in patients undergoing carotid endarterectomies for asymptomatic diseases. This is generally a same-day admission procedure with patients going home the next day. Carotid ultrasound studies are performed in the office to streamline diagnosis and treatment plans. Members of the division are participants in the CREST trial for carotid stent procedures in selected patients. These procedures are being introduced in a highly monitored, multi-disciplinary collaboration with cardiology, radiology and neurosurgery.

**Patients Appropriate for Referral:**
- Patients with both symptomatic and asymptomatic carotid stenosis, as well as those with recurrent disease
- Patients with vertebrobasilar disease
Endovascular Surgery

Patient Scheduling:
617-632-9959

Many patients may be more favorable candidates for less invasive means of treating their vascular disease. In such cases, endovascular techniques offer an especially attractive option, particularly for those patients with multiple medical co-morbidities that would preclude open surgical repair. Aneurysms in the chest or abdomen, chronic mesenteric ischemia, symptomatic renal artery stenosis, and iliac and lower-extremity occlusive disease can often be managed endovascularly. In addition to standard open surgical procedures, members of our vascular surgery team are specifically trained and highly qualified in these less invasive techniques, such as angioplasty and stenting for occlusive lesions and placing stent grafts for aneurysmal disease. Patients are evaluated and treated with the procedure that is safest and most appropriate to their specific problems and overall clinical circumstances or with a combination of open and endovascular management.

Patients Appropriate for Referral:
- Patients with thoracic or abdominal aortic aneurysms, chronic mesenteric ischemia, symptomatic renal artery stenosis or peripheral artery disease

Lower Extremity Reconstruction

Patient Scheduling:
617-632-9959

BIDMC vascular surgeons offer all modern approaches to diagnosing and treating lower extremity arterial occlusive disease including ultrasonic diagnostic studies, arteriography, surgery and endovascular interventions. Diagnosis and interventional management of peripheral vascular disease and consultative services are provided.

Patients Appropriate for Referral:
- Patients with symptomatic lower extremity arterial occlusive disease

Renovascular Hypertension and Mesenteric Ischemia

Patient Scheduling:
617-632-9959

BIDMC offers endovascular and surgical repair of the renal arteries for hypertension and the visceral arteries for mesenteric ischemia, providing the newest, and safest options to manage these complex problems.

Patients Appropriate for Referral:
- Patients with symptomatic renal or visceral arteries

Varicose Veins and Telangiectasia

Patient Scheduling:
617-632-9959

BIDMC vascular surgeons diagnose and treat a wide variety of venous diseases. Treatments range from office injection sclerotherapy of spider veins and small varicose veins to operative varicose vein excision and saphenous vein stripping using minimally invasive, cosmetic-based techniques. Evaluation and treatment for patients with difficult venous stasis ulcers are also available, as is VNUS closure as an outpatient treatment for varicose veins.

Patients Appropriate for Referral:
- Patients with cosmetic or symptomatic varicose veins, including venous ulceration, as well as those with complications of lymphedema

CVI AFFILIATED PHYSICIANS

We believe patients should have access to care where they live and work whenever possible. That’s why BIDMC affiliates provide heart and vascular care at 15 community locations. When patients need advanced care, they are seamlessly referred to the CVI at Beth Israel Deaconess Medical Center in Boston’s Longwood Medical and Academic Area. There are about 35 physicians in the network who are employed by Cardiovascular Associated Physicians of HMFP or CAPHMFP (a subsidiary of HMFP). There are 15 network locations located in: Ayer, Boston – Copley Square, Chelsea, Easton, Framingham, Lexington, Marlboro, Medway, Milton, Natick, Needham, Norwood, Plymouth, Taunton and Worcester. Formal hospital affiliations exist with BIDMC-Needham, Caritas Good Samaritan in Brockton, MetroWest Medical Center in Framingham, Milton Hospital, Nashoba Valley Medical Center in Ayer and St. Vincent Hospital in Worcester.

DERMATOLOGY

The department of dermatology offers comprehensive dermatologic diagnostic and therapeutic services, as well as skin cancer, cosmetic and laser surgery. Services include general dermatology consultation and continuing care, UVB, PUVA, phototherapy and cutaneous surgery. Surgical services include: excision of benign and malignant lesions; Mohs' Micrographic Surgery for selected skin cancers; reconstruction following cancer surgery; laser treatment of vascular and pigmented lesions; and cosmetic procedures such as laser resurfacing, hair removal, chemical peels, liposuction, hair transplantation, dermabrasion, Botox, Collagen and Restylane injection, and sclerotherapy.

GENERAL DERMATOLOGY

General dermatology offers a full array of dermatologic care, including consultation and continuing care, UVB, PUVA and phototherapy.

GENERAL DERMATOLOGY PROGRAMS

Dermatology and Laser Center at Chestnut Hill

Patient Scheduling:
617-754-0350

The Dermatology and Laser Center of Chestnut Hill offers a full range of medical and cosmetic skin care services. Cosmetic services include laser hair removal, microdermabrasion, chemical peels, sclerotherapy (laser and injection), and botox, collagen and Restylane injections. The center also offers other laser treatments for birthmarks, spider veins, port wine stains, tattoos, and red or brown spots. Liposuction is also available in the surgical suite at Beth Israel Deaconess Medical Center.

Patients Appropriate for Referral:
- All dermatology patients and patients who are interested in cosmetic skin care services

Medical Dermatology Shapiro 2

Patient Scheduling:
617-667-3753

The Shapiro 2 medical dermatology practice offers comprehensive diagnostic and therapeutic services for dermatologic disease. Specialized services include psoriasis care and a pigmented lesion clinic for persons with a history of melanoma or whom a dermatologist has determined are at high risk of melanoma.

Phototherapy

Patient Scheduling:
617-667-3689

The phototherapy unit offers ultraviolet A and ultraviolet B treatment for skin diseases such as psoriasis, eczema, cutaneous T-cell lymphoma and vitiligo. The unit offer the most up-to-date technology, including narrow-band UVB.

Patients Appropriate for Referral:
- Patients with skin diseases such as psoriasis, eczema, cutaneous T-cell lymphoma and vitiligo

Dermatology - Needham

Patient Scheduling:
617-754-0350

The Needham medical dermatology practice offers comprehensive diagnostic and therapeutic services for dermatologic disease.

Cutaneous Oncology Program

Patient Scheduling:
617-632-9250

See program description under the Medicine Tab.

DERMATOLOGICAL SURGERY

The dermatology surgery unit at Beth Israel Deaconess Medical Center focuses on the removal of skin cancers and atypical moles. We predominantly perform Mohs' Micrographic Surgery, a very precise technique for removal of basal cell and squamous cell carcinomas in which the entire margin is examined microscopically by frozen section to assure complete tumor removal and the best possible cosmetic result. Atypical moles and melanomas are removed by excisional surgery. Patients Appropriate for Referral: Patients who have been diagnosed by a dermatologist with skin cancer or an atypical mole.

Emergency Medicine is a professional group of board-prepared and board-certified emergency physicians with a practice that includes tertiary care at the Berenson Emergency Department (Beth Israel Deaconess Medical Center) as well as community care at hospitals in Needham (Beth Israel Deaconess Hospital-Needham), Ayer (Nashoba Valley Medical Center), Worcester (Saint Vincent Hospital), Milton (Milton Hospital), and Woonsocket, Rhode Island (Landmark Medical Center). Our group has nationally renowned experts in education and pre-hospital care (EMS), and is viewed as a leader in the community in customer access, service and satisfaction. We provide 24-hour consultations in toxicology and are affiliated with the regional poison center and Children’s Hospital Boston. Our Harvard Affiliated Emergency Medicine Residency Program attracts outstanding candidates from the top medical schools and is ranked among the best in the country. Finally, our director for emergency preparedness is the branch chief for environmental health and safety of the national staff of the Coast Guard auxiliary, allowing us to help define the response and care provided offshore by the Coast Guard.

24-Hour Angioplasty Program

Patient Scheduling:
617-CARDIAC
617-227-3422

Beth Israel Deaconess Medical Center was one of the pioneering programs in the United States to offer primary PCI exclusively for acute MI. The program offers around-the-clock availability of primary PTCA with 90-minute time from notification to open artery. In conjunction with MedFlight and ground transport, similar times can be achieved for patients from community hospitals in Boston and within the Route 495 loop. The catheterization laboratory is staffed by Level III interventional cardiologists, cath lab nurses and cath lab technicians.

Patients Appropriate for Referral:
- Patients experiencing a heart attack

Acute Stroke Team

Physician Referral:
617-632-7243
Pager 37828

Our acute stroke team provides patients who are experiencing acute thromboembolic stroke with rapid evaluation by stroke specialists, cerebrovascular experts and neurosurgery experts for treatment with intra-arterial thrombolysis, mechanical recanalization, or, if necessary, stent angioplasty.

Patients Appropriate for Referral:
- Patients who are experiencing acute thromboembolic stroke

Neurosurgical Technology and Expertise

Physician Referral:
For more information: 617-667-6387

Patients who are experiencing cerebrovascular emergencies such as aneurysmal subarachnoid hemorrhage and ruptured arteriovenous malformations can be immediately diagnosed and treated in Beth Israel Deaconess Medical Center’s state-of-the-art, three-dimensional, high-resolution biplane digital angiography suite using a variety of endovascular techniques, including endovascular embolism and conventional microsurgery. The program in complex spine neurosurgery provides expertise in the rapid treatment of spinal cord emergencies such as traumatic spinal cord injury and cord compressive syndromes.

Patients Appropriate for Referral:
- Patients who are experiencing cerebrovascular emergencies

Rooftop Helipad

Physician Referral:
To access MedFlight Services: 800-233-8998

The medical center’s rooftop helipad, located above the emergency department, benefits patients who need immediate transport to acute care emergency services.

### MEDICINE

#### ALLERGY AND INFLAMMATION

**BIDMC 617-278-8100**

Lexington781-672-2350

The division of allergy and inflammation provides clinical evaluation and care for patients with allergic and related diseases. An active allergy clinical program, staffed by nurses and physicians, is available at the primary practice site at 1 Brookline Place in Brookline as well as at the Carl J. Shapiro Clinical Center, Beth Israel Deaconess HealthCare — Lexington and Beth Israel Deaconess HealthCare — Chelsea. Diagnostic evaluation includes allergen skin testing, recommended in the evaluation of patients with asthma, as well as for other allergic disorders. Consultative and primary care allergy services are provided by board-certified allergy physicians. In addition to treating common allergic diseases, the division offers special expertise in evaluating drug- and cytokine-mediated allergic reactions and eosinophilic disorders. Consultations and care are also provided for outpatients and inpatients with allergic and immunologic disorders.

#### ENDOCRINOLOGY

617-667-9344

The endocrinology division provides expertise in the full spectrum of endocrine disorders, including: pituitary, thyroid and adrenal diseases; diabetes; and obesity. Special interests of the endocrinology staff attract patients with problems related to diabetes and pregnancy, insulin resistance, obesity, hyperparathyroidism, thyroid disorders, growth disorders and male sexual dysfunction.

#### GENERAL ENDOCRINOLOGY

Patient Scheduling: 617-667-2151

Beth Israel Deaconess Medical Center’s team of endocrinologists includes world-renowned experts in the treatment of the full spectrum of endocrine problems from adrenal, pituitary, pancreatic and parathyroid disorders to complicated disorders of thyroid dysfunction and thyroid cancers. The clinic operates Monday through Friday, with regularly scheduled day and evening appointments. Physicians on the service offer general consultative services as well as radioactive iodine treatments for both hyperthyroidism and thyroid cancer. Routine endocrine testing such as ACTH stimulation and dexamethasone suppression are provided, as well.

#### GENERAL ENDOCRINOLOGY PROGRAMS

**Thyroid Nodule Center**

**Patient Scheduling:**

617-667-9333

The Thyroid Nodule Center provides patients with "one-stop shopping" in the diagnosis and treatment of nodular thyroid disease. The clinic is comprised of a multidisciplinary team with on-site members from the endocrine division and the departments of radiology, pathology and surgery. The multidisciplinary nature of the team allows for optimal clinical assessment. The team works together to provide all necessary services including taking the patient history, conducting a physical exam, performing laboratory tests, and scheduling radiologic tests including thyroid or parathyroid nuclear scans. Thyroid ultrasound and fine-needle aspiration biopsy are performed on site if indicated, and real-time cytologic screening is provided to ensure that adequate cellular material is obtained, minimizing the need for repeat biopsies. Whether the treatment involves medication or a surgical procedure, patients are strongly encouraged to participate in decisions regarding the treatment of their thyroid conditions. The center provides extensive patient education about thyroid diseases to help with these decisions. Beth Israel Deaconess Medical Center's Thyroid Nodule Center offers the highest level of experience and expertise, access to the most recent treatment options, state-of-the-art facilities and a patient-centered philosophy.

**Patients Appropriate for Referral:**

- Patients with palpated nodules or irregularities of the thyroid
- Patients with nodules visualized radiographically

#### BONE AND MINERAL METABOLISM UNIT

The Osteoporosis Prevention and Treatment Center specializes in the prevention, diagnosis and treatment of osteoporosis and metabolic bone disease, including:

- postmenopausal osteoporosis; male osteoporosis; osteopenia induced by glucocorticoids, anticonvulsants and excess thyroid hormone; Paget's disease; hypercalcemia of malignancy; and hyperparathyroidism. Consults may include state-of-the-art bone density testing, biochemical diagnostics (including new markers of bone turnover), nutritional and physical therapy counseling; and informative take-home materials. The division also accepts referrals for bone density testing only.

#### DIABETES

617-732-2440

Joslin Clinic physicians, nurse educators, dietitians and exercise physiologists provide the most up-to-date, team-centered care for people with diabetes. Services range from one-on-one physician and educator appointments to the highly regarded Diabetes Outpatient Intensive Treatment (DO IT) Program, which is three and one-half days of medical management and intensive education offered twice monthly. The Boston clinic also offers a weight management program (Why WAIT) which is a 12-week multidisciplinary program that focuses on weight reduction in obese people with diabetes, and a program that enables patients to utilize and understand the benefit of continuous glucose monitoring (CGMS) called Sensor Logic. The Boston clinic also offers a range of specialty services including endocrinology, ophthalmology, mental health services, renal services, a sexual function clinic and women’s health services. Many Joslin physicians also serve as staff in Beth Israel Deaconess departments such as ophthalmology, renal and mental health. In addition, medical center specialists frequently provide consultation for Joslin patients for the treatment of diabetes complications such as vascular disease and cardiac disease. Joslin Clinic staff include diabetologists/endocrinologists, pediatric diabetologists, nurse practitioners, diabetes nurse educators, registered nutritionists, exercise physiologists, ophthalmologists, mental health professionals and nephrologists. The clinic also provides adult diabetes and endocrine care at Beth Israel Deaconess Hospital-Needham.
**DIABETES PROGRAMS**

**Joslin Clinic**
Joslin physicians, nurse educators, dietitians and exercise physiologists provide the most up-to-date, team-centered care for people with diabetes. Services range from one-on-one physician and educator appointments to the highly regarded Diabetes Outpatient Intensive Treatment (DO IT) Program, which is three and one-half days of medical management and intensive education offered twice monthly. The Boston clinic also offers a weight management program (Why WAIT) which is a 12-week multidisciplinary program that focuses on weight reduction in obese people with diabetes, and a program that enables patients to utilize and understand the benefit of continuous glucose monitoring (CGMS) called Sensor Logic. Many Joslin physicians also serve as staff in Beth Israel Deaconess departments such as endocrinology, renal and mental health. In addition, medical center specialists frequently provide consultation for Joslin patients for the treatment of diabetes complications such as vascular disease and cardiology disease. Joslin Clinic staff include: diabetologists/endocrinologists, pediatric diabetologists, nurse practitioners, diabetes nurse educators, registered nutritionists, exercise physiologists, ophthalmologists, mental health professionals and nephrologists. The clinic also provides adult diabetes and endocrine care at Beth Israel Deaconess Hospital-Needham.

**Patient Education at the Joslin Clinic**
**Patient Scheduling:**
617-732-2514

The Joslin Clinic, a joint venture between Joslin Diabetes Center and Beth Israel Deaconess, provides your patients with the best diabetes care available through our main campus in Boston’s Longwood Medical Area, and through its satellite program at Beth Israel Deaconess Needham. We also provide a strong patient education program that focuses on areas such as overall diabetes management, nutrition and exercise, insulin education, insulin pump education, coping with diabetes, complications of diabetes and managing diabetes risk factors.

**Patients Appropriate for Referral:**
- Patients with diabetes

**Sexual Function**
**Patient Scheduling:**
617-732-2440

The Sexual Function Clinic at the Joslin Clinic helps patients with impotence or decreased sexual function. These problems occur in up to 50 percent of men with diabetes and can also be the result of vascular disease, neuropathy, hormonal imbalances or psychological issues such as stress. Sexual Function Clinic staff provide a thorough assessment of each individual’s situation, determine and conduct appropriate testing, and develop a treatment program that best meets the patient’s needs.

**Patients Appropriate for Referral:**
- Patients who have diabetes and those who do not have diabetes but are having problems with sexual function

**Joslin/BIDMC Diabetes and Pregnancy Program**
**Patient Scheduling:**
BIDMC 617-667-9889
Joslin 617-732-2496

The Joslin Diabetes and Pregnancy Program, which is a joint service of Beth Israel Deaconess Medical Center and Joslin Clinic, brings together a team of professionals who specialize in diabetes - including physicians, nurse practitioners, nurse educators and nutritionists - to offer comprehensive diabetes and obstetric care and consultation services for women with diabetes. The team supplements the care of obstetricians and endocrinologists, and works closely with other Beth Israel Deaconess and Joslin departments such as ophthalmology, neonatology and genetic counseling. Services ranging from pre-pregnancy planning to postpartum care are offered.

**Patients Appropriate for Referral:**
- Women with diabetes who are pregnant or who are planning to become pregnant

**GASTROENTEROLOGY**

Office Consultation and Procedure Scheduling 617-867-2135
Liver: 617-632-1070
Division Chief: Dr. Simon Robson The gastroenterology division provides consultation for all aspects of gastrointestinal and liver disease. The division offers programs in hepatology and gastrointestinal cancer. More than 25,000 procedures are performed in the endoscopy unit each year. The Center for Inflammatory Bowel Disease provides comprehensive consultations with patients for difficult-to-manage ulcerative colitis and Crohn’s disease. The Center for Interventional Endoscopy offers a comprehensive and multidisciplinary approach for patients with disorders of the intestinal tract, biliary tree and pancreas who require advanced endoscopic therapy. It also provides a coordinated multidisciplinary approach to the diagnosis and treatment of diseases of the esophagus and stomach. The Liver Center provides specialized care for patients with acute and chronic liver diseases, including those who are referred for liver transplantation.
More than 35 experienced providers at the top of their field provide compassionate gastroenterologic care at Beth Israel Deaconess Medical Center.

**GENERAL GASTROENTEROLOGY PROGRAMS**

**Celiac Center**

**Patient Scheduling:**
617-667-1272

The Celiac Center at BIDMC is the only multidisciplinary center in New England specializing in the care of patients with celiac disease (also called celiac sprue) and other gluten sensitive disorders. The center’s faculty have pioneered novel diagnostic and therapeutic approaches for celiac disease, and its specialists use a coordinated approach to integrate diagnosis and treatment with nutritional counseling and attention to bone health and other food allergies and intolerances. The center excels at evaluating patients in whom the diagnosis of celiac disease is difficult to confirm or for whom standard treatments have failed.

**Patients Appropriate for Referral:**
- Patients with confirmed or suspected celiac disease including those with ongoing symptoms despite dietary treatment

**Center for IBS and Functional Bowel Disorders**

**Patient Scheduling:**
617-667-2135

The Center for IBS and Functional Bowel Disorders offers a variety of motility tests of the gastrointestinal tract, including: high-resolution esophageal manometry; gastric emptying; high-resolution anorectal manometry; Smart Pill technology; lactose, fructose, and H pylori breath testing; esophageal pH testing; defography; pudendal nerve latency testing; and referral resources for anorectal biofeedback. Patients Appropriate for Referral: Patients with a variety of GI motility disorders, including:
- Irritable bowel syndrome
- Swallowing disorders
- Chronic constipation
- Chronic abdominal pain
- Fecal incontinence
- Intestinal pseudo-obstruction
- Gastroesophageal reflux disease (GERD)
- Functional diarrhea
- Fecal incontinence
- Nausea and vomiting

**Patients Appropriate for Referral:**
- Patients with: irritable bowel syndrome;
- Swallowing disorders;
- Chronic constipation;
- Fecal incontinence;
- Intestinal pseudo-obstruction;
- Gastroesophageal reflux disease (GERD);
- Functional diarrhea;
- Nausea and vomiting.

**Center for Inflammatory Bowel Disease**

**Patient Scheduling:**
617-667-2135

The Center for Inflammatory Bowel Disease (IBD) has a registry of over 4,000 patients, making it one of the largest such specialized practices on the East Coast. The clinical team at the Center for IBD provides coordinated, multidisciplinary care and second opinions for both newly diagnosed and complex cases of inflammatory bowel disease (IBD), including Crohn’s disease, ulcerative colitis, pouchitis, microscopic (collagenous/lymphocytic) colitis, and indeterminate colitis. Specialists in the fields of gastroenterology, surgery, radiology and pathology work collaboratively with patients to manage and treat these conditions and to develop new treatment modalities.

**Patients Appropriate for Referral:**
- Patients with a variety of diagnoses including ulcerative colitis, Crohn’s disease, lymphocytic colitis, collagenous colitis and pouchitis
- Indeterminate colitis

**Center for Interventional Gastroenterology**

**Patient Scheduling:**
617-667-2135

Staff at the Center for Interventional Gastroenterology at Beth Israel Deaconess Medical Center are committed to providing state-of-the-art endoscopic therapy for gastrointestinal and pancreaticobiliary disorders, and to developing novel technologies and interventions for patient care. The staff also supervises endoscopic teaching and research for trainees. Approximately 1,400 ERCPs are performed each year on patients who are referred from all over New England. The center also features advanced endoscopic ultrasound, which assists in managing complex problems in the abdomen using ultrasonic guided biopsies.
Patients Appropriate for Referral:
- Patients who require ERCP, endoscopic ultrasound and other advanced endoscopic procedures such as placement of esophageal, duodenal and colonic stents
- Patients with esophageal, pancreatic and bile duct cancer
- Patients with large colon polyps who require endoscopic mucosal resection (EMR)

Heartburn and Barrett’s Esophagus Center

Patient Scheduling:
617-667-4046

The director of the Heartburn and Barrett’s Esophagus Center at Beth Israel Deaconess Medical Center helped develop a novel endoscopic therapy called the Plicator procedure for gastroesophageal reflux disease (GERD) and the center’s co-director led the multi-center trial of this device. Specialists at the center are now pioneering endoscopic therapies for Barrett’s Esophagus including BARRX radiofrequency and cryotherapy. Trials of new medications for GERD are underway, as well.

Patients Appropriate for Referral:
- Patients with gastroesophageal reflux disease (GERD) and Barrett’s Esophagus

Hereditary Colorectal Cancer Program

Patient Scheduling:
617-667-1905

The Hereditary Colorectal Cancer Program serves those at increased risk of colon cancer, and those looking to learn additional information about the role that genetics or heredity plays in the development of cancer. The program offers genetic testing and genetic counseling services for patient with colon cancer and for those who have close relatives with colon cancer. The program provides information and formal recommendations on an individual’s risks for developing cancer and appropriate management of that risk.

Patients Appropriate for Referral:
- Patients with a variety of diagnoses including ulcerative colitis, Crohn’s disease, lymphocytic colitis, collagenous colitis and pouchitis

Pancreatic Disease Center

Patient Scheduling:
617-667-5576

The directors of the Pancreatic Disease Center have pioneered new diagnostic methods and innovative therapies for chronic pancreatitis. The center provides state-of-the-art diagnosis and treatment for patients with diseases of the pancreas. During the initial visit, patients referred for consultation may see a gastroenterologist, oncologist and surgeon. This multidisciplinary team works with patients to develop and implement appropriate treatment plans. Diagnostic and treatment options include ERCP, pancreatic secretion test, ultrasound, CT scan, MRI, surgical interventions, and nutrition and pain management consultations.

Patients Appropriate for Referral:
- Patients with chronic or acute pancreatitis, hereditary pancreatitis, pancreatic insufficiency, pancreas cysts, cystic fibrosis (CF) and pancreatic cancer

GENERAL GASTROENTEROLOGY RELATED PROGRAMS

Gastrointestinal and Hepatobiliary Oncology Program

Patient Scheduling:
617-667-1941

See program description under the Medicine Tab.

Laparoscopic and Minimally Invasive Colon and Rectal Surgery

Patient Scheduling:
617-667-4159

See program description under the Surgery Tab.

Multidisciplinary Rectal Cancer Clinic

Patient Scheduling:
617-667-4159

See program description under the Surgery Tab.
**MEDICINE**

**Obesity Surgery**

**Patient Scheduling:**
617-667-2845

Beth Israel Deaconess Medical Center’s Bariatric Surgery Program is one of the largest and most comprehensive obesity surgery programs in Massachusetts, performing more than 200 gastric bypass procedures annually. The program’s multidisciplinary team includes dedicated surgeons and nurses, along with experts in the nutritional, psychological and medical aspects of obesity treatment. Its multidisciplinary approach results in well-screened and informed patients who participate in a safe and effective surgical and post-surgical therapy for severe obesity. In addition to significant weight loss, bariatric surgery helps restore healthy organ function and may resolve other obesity-related medical problems. The main goal is to achieve enhanced quality of life for each patient through safe surgical therapy.

**Wound/Ostomy Care**

**Patient Scheduling:**
617-632-8185
617-632-7874

See program description under the Surgery Tab.

---

**LIVER DISORDERS**

**Patient Scheduling General Liver Disease …………………………617-632-1070 Liver Research Center …………………617-632-1270 Transplantation …………………617-632-9700**

The Liver Center at Beth Israel Deaconess Medical Center has brought together an exceptional team of providers from multiple disciplines to provide personalized care and the most advanced treatment options to patients with all types of liver conditions and diseases. Specialists in the field of gastroenterology, infectious disease, interventional radiology, hepatology, oncology, pathology, radiology, surgery and transplantation are all active and important members of this cohesive team. The Liver Center’s physicians and staff also are recognized nationally as the leaders in cutting-edge, liver-related basic and clinical research. The center’s unified philosophy facilitates the provision of a full spectrum of care for both patients with common liver conditions and those who have complex medical or surgical needs. The Liver Transplant Program offers a team of nationally recognized surgeons who are experts in adult living donor transplants, split- and reduced-size liver transplant, and organ donor transplant. This state-of-the-art program provides a complete spectrum of care including transplant evaluation, social services, pre-surgical care, surgery, postoperative care, and follow-up care after hospital discharge. The Liver Tumor Clinic combines the knowledge and experience of professionals in the fields of hepatology, medicine, radiology, oncology and surgery to treat primary and metastatic tumors. Treatment options include surgical removal, chemotherapy, cryosurgery, chemoembolization and the use of microwaves, radiofrequency waves or laser energy to destroy tumors. Beth Israel Deaconess Medical Center is a leading provider of hepatocellular cancer care in New England. The Viral Hepatitis Program offers the most advanced clinical therapies to patients with hepatitis B and C, including trials of new, long-acting interferons given in combination with other anti-viral treatments including novel proteases and polymerases. The program specializes in treating patients who are co-infected with HIV and hepatitis C, and in using new therapies to prevent progression of liver disease. Beth Israel Deaconess Medical Center has also established a dedicated liver inpatient unit, where an integrated team of physicians and nurses care for patients with liver failure who are recovering from complex liver surgery and those who have undergone transplantation surgery. The liver inpatient unit is technically and professionally state-of-the-art.

**LIVER DISORDERS PROGRAMS**

**Liver Transplantation**

**Patient Scheduling:**
617-632-9700

The multidisciplinary liver transplant team is dedicated to the management of patients with a variety of acute and chronic liver conditions who are candidates for liver transplantation. Board-certified transplant surgeons perform whole, split and reduced-size deceased donor transplants and adult living-donor transplants as well as general surgery for transplant patients. Transplant hepatologists work closely with transplant surgeons throughout the evaluation, pre-operative and post-operative phases of transplantation.

**Patients Appropriate for Referral:**
- Patients with diseases of the liver that lead to organ failure or the need for transplant
- Transplant patients needing general surgery

**GERONTOLOGY**

617-632-8696

The gerontology division at Beth Israel Deaconess Medical Center has an over 25-year track record as a leader in the field of geriatric medicine. Specializing in providing care to the growing population of seniors 65 and older, it supports the Harvard Medical School Multi-campus Geriatric Fellowship Program. This program is one of the oldest and largest geriatric training programs in the country. The geriatricians who practice within the division are board certified in geriatrics and specialize in helping patients over the age of 65 maintain their health and manage chronic health problems that often accompany the aging process. The gerontology division physicians and nurse practitioners work closely with geriatricians from the Hebrew SeniorLife and with other community-based providers of geriatric care. These collaborations provide improved communication between settings.

**GERONTOLOGY PROGRAMS**

**Senior Health@BIMDC, Geriatric Primary Care and Consultation**

**Patient Scheduling:**
617-632-8696

Patients who want a geriatrician as a primary care physician have a number of physicians to choose from at the Senior Health practice. The physicians and nurse practitioners offer comprehensive geriatric primary care for the entire range of adults over age 65, from the healthy and active to those with multiple medical problems.
Patients managed by our primary care physicians also have access to our specialized geri-psychiatric services including psychiatry and clinical social work. Physicians may also refer patients for a geriatric consultation of a specific complex medical problem. Areas of consultation include: falls and syncope, management of diabetes, hypertension or hypotension, memory loss, medication management, pre- and post-operative assessment, specialized consultation for the aging adult with developmental disabilities. After consultation, a detailed report will be sent to the referring physician. The handicapped accessible office is conveniently located on the first floor.

**Acute Care of Vulnerable Elders (ACOVE) Unit**

Kathryn Agarwal, M.D., Medical Director. Patient Scheduling: BIDMC affiliated physicians may arrange direct admissions by calling 617-667-5555 and entering the pager 9-ACOV(2268). Admission through the emergency department should be specified by referring physician to the emergency department staff. The ACOVE program (Acute Care of Vulnerable Elders) is an extension of the ACE (Acute Care of Elders) concept that was first described in the New England Journal of Medicine in 1995, and was shown to be underway in collaboration with other affiliated hospitals at Harvard Medical School.

**Inpatient Geriatric Consult Service**

**Physician Referral:**

Geriatric Consult Fellow, pager #: 33570

The Geriatric Consult Service is available to assist any inpatient team in the care and management of elderly patients admitted to the medical center. The consult team can collaborate on a wide variety of issues and concerns affecting older hospitalized adults. Common consult questions include delirium assessment and management, perioperative care of elderly patients, evaluation of polypharmacy, pain management of older patients, assessment of patients with dementia, evaluation of falls, assessment of frailty and deconditioning, end-of-life decision making, discussions regarding goals of care, creation of a safe discharge plan, and assessment of other geriatric syndromes and complex psychosocial issues.

**Patient Transition Program**

A number of gerontology division physicians and nurse practitioners care for patients at local rehabilitation facilities and skilled nursing facilities. Nursing care management assists with referrals to these facilities. This program provides continuity and ease of communication between the nursing facility MD and the primary care provider. BIDMC geriatricians also work with the facilities to improve quality of care and set appropriate medical guidelines.

**HEMATOLOGY AND ONCOLOGY**

617-667-1198

The division of hematology and oncology offers a large clinical program that emphasizes the diagnosis and management of hematologic disorders and neoplastic diseases. The division's mission is to provide personalized cancer care by delivering state-of-the-art treatment for a specific disease in the context of a supportive environment that is attentive to the needs of the individual patient and his/her family. The faculty is composed of experts who concentrate on specific cancer types, in order to bring to each patient the most advanced, appropriate forms of clinical care. Specific areas of emphasis and expertise include the therapy of malignant hematological disorders such as acute and chronic leukemias, malignant lymphomas and multiple myeloma. State-of-the-art modalities are available such as allogeneic bone marrow transplantation, high-dose chemotherapy and autologous stem cell infusion for Hodgkin's disease, non-Hodgkin's lymphoma, and multiple myeloma. An active research and clinical program incorporates the use of post-transplant immunotherapy to rid the body of malignant cells that survive chemotherapy. Innovative treatment protocols involve the development of tumor vaccines that train the immune system to recognize and reject tumor cells. The latest in experimental cancer treatments. Interdisciplinary clinical programs provide comprehensive consultations and care for patients with pulmonary, cutaneous, gastrointestinal, hepatobiliary, genitourinary (including renal and prostate) and breast neoplasms. This includes conventional treatments as well as novel therapies employing tumor vaccines, auto-angiogenic agents and newly developed chemotherapeutic drugs. Special expertise is available for patients with coagulation problems, thrombotic disorders and AIDS-related cancers. Beth Israel Deaconess Medical Center is also a leading center for basic scientific work in the area of signal transduction and anti-angiogenesis cancer therapy. The focus is building a bridge between the laboratory and clinical programs in order to develop treatments that are tailored to an individual's disease.

**HEMATOLOGY AND ONCOLOGY PROGRAMS**

**Cancer Carelink Web Site**

cancercarelink.org The Cancer CareLink Web site allows patients, families and staff to share their experiences with breast cancer or bone marrow transplants.

**Cancer Clinical Trials Office**

**Patient Scheduling:**

617-667-3060

Beth Israel Deaconess Cancer Care is committed to moving ideas in basic science from the laboratory to the bedside, and offers a variety of novel therapies for a large array of cancer types. Patients have access to innovative cancer research through the more than 200 clinical trials coordinated by our Cancer Clinical Trials Office. The medical center also is a member and lead site in the Eastern Cooperative Oncology Group (ECOG) - another mechanism by which we bring academic care to the community through affiliations with physicians and community hospitals. As a founding member of the Dana-Farber/Harvard Cancer Center (DF/HCC), a large number of novel clinical trials are underway in collaboration with other affiliated hospitals at Harvard Medical School.
## Brain Tumor Center

**Patient Scheduling:**
617-667-1665

See program description under the Surgery Tab.

## Hereditary Colorectal Cancer Program

**Patient Scheduling:**
617-667-1905

See program description under the Medicine Tab.

## Central Line Service

**Physician Referral:**
Nurse Coordinator: 617-754-3263

**Patient Scheduling:**
617-667-2129

The Line Service is made up of a team of surgeons who provide venous access for patients who require chemotherapy, nutritional support or antimicrobial therapy. The service evaluates and coordinates central venous access including internal jugular and subclavian lines, Hickmans and portacaths.

## Neuro-oncology

**Patient Scheduling:**
617-667-1665

See program description under the Surgery Tab.

## Radiation Oncology

**Patient Scheduling:**
617-667-2345

The department of radiation oncology offers complete radiation oncology consultative and therapeutic services including external beam radiation therapy, intraoperative radiation therapy, brachytherapy, prostate seed implantation, CyberKnife® Image Guided Robotic Radiotherapy, total body irradiation, and stereotactic radiosurgery/therapy. Radiation oncology provides state-of-the-art treatment planning services including 3-D conformal and IMRT planning. Detailed patient information is gathered via simulation on either the Varian Ximatron or the Toshiba Aquilion Large Bore CT-Simulator and is compiled and interpreted by a team of physicians, physicists and dosimetrists who formulate the optimum treatment plan for each patient. Patients can choose to receive treatment at Beth Israel Deaconess Medical Center or at one of four convenient community sites: Beth Israel Deaconess Cancer Care at Waltham; MetroWest Cancer Center, Framingham; Saint Vincent’s Hospital, Worcester; or the Boston campus of the VA Healthcare System.

## Stereotactic Radiosurgery/Therapy

**Patient Scheduling:**
617-667-2345

See program description under the Radiation Oncology Tab.

## AIDS-Related Oncology

Patient Scheduling: 617-632-9258; 617-667-9925 As a national leader in AIDS malignancy research, The AIDS/HIV Oncology Group organized this center to expand multidisciplinary clinical research and to provide comprehensive care to adults with AIDS and cancer. A team of physicians, research nurses, social work professionals, and office staff works closely to provide a broad spectrum of services, from topical and local treatment to systemic chemotherapy. The center collaborates closely with the division of infectious disease and the departments of dermatology and psychiatry. The conduct of Phase 1 trials with laboratory and clinical endpoints will be invaluable to the clinical development and evaluation of novel immunotherapy approaches to treat AIDS related malignancies. This program also provides a valuable and fertile training ground for fellows interested in developing a clinical/translational research career involving immunotherapy, cancer and AIDS. Patients Appropriate for Referral: Patients appropriate for referral include those with AIDS-related lymphoma and Karposi’s sarcoma.
# AIDS-RELATED ONCOLOGY PROGRAMS

## AIDS Malignancy Research and Treatment Center

**Patient Scheduling:**
617-632-9258

As a national leader in AIDS malignancy research, The AIDS/HIV Oncology Group organized this center to expand multidisciplinary clinical research and to provide comprehensive care to adults with AIDS and cancer. A team of physicians, research nurses, social work professionals, and office staff works closely to provide a broad spectrum of services, from topical and local treatment to systemic chemotherapy. The center collaborates closely with the division of infectious disease and the departments of dermatology and psychiatry. The conduct of Phase I trials with laboratory and clinical endpoints will be invaluable to the clinical development and evaluation of novel immunotherapy approaches to treat AIDS related malignancies. This program also provides a valuable and fertile training ground for fellows interested in developing a clinical/translational research career involving immunotherapy, cancer, and AIDS.

**Patients Appropriate for Referral:**
- Patients with AIDS related lymphoma and Kaposi's sarcoma

## Infectious Disease/Oncology Dysplasia Clinic

**Patient Scheduling:**
617-632-7706

The Infectious Disease/Oncology Dysplasia Clinic offers education, screening and treatment of disorders associated with the human papillomavirus (HPV), the virus that is associated with warts, anogenital precancer (dysplasia) and cancer. Patients at risk for anogenital dysplasia and cancer are those with a history of genital warts, a history of HIV infection or other immunocompromised states, men who have sex with men, and a history of an abnormal anal or cervical Pap smear. Staff include infectious disease physicians, hematologist/oncologists, surgeons, nurses and pathologists. Services include: screening for anogenital human papillomavirus (HPV) infection screening for anal dysplasia by anal Pap smear; anal video colposcopic exam and biopsy to assess for precancerous or cancerous lesions; appropriate therapy or referral based on test results; and follow-up examinations.

**Patients Appropriate for Referral:**
- Persons at risk for anogenital dysplasia and cancer who desire screening
- Persons who have had an abnormal anal Pap smear
- Persons with genital warts

## BIOLOGIC THERAPY PROGRAM

The Biologic Therapy Program focuses on the use and investigation of the role of various biologic agents, primarily cytokines, in the treatment of solid tumors, such as melanoma and renal cell carcinoma. Of special note are innovations with cancer vaccines and biologic therapy. Physicians are using newly discovered molecular antigens to immunize patients against malignant melanoma or to enhance the ways antigens on the surface of cancers such as breast cancer are presented to the immune system. Treatment is largely protocol-based and tightly tied with ongoing NIH-funded laboratory investigations. This program is nationally recognized for excellence, and was instrumental in the development of current standard approaches to the treatment of melanoma and kidney cancer. The current clinical trials and related research activities will ensure that this program maintains its leadership status for the foreseeable future.

## BREAST ONCOLOGY

### BreastCare Program

**Patient Scheduling:**
617-667-2900

See program description under the Surgery Tab.
GASTROINTESTINAL ONCOLOGY

Gastrointestinal and hepatobiliary cancer diagnosis and treatment is offered by a multidisciplinary team of physicians specializing in gastroenterology, liver disease, hepatobiliary and colorectal surgery, radiation oncology and other disciplines.

GASTROINTESTINAL ONCOLOGY PROGRAMS

Gastrointestinal and Hepatobiliary Oncology Program

Patient Scheduling:
617-667-1941

The Gastrointestinal and Hepatobiliary Oncology Program is a comprehensive unit dedicated to the treatment and study of patients with cancers of the GI tract, bile ducts, liver and pancreas. Full care, including initial or second evaluations and long-term follow up is offered in conjunction with the patient’s referring physician. The program includes a well-established nationally recognized specialized center for primary and secondary tumors of the liver. The focus is on the development and evaluation of new drugs and novel techniques for effective treatment of these malignancies, and our goal is to offer an appropriate therapeutic or investigational protocol for each potential patient. In addition to standard chemotherapy, we have many continuously updated clinical trials for cancers of the esophagus, stomach, pancreas, liver, bile ducts, colon/rectum, and neuroendocrine tissues. Multiple early-phase studies allow us to evaluate new drugs, investigate anti-angiogenic and immunotherapy strategies. Collaborations with national cooperative groups (ECOG), industry, and the institutions comprising the Dana-Farber/Harvard Cancer Center supplement our investigator-initiated clinical trials with many of the best and newest treatments available. Current treatment/research programs include: surgical resection cryoablation chemoembolization radiofrequency ablation systemic chemotherapy radiation therapy investigational agents combined modality therapy intra-arterial chemotherapy genetic testing/counseling.

Patients Appropriate for Referral:
- Patients with cancers of the GI tract, bile ducts, liver and pancreas

GASTROINTESTINAL ONCOLOGY RELATED PROGRAMS

Wound/Ostomy Care

Patient Scheduling:
617-632-8185
617-632-7874

See program description under the Surgery Tab.

Pancreas Center

Patient Scheduling:
617-667-5576

See program description under the Surgery Tab.

GENITOURINARY ONCOLOGY

The Genitourinary Oncology Program offers a full range of diagnostic and treatment services for all types of genitourinary cancers including prostate, bladder and kidney cancers. There is a multidisciplinary Prostate Cancer Clinic at which a patient newly diagnosed with carcinoma of the prostate sees all the relevant specialists involved in his care (urology, radiation oncology, medical oncology, pathology and radiology) who review test results, develop a comprehensive treatment plan, and discuss the plan with the patient. In addition, a large multidisciplinary program in renal cancer brings together urologists and oncologists to provide state-of-the-art care for all stages of kidney cancer and offers a broad array of novel investigational therapies.

GENITOURINARY ONCOLOGY RELATED PROGRAMS

Prostate Implant Program

Patient Scheduling:
617-667-4726

See program description under the Radiation Oncology Tab.

GYNECOLOGIC ONCOLOGY

Medical Oncology: 617-667-4283 Surgical Oncology: 617-667-4040 The division of gynecologic oncology offers a full range of consultative and treatment services for the management of gynecologic tumors, including those of the vulva, cervix, uterus and ovary. The colposcopy unit is designed to evaluate patients with abnormal Pap smears and DES exposure. The latest therapeutic modalities are available including radical pelvic surgery, advanced reconstructive procedures and laparoscopic surgery. In addition to standard chemotherapy, cutting-edge clinical trials employing novel anti-neoplastic agents, anti-angiogenic and other biological strategies are available to appropriate patients.
The Head and Neck Oncology Program provides a full range of consultative services for the diagnosis and treatment of cancers of the head and neck region. Coordination between surgery, radiation oncology and medical oncology occurs at all levels of care, but especially during the time of presentation, staging and formulation of a clinical plan. Conventional therapies for these diseases are provided along with clinical trials, the purpose of which is to improve therapeutic outcomes.

Beth Israel Deaconess Medical Center offers special expertise for patients with a range of hematologic diseases, including coagulation problems, anemias, hemochromatosis, myelodysplasia leukemias, lymphomas and multiple myeloma.

The Hematologic Malignancies and Bone Marrow Transplantation Program is comprised of a team of specialists expert in malignant blood disorders such as leukemias, lymphomas and multiple myeloma, as well as bone marrow transplantation. The program is accredited for autologous and allogenic transplantation by The Foundation for the Accreditation of Cellular Therapy (FACT). It also received approval from the National Marrow Donor Program (NMDP) to participate as an NMDP transplant center. Under the direction of the department of pathology, a clinical stem cell laboratory has been established that functions as an integral component of the transplantation service for manipulating hematopoietic stem cells prior to their return to the patient. An active research and clinical program incorporates the use of post-transplant immunotherapy to rid the body of malignant cells that survive chemotherapy. Innovative treatment protocols involve the development of tumor vaccines that train the immune system to recognize and reject tumor cells. The outpatient clinical facilities are state-of-the-art, and are used exclusively by patients of the Hematologic Malignancies Program. The inpatient facility is a dedicated bone marrow transplant patient care center. The units are staffed by highly skilled nurses who are certified in the administration of chemotherapy and have broad experience with general hematology/oncology patient care and the administration of standard treatment and research protocol. The bone marrow transplantation team is comprised of attending physicians board-certified in hematology and oncology, nurse practitioners, nurse coordinators, licensed social workers, research coordinators, senior administration, administrative assistants, stem cell laboratory staff, a stem cell lab medical director and clinical laboratory technicians.

Patients Appropriate for Referral:
- Patients with malignant blood disorders such as leukemias, lymphomas and multiple myeloma
- Patients who require bone marrow transplantation

The Hemostasis and Thrombosis Program is focused on the treatment of bleeding and thrombotic disorders. Hematologists with a special interest in disorders of blood coagulation diagnose and manage patients with acquired and hereditary disorders (e.g., hemophilia) and thrombotic diseases that cause deep venous thrombosis and pulmonary embolism.

The Sarcoma Program is a multidisciplinary program that provides comprehensive care to patients with soft tissue and bone sarcomas. Patients are evaluated by a multidisciplinary team of medical, radiation and orthopaedic oncologists who coordinate the complex care needs of this patient group. Special expertise is provided in limb-sparing surgery, radiation therapy and the latest in clinical trials as well as conventional (standard) therapies.

Beth Israel Deaconess Medical Center’s multidisciplinary skin cancer services include excision of benign and malignant lesions, Mohs’ Micrographic Surgery for selected skin cancers, reconstruction following cancer surgery, and laser treatment of vascular and pigmented lesions.
Patients Appropriate for Referral:
- Patients who have malignant melanoma, cutaneous lymphomas and pseudolymphomas, and other cutaneous malignancies

Intravascular Brachytherapy Program
Patient Scheduling:
617-CARDIAC
617-227-3422

See program description under the CardioVascular Institute (CVI) Tab.

Hospital Medicine
Hospital medicine at Beth Israel Deaconess Medical Center is staffed by physicians who specialize in caring for the general medicine hospitalized patient. This hospital-based focus allows these physicians to gain in-depth knowledge and understanding of each patient’s condition, as well as his/her unique psychosocial needs. Ongoing communications regarding a patient's condition and progress with referring physicians is a key element of the program.

Bidmc Hospitalists
Monday through Friday, 8 a.m. to 5 p.m.: 617-754-4677 (754-HOSP) After-hours page: 617-632-7243 (632-PAGE), Pager 9-4677 (9-HOSP) The Beth Israel Deaconess Medical Center Hospital Medicine Program is staffed by Harvard faculty physicians who specialize in the care of the hospitalized patient. As one of the first hospital medicine programs in the country, BIDMC hospitalists have extensive experience caring for acutely ill patients while providing a supportive and patient centered model of care. They understand how important communication between hospitalists and outpatient providers is, and are committed to providing timely updates on every patient’s progress, as well as complete discharge planning and follow-up. A Beth Israel Deaconess Medical Center hospitalist is available to referring physicians and hospitalized patients 24 hours a day, seven days a week.

APG Hospitalists
617-632-PAGE (632-7243) and request the APG hospitalist on call at beeper: APG Hospitalists at BIDMC: 38500 APG Hospitalists at BID-Needham: 97824 Administrative Office phone: 617-754-0744 The Affiliated Physicians Group (APG) Hospital Medicine Program is staffed by Harvard Medical Faculty Physicians and performs inpatient services for community practice physicians in APG, Needham-affiliated physicians and private practitioners. This service began in 1998. The current program is staffed by physicians who trained at Beth Israel Deaconess Medical Center, and several were experienced primary care doctors prior to becoming hospital specialists. An APG hospitalist is available to referring physicians and hospitalized patients 24 hours a day, seven days a week. The weekends are covered by APG Hospitalists at BIDMC. APG hospitalists also provide care at Milton Hospital, which is affiliated with BIDMC, and Good Samaritan Medical Center in Brockton.

Infectious Disease
The division of infectious disease provides consultative services to hospitalized and non-hospitalized patients. Inpatient services are provided on an emergency basis when necessary and within 24 hours of the request. Outpatient consultative services are provided five days per week. A Travel Medicine Clinic is also available for pre- and post-travel needs. In addition to general infectious disease consultative services, infectious disease subspecialty physicians provide consultative as well as primary care for HIV-infected persons. The division has very active National Institutes of Health (AIDS Clinical Trials Group) and industry-funded research programs that provide cutting-edge investigative therapies for patients with HIV, as well as other opportunities to participate in major therapeutic trials focused on HIV and various complications of AIDS. In addition, through a variety of research projects, the division makes available new antibacterial and antifungal agents for patients with special needs.
### HIV Clinic

**Patient Scheduling:**
617-632-7706

The HIV Clinic, established in the early 1980s, was one of the first medical establishments to specialize in this disorder. The clinic has more than 20 physicians who are experienced with the manifestations, treatment and complications of HIV infection. Clinic physicians, all of whom have infectious disease/HIV training, are experienced in using HIV genotype and phenotype to develop regimens to salvage patients with failing antiretroviral therapy, as well as treating unusual opportunistic infections, complications and immune deficiencies. Physicians provide primary care for patients with HIV infection and consultative care, working along with the patient’s primary care physician. Social workers are available in the clinic, and referrals to subspecialists in all fields of medicine, surgery and psychiatry are also available. The medical center participates in the AIDS Clinical Trials Group protocols and other investigational studies being done to further knowledge about HIV infection. All studies are available to patients who wish to participate. Educational materials concerning various aspects of healthcare for those with HIV infection also are available to patients and their families.

**Patients Appropriate for Referral:**
- Patients who have HIV, particularly those with failing antiretroviral regimens or complicating infections

### Infectious Disease Clinic

**Patient Scheduling:**
617-632-7706

Our physicians have particular expertise in bacterial, mycobacterial, viral and parasitologic infections. Specialists provide evaluation and management for patients with any infectious disease problem, including Lyme disease, fever of unknown origin, surgical site infections, endocarditis, bone and joint infections, and infection in immunocompromised patients. Consultations usually are requested by the patient’s primary care physician, with whom we coordinate care. We also provide follow up for the duration of the active infectious problem. Patients hospitalized at BIDMC with complex infections can be referred to the ambulatory practice for management of their infection after discharge. Ideally, to facilitate ambulatory care, these patients should be seen in consultation by the inpatient infectious disease consult team prior to discharge from the hospital. Patients in ambulatory care or hospitalized at sites other than BIDMC with complex infections can be referred for continuing care or second opinions. This is ideally facilitated by providing appropriate medical records to the clinic physician prior to the scheduled appointment. Coverage for emergent issues is available 24 hours a day, seven days a week.

**Patients Appropriate for Referral:**
- Patients with all types of infections

### Infectious Disease/Oncology Dysplasia Clinic

**Patient Scheduling:**
617-632-7706

The Infectious Disease/Oncology Dysplasia Clinic offers education, screening and treatment of disorders associated with the human papillomavirus (HPV), the virus that is associated with warts, anogenital precancer (dysplasia) and cancer. Patients at risk for anogenital dysplasia and cancer are those with a history of genital warts, a history of HPV infection or other immunocompromised states, men who have sex with men, and a history of an abnormal anal or cervical Pap smear. Staff include infectious disease physicians, hematologist/oncologists, surgeons, nurses and pathologists. Services include: screening for anogenital human papillomavirus (HPV) infection screening for anal dysplasia by anal Pap smear; anal video colposcopic exam and biopsy to assess for precancerous or cancerous lesions; appropriate therapy or referral based on test results; and follow-up examinations.

**Patients Appropriate for Referral:**
- Persons at risk for anogenital dysplasia and cancer who desire screening
- Persons who have had an abnormal anal Pap smear
- Persons with genital warts

### Travel Clinic

**Patient Scheduling:**
617-632-7740

The Travel Clinic specializes in pre-travel counseling and immunization. The traveler’s visit begins with a careful evaluation of their itinerary and medical history. The traveler is then counseled on topics that may include: prevention of mosquito and insect-borne illnesses; food and water precautions; treatment of commonly encountered bacterial diseases; and altitude sickness. Vaccines are then administered as deemed appropriate. These may include routine immunizations against diseases such as polio, tetanus/diphtheria, measles/mumps/rubella, streptococcal pneumonia, hepatitis B and varicella, or specialty vaccines against diseases such as yellow fever, Japanese encephalitis, hepatitis A, typhoid, meningitis and rabies. The visit to the Travel Clinic should optimally occur at least four weeks prior to departure. Self-pay and insurance carriers are welcome. Appropriate referrals from primary care providers and prior authorization should be obtained before the actual appointment. Note that not all services may be covered by insurance carriers and may be the responsibility of the traveler.

**Patients Appropriate for Referral:**
- Any person who plans to travel outside of the United States

INTERNAL MEDICINE AND PRIMARY CARE

800-667-5356 Beth Israel Deaconess Medical Center is proud to offer a wide variety of primary care practices to meet all of patients' needs. All primary care physicians are on staff at BIDMC and have access to our full range of specialty services and state-of-the-art medical technology. Our primary care practices include more than 100 internists and family physicians, with practice sites in Boston, Braintree, Brighton, Brookline, Cambridge, Chelsea, Chestnut Hill, Dorchester, Jamaica Plain, Lexington, Newton, Roxbury, Sharon and Winthrop. Healthcare Associates, the hospital-based primary care practice, is staffed by over 60 full-time department of medicine faculty and operates out of the Carl J. Shapiro Clinical Center.

PRIMARY CARE PROGRAMS

Ethics Support Service

Patient Scheduling:
617-667-7467

The Ethics Support Service is available 24 hours a day, seven days a week to help any Beth Israel Deaconess staff member, patient or family member who is confronting a clinical situation that raises ethical issues. Assistance with a specific case may range from an informal telephone conversation to the involvement of a three- to four-person multidisciplinary consult team that meets with staff, patients and families to help resolve conflicts. Ethical issues exist when two or more important values seem to be in conflict. For example: a patient's welfare vs. a patient's right to decide about his or her treatment; the goal of extending life vs. the goal of ensuring comfort; the preference of family members that information be withheld from a patient vs. a patient's right to know; or a patient's right to the best available treatment vs. financial pressures to contain cost.

Patients Appropriate for Referral:
- Patients, family members or staff who are facing an ethical issue related to clinical care

Palliative Care Consultation Service

Patient Scheduling:
617-667-1320

The Palliative Care Consultation Service provides comprehensive, interdisciplinary support for patients with life-threatening illness, these patients' family members, and the clinical staff caring for these patients. Services include: assistance with symptom management (pain, nausea, constipation, anorexia, dyspnea, depression, etc.); facilitation of discussions regarding end-of-life care issues (Health Care Proxy, Advanced Directives, resuscitation status, comfort care, etc.); and guidance and support regarding transitions to hospice, home care and other facilities. Bereavement support groups for family members and staff also are available.

Patients Appropriate for Referral:
- Patients with life-threatening illnesses, these patients' family members and clinical staff members who are caring for these patients
- Bereaved family members and staff

AFFILIATED PHYSICIANS GROUP

Beth Israel Deaconess HealthCare (APG) is a network of highly skilled, community-based physicians affiliated with Beth Israel Deaconess Medical Center in Boston and Beth Israel Deaconess Hospital-Needham. Beth Israel Deaconess HealthCare provides patients with a continuum of care throughout the life cycle. As an organization, BIDHC comprises comprehensive hospital medicine and sub-acute care programs as well as 30 primary care and family medicine practices throughout the Boston area and the surrounding communities including: Boston, Bridgewater, Brighton, Brockton, Brookline, Chelsea, Chestnut Hill, Dedham, Easton, Jamaica Plain, Lexington, Medfield, Milton, Needham, Norwell, Quincy, Sharon and West Roxbury.
**MEDICINE**

**COMMUNITY HEALTH CENTERS**

Beth Israel Deaconess Medical Center is affiliated with six community health centers. Bowdoin Street Health Center is owned and operated by the medical center.

**HEALTHCARE ASSOCIATES**

617-667-9600 Healthcare Associates (HCA) is the academic, hospital-based primary care teaching practice of Beth Israel Deaconess Medical Center. Staffed by 64 faculty physicians, 12 nurse practitioners and a large cadre of support personnel, HCA provides comprehensive, personalized primary care to 39,000 patients in four suites in the Carl J. Shapiro Clinical Center. Unique among primary care practices in Boston, HCA provides integrated mental health services - counseling by experienced licensed clinical social workers within the practice - and psychopharmacology referrals. HCA also supports a dedicated and responsive Anticoagulation Service, Primary Care HIV Service, Women’s Health Service and College Health Service.

**HEALTHCARE ASSOCIATES PROGRAMS**

**College Health Program**

**Patient Scheduling:**

617-667-9627

The College Health Program in Healthcare Associates works with local colleges and universities that seek assistance from the medical center in providing appropriate clinical services to their students. Services include identifying individual Beth Israel Deaconess Medical Center specialty providers who are available for referrals from student health services, facilitating communication between student health services and the medical center, assisting with staffing and providing student health service management. The College Health Program currently assists in providing primary care services to students of the following colleges and universities: Brandeis University, Emmanuel College, New England Conservatory and Simmons College.

**Primary Care HIV Service**

**Patient Scheduling:**

617-667-9600

Healthcare Associates offers a designated HIV program within its adult primary care practice. Comprehensive and coordinated primary medical care is provided by a multidisciplinary clinical team consisting of primary care providers, infectious disease specialists, nurse practitioners, psychiatrists, clinical social workers and HIV case managers. During the initial appointment, the patient undergoes a complete assessment by a primary care physician, infectious disease specialist and an HIV case manager. At this appointment, the patient is also referred for any necessary specialty care. **Patients Appropriate for Referral:**

- Patients who are HIV+

**WOMEN’S HEALTH CENTER**

The Women’s Health Center provides comprehensive health services for women at all stages of life. Its multidisciplinary team of general internists, nurse practitioners, social workers and health educators provide state-of-the-art services that include preventive care, treatment and a broad range of educational programs designed especially for women. In addition, the Women’s Health Center offers medical consultation on a variety of topics of particular interest to women including weight loss, menopause management, sexual difficulties and cancer survivorship. Clinicians at the Women’s Health Center work closely with specialists to provide seamless care for women within Beth Israel Deaconess Medical Center. **Patients Appropriate for Referral:** Women age 18 and older

**NEPHROLOGY**

Division Chief: Dr. Robert S. Brown The division of nephrology at Beth Israel Deaconess Medical Center provides clinical consultation for renal disease, renal and pancreas-renal transplantation, hypertension, disorders of water and electrolyte metabolism, and disturbances in calcium, phosphorus and magnesium. Renal outpatients are seen every day, and new patients are scheduled in a renal access clinic each week to be seen within 48-72 hours of referral. Members of the division participate in joint outcome sessions with other departments on kidney stone disease (urology) and medical complications of pregnancy (obstetrics & gynecology). Kidney and pancreas transplantation clinics are held jointly with other members of the Transplant Institute, including transplant surgery, behavioral health, nurse coordinators and dieticians. The division operates an inpatient dialysis unit that carries out acute hemodialysis of inpatients and directs a chronic dialysis center that performs outpatient hemodialysis and home peritoneal dialysis. Patients with kidney disease requiring dialysis are seen for vascular or peritoneal access at the Transplant Institute and at our outpatient site, the Advanced Vascular Care Center (AV Care) in Brighton. The renal section at Joslin Diabetes Center is fully integrated with the BIDMC nephrology division and focuses primarily on diabetic kidney disease. The Joslin renal section has expertise in slowing progression and treating complications of diabetic kidney disease in addition to managing all other types of kidney disease as well. Patients with diabetes are seen in outpatient clinics, as inpatient consultations, and when requiring dialysis, kidney transplantation and/or pancreas transplantation.
The pulmonary, critical care and sleep medicine division’s clinical programs focus on the evaluation and management of a wide variety of conditions including asthma, chronic obstructive lung disease, interstitial lung disease and thoracic neoplasms. A full range of diagnostic studies are available including routine and specialized physiologic testing (e.g., methacholine challenges, hypoxic altitude simulation tests and cardiopulmonary exercise studies), fiberoptic bronchoscopy, pleuroscopy and other biopsy procedures. A number of multidisciplinary programs bring state-of-the-art therapy to patients with thoracic tumors, asthma, COPD, pulmonary hypertension, interstitial lung diseases, sleep disorders, complex airway problems and pleural diseases.

**GENERAL PULMONARY**

Patient Scheduling: 617-667-LUNG (617-667-5864) Pulmonologists and other specialty physicians at Beth Israel Deaconess Medical Center work within a number of multidisciplinary programs that focus on evaluation and management of diseases of and conditions related to the lungs including asthma, bronchitis, chest X-ray abnormalities, COPD, cough, emphysema, interstitial lung disease, lung nodule, pneumonia and shortness of breath.

**GENERAL PULMONARY PROGRAMS**

**General Pulmonary**

Patient Scheduling: 617-667-LUNG  
617-667-5864

Pulmonologists focus on evaluation and management of diseases of and conditions related to the lungs including asthma, bronchitis, chest x-ray abnormalities, COPD, cough, emphysema, interstitial lung disease, lung nodule, pneumonia and shortness of breath.

**Asthma and Dyspnea Center**

Patient Scheduling:

617-667-LUNG  
617-667-5864

The Asthma and Dyspnea Center is a multidisciplinary unit for the evaluation and treatment of patients with shortness of breath. This center specializes in the diagnosis and treatment of patients with asthma, emphysema and breathlessness of unclear cause. Patients undergo comprehensive interdisciplinary assessment, including medical and rehabilitative evaluation, exercise testing, postural/musculoskeletal evaluation, disability/functional limitation assessment, evaluation for the need for supplemental oxygen, and optimization of prescription medications. Patients receive individualized treatment programs to achieve symptom reduction and improve functional capacity. Staff includes pulmonologists, pulmonary fellows and physical therapists specializing in cardiopulmonary care.

**Patients Appropriate for Referral:**

- Patients with shortness of breath of unclear cause
- Patients with asthma that is difficult to control
- Patients with emphysema and declining exercise capacity
- Patients being considered for supplemental oxygen therapy

**Interstitial Lung Center**

Patient Scheduling:

617-667-LUNG  
617-667-5864

The Interstitial Lung Disease Center is one of the premier programs in New England devoted to the management of patients with interstitial lung disease. The center focuses on diagnosis and management of interstitial disease with novel therapies available to eligible patients through multi-center clinical trials for diseases such as IPF (interstitial pulmonary fibrosis), sarcoidosis and usual interstitial pneumonia. The center is staffed by pulmonary specialists, radiologists, thoracic surgeons and pathologists who work together to diagnose and treat patients.

**Patients Appropriate for Referral:**

- Patients who have any form of interstitial lung disease

**Pulmonary Hypertension Center**

Patient Scheduling:

617-667-LUNG  
617-667-5864

The Pulmonary Hypertension Center at Beth Israel Deaconess Medical Center provides a state-of-the-art, multidisciplinary approach to the evaluation and treatment of pulmonary hypertension and other pulmonary vascular diseases. Specialists in a number of disciplines, including pulmonary medicine, cardiology, radiology, and nursing collaborate to provide comprehensive services for patients with pulmonary hypertension and their families. The latest therapies for primary pulmonary hypertension are offered.

**Patients Appropriate for Referral:**

- Patients with pulmonary vascular disease and their families

### MEDICAL CRITICAL CARE

The medical critical care service provides specialized intensive care services for medical patients with a broad range of critical illnesses. The patient care team is directed by a board-certified intensivist. An ICU attending physician is available in hospital, 24 hours a day, seven days a week to coordinate care of the critically ill and to facilitate transfers. Patients appropriate for referral include those who have acute respiratory failure, ARDS, severe pneumonia, severe asthma, GI or liver disease, and sepsis. To arrange for patient transfer, call 617-632-7243, page number 92466 at any time to speak with the nursing bed facilitator who will coordinate the transfer.

### SLEEP MEDICINE

617-667-LUNG (667-5864) The pulmonary, critical care and sleep medicine division provides comprehensive diagnostic and therapeutic services for the complete spectrum of sleep disorders through the Beth Israel Deaconess Sleep Disorders Center. Members of the division oversee state-of-the-art clinical and sleep laboratory evaluations of patients with excessive sleepiness, circadian disorders and sleep disruption. Beth Israel Deaconess is recognized nationally for excellence in treating breathing disorders in sleep, and all treatment modalities, from nasal, CPAP and bi-level therapy to oral appliances and surgery. A program of nocturnal ventilation is coordinated with the Neuromuscular Disorders Program. Patients Appropriate for Referral: Patients with sleep complaints including disorders of excessive sleepiness (sleep apnea, narcolepsy, periodic movements in sleep) and disorders of the initiation and maintenance of sleep (insomnia)
**Sleep Disorders Center**

**Physician Referral:**
617-667-5864

The Sleep Disorders Center at Beth Israel Deaconess Medical Center is one of the premier sleep disorders centers in the United States. The center was the first center in Massachusetts accredited by the American Academy of Sleep Medicine. In addition, it remains one of the busiest sleep centers in New England. The Center is jointly staffed by attending physicians from the Division of Pulmonary, Critical Care and Sleep Medicine as well as the Department of Neurology at Beth Israel Deaconess Medical Center, and supports the training of sleep medicine fellows in the center’s ACGME-accredited fellowship program. The center maintains the full spectrum of diagnostic testing modalities including: Overnight in-laboratory polysomnography (diagnostic and titration polysomnography for treatment of obstructive sleep apnea; specialized protocols for treatment of central sleep apnea and patients with neuromuscular disease and nocturnal hypoventilation; seizure montage; parasomnia montage); multiple sleep latency testing; maintenance of wakefulness testing; suggested immobilization testing (SIT) for evaluation of Restless Legs Syndrome; actigraphy; dim light melatonin onset testing. Comprehensive education and care of patients as well as close follow up of treatment responses are at the core of the Center’s mission. Evaluation and treatment of sleep-related breathing disorders includes initiation of positive airway pressure therapy supported by regular monitoring of compliance data and on-site mask fitting sessions. Evaluation for dental appliances and surgical interventions are also employed when indicated. The Sleep Disorders Center hours are 8:00am – 5:00pm, Monday-Friday. Our clinic is located in the Shapiro Clinical Center, East Campus. To make an appointment in the Sleep Disorders Center at Beth Israel Deaconess Medical Center or to refer a patient for evaluation or treatment please call (617) 667-5864.

**Patients Appropriate for Referral:**
- sleep-related breathing disorders
- insomnia
- narcolepsy
- restless legs syndrome
- circadian rhythm disturbances
- parasomnias
- periodic limb movements of sleep

---

**RHEUMATOLOGY**

617-632-8658 The rheumatology division maintains an active outpatient clinical practice and an inpatient consultation service for patients with rheumatic diseases. All of the full-time members of the division provide care based on a model in which each physician is responsible for personalized continuity care for their own patients. The individualized service provided to patients and referring physicians by the administrative and physician staff is in large part responsible for the growth and expansion of outpatient clinical practice. The division is a major referral center for patients with systemic lupus erythematosus, refractory rheumatoid arthritis, hereditary periodic febrile syndromes (such as Familial Mediterranean Fever), scleroderma, polychondritis and vasculitis. In addition to expertise in the common rheumatic disorders such as gout, osteoarthritis and the spondyloarthropathies, several division members have special interest and training in osteoporosis. An exciting new development in the rheumatology division is the establishment of the Lupus Center of Excellence.

<th>NEONATOLOGY</th>
</tr>
</thead>
</table>
| Department Chief: Dr. Dewayne Pursley  
617-667-4042 The department of neonatology provides medical oversight for all infants born at Beth Israel Deaconess Medical Center. The department also provides and coordinates medical care including high-frequency ventilation, nitric oxide therapy, and a full range of pediatric subspecialty services for high-risk newborns in the neonatal intensive and intermediate care units. Attending neonatologists are on site 24 hours a day and work collaboratively with the maternal-fetal medicine staff to provide comprehensive high-risk antepartum care and counseling. Beth Israel Deaconess neonatologists also provide care in the Children’s Hospital NICU and several community hospital special care nurseries. The department staff is available for the hospital care of healthy newborns whose primary pediatric providers do not have privileges at the medical center. |

NEUROLOGY

General Neurology 617-667-3090
Behavioral Neurology 617-667-4074
Epilepsy Center 617-622-8930
Sleep Disorders Clinic 617-667-3237
Stroke Center 617-632-8911
The department of neurology provides comprehensive inpatient and outpatient neurological services. The department includes 15 specialty areas.

GENERAL NEUROLOGY

BIDMC 617-667-3090
Chelsea 617-660-7000
Lexington 781-672-2350
The division of general neurology provides a full range of inpatient and outpatient neurological services.

AUTONOMIC DISORDERS

The Center for Autonomic and Peripheral Nerve Disorders provides evaluation and treatment services for inpatients and outpatients with autonomic and peripheral nerve disorders. Suitable referrals to the center include patients with orthostatic hypotension, syncope, disorders of sweating, autonomic complications of neurodegenerative disorders such as Parkinson's disease, diabetic and other small fiber peripheral neuropathies.

BEHAVIORAL NEUROLOGY

The Behavioral Neurology Unit is an outpatient specialty clinic that provides diagnosis, treatment and education for patients.

BEHAVIORAL NEUROLOGY PROGRAMS

**DriveWise: A Driving Fitness Evaluation Program**

**Patient Scheduling:**
617-667-4074

The DriveWise Program offers an objective evaluation of driving safety for people of all ages, including those who have experienced neurological, psychological and/or physical impairments. DriveWise uses a comprehensive, multidisciplinary team approach to assess driving safety. An evaluation includes:

- Social Work Assessment: The participant is introduced to the program by a clinical social worker, who takes a detailed driving history.
- Occupational Therapy Assessment: Cognitive skills, functional vision, mobility and brake reaction time are measured during the occupational therapy session.
- Road Test: Actual driving performance and safety are evaluated during a road test administered by a certified driving instructor and the occupational therapist in a specially equipped car.

**Written Summary:** Results are shared by letter with the participant and his/her physician. If the participant is not safe to drive, alternative transportation resources are identified. Every effort is made to allow the participant to maintain his/her independence.

**Patients Appropriate for Referral:**
- Patients who have experienced neurological, psychological and/or physical impairments

CEREBROVASCULAR/STROKE

Beth Israel Deaconess Medical Center’s cerebrovascular/stroke service offers: outpatient evaluations; emergency consultations and inpatient consultations for patients with stroke due to occlusion of cerebral blood vessels or to intracranial hemorrhage; new experimental therapies for stroke prevention; and treatment and new diagnostic and functional neuroimagery procedures. Staff members also provide second opinions concerning surgery for carotid or intracranial vascular disorders.

EPILEPSY

The Comprehensive Epilepsy Center at Beth Israel Deaconess Medical Center offers diagnostic evaluations, medical management and medication trials for patients with epilepsy, particularly intractable epilepsy. The first program of its kind in Massachusetts, its staff includes neurologists, neurology fellows, neurosurgeons, neuropsychologists, psychiatrists, engineers, epilepsy nurse specialists, EEG nurse specialists and social workers. The center is affiliated with other Beth Israel Deaconess neurology specialties, including behavioral neurology, neuroendocrinology and neuroradiology.

GENETIC DISORDERS

The neurogenetics division at Beth Israel Deaconess Medical Center provides clinical care and genetic counseling services to individuals who suffer from, or think they may be at risk for, genetic diseases that affect the brain, muscles and nerves. The division provides particular expertise in epilepsy, muscle and nerve diseases, visual disorders, degenerative disorders, neuropathies and mitochondrial disorders. Patients appropriate for referral include those with cerebellar degeneration, familial epilepsies and neuropathies, muscular dystrophies and neurofibromatosis.

HIV NEUROLOGY

The HIV/Neurology Center offers comprehensive care for acute and chronic neurological problems in people with HIV.
**DEPARTMENT OF NEUROLOGY**

**MOVEMENT DISORDERS**

Patient Scheduling: 617-667-0519

An outpatient service devoted to the diagnosis and treatment of patients with movement disorders, the movement disorders service provides comprehensive care ranging from neurological evaluation to trials of new medications, injections of botulinum toxin, and innovative surgical procedures — including pallidotomy guided by microelectrode recording. Staff include neurologists, neurosurgeons and a research nurse with expertise in movement disorders. These individuals work together with a multidisciplinary team of physicians and allied health professionals to provide specialized care to patients with these conditions. Patients appropriate for referral include those with movement disorders such as Parkinson’s disease, parkinsonian syndromes, tremors, gait disorders, chorea and drug-induced movement disorders.

**MULTIPLE SCLEROSIS**

The multiple sclerosis service offers diagnostic evaluation, treatment and education for patients with multiple sclerosis. Staff members also are engaged in research on improving the diagnosis and management of the disease. Patients appropriate for referral include those with multiple sclerosis or related demyelinating disorders.

**NEUROMUSCULAR DISEASE**

The neuromuscular disorders service offers evaluation of and treatment for neuromuscular disorders such as neuropathies, ALS, nerve palsies, plexopathies, myopathies, muscular dystrophies, myasthenia gravis, myotonia and radiculopathies. Physicians are all subspecialty trained in neuromuscular disease and electromyography/clinical neurophysiology. They perform electrophysiologic testing in a state-of-the-art EMG lab to confirm diagnosis, as well as neurogenic testing for patients with degenerative disorders.

**NEURO-ONCOLOGY**

Neuro-oncology offers multidisciplinary evaluation and comprehensive treatment of cancer patients. Staffed by neuro-oncologists, neurosurgeons, oncologists and radiation oncologists, the service provides state-of-the-art surgical treatment modalities and diagnostic facilities. In addition, the neuro-oncology section provides consultation for the diagnosis and management of neurological disorders related to cancer including complications related to chemotherapy and radiation therapy. Referred patients are assessed initially by a neuro-oncologist. When necessary, additional diagnostic studies or consultations with subspecialists, such as neurosurgeons or radiation oncologists, can be performed at the medical center after discussion with referring physician, or can be arranged directly by the referring physician. For patients unable to travel to Boston, a second option can be provided. Patients appropriate for referral include those with neurological disorders, neurological complications, and brain or spinal cord tumors — including primary gliomas and metastases to the nervous system.

**NEURO-ONCOLOGY RELATED PROGRAMS**

**Brain Tumor Center**

Patient Scheduling:

617-667-1665

See program description under the Surgery Tab.

**SLEEP DISORDERS**

Sleep Disorders Center The Sleep Disorders Center at Beth Israel Deaconess Medical Center is one of the premier sleep disorders centers in the United States. The center was the first center in Massachusetts accredited by the American Academy of Sleep Medicine. In addition, it remains one of the busiest sleep centers in New England. The Center is jointly staffed by attending physicians from the Division of Pulmonary, Critical Care and Sleep Medicine as well as the Department of Neurology at Beth Israel Deaconess Medical Center and supports the training of sleep medicine fellows in the center’s ACGME-accredited fellowship program. The Center treats adult patients with the full range of sleep disorders including: • sleep-related breathing disorders • insomnia • narcolepsy • restless legs syndrome • circadian rhythm disturbances • parasomnias • periodic limb movements of sleep. The center maintains to the full spectrum of diagnostic testing modalities including: • Overnight in-laboratory polysomnography • diagnostic and titration polysomnography for treatment of obstructive sleep apnea • specialized protocols for treatment of Central sleep apnea Patients with neuromuscular disease and nocturnal hypoventilation • seizure montage • parasomnia montage • Multiple Sleep Latency Testing • Maintenance of Wakefulness Testing • Suggested Immobilization Testing (SIT) for evaluation of Restless Legs Syndrome • Actigraphy • Dim Light Melatonin Onset Testing Comprehensive education and care of patients as well as close follow up of treatment responses are at the core of the Center’s mission. Evaluation and treatment of sleep-related breathing disorders includes initiation of positive airway pressure therapy supported by regular monitoring of compliance data and on-site mask fitting sessions. Evaluation for dental appliances and surgical interventions are also employed when indicated. The Sleep Disorders Center hours are 8:00AM – 5:00PM Monday through Friday. Our clinic is located in the Shapiro Clinical Center, East Campus. To make an appointment in the Sleep Disorders Center at Beth Israel Deaconess Medical center or to refer a patient for evaluation or treatment please call (617) 667-5864.

**NEUROPATHOLOGY**

The division of neuropathology provides various diagnostic services including preparation and interpretation of neck and nerve biopsies, interpretation of brain biopsies, and clinical pathological correlations on brains removed at autopsies.

**NEUROREHABILITATION**

Staff of the neurorehabilitation program are trained in both neurology and rehabilitation medicine, allowing them to integrate modalities of treatment from physical therapy, occupational therapy, speech therapy and other areas to provide the optimal management of patients with neurological disabilities. Patients appropriate for referral include those who have neurological impairments and require continued care to reach their maximum functional recovery.

**SUGGESTED IMMobilIZATION TESTING (SIT)** for evaluation of Restless Legs Syndrome • Actigraphy • Dim Light Melatonin Onset Testing Comprehensive education and care of patients as well as close follow up of treatment responses are at the core of the Center’s mission. Evaluation and treatment of sleep-related breathing disorders includes initiation of positive airway pressure therapy supported by regular monitoring of compliance data and on-site mask fitting sessions. Evaluation for dental appliances and surgical interventions are also employed when indicated. The Sleep Disorders Center hours are 8:00AM – 5:00PM Monday through Friday. Our clinic is located in the Shapiro Clinical Center, East Campus. To make an appointment in the Sleep Disorders Center at Beth Israel Deaconess Medical center or to refer a patient for evaluation or treatment please call (617) 667-5864.

The department of obstetrics and gynecology provides complete obstetric and gynecology services. The department includes eight divisions in all specialty areas. Office locations include Boston, Brookline, Burlington, Cambridge, Chelsea, Chestnut Hill, Dorchester, Lexington, Medford, Milton, Needham, Newton, Roxbury, Wellesley and West Roxbury.

### OBSTETRICS AND GYNECOLOGY PROGRAMS

#### Genetics

**Patient Scheduling:**
617-667-7110

The Clinical Genetics Program offers comprehensive perinatal genetics services including genetic counseling regarding risks associated with family history, advanced maternal age, abnormal ultrasounds, genetic screenings, maternal serum screenings, amniocentesis or CVS results, and teratogen exposures.

**Patients Appropriate for Referral:**
- Pregnant women and their families
- Non-pregnant patients who would like a consultation for family planning
- Patients who have a personal and/or family history of cancer

#### GYNECOLOGIC ONCOLOGY

Medical Oncology: 617-667-4283 Surgical Oncology: 617-667-4040

The division of gynecologic oncology offers a full range of consultative and treatment services for the management of gynecologic tumors, including those of the vulva, cervix, uterus and ovary. The colposcopy unit is designed to evaluate patients with abnormal Pap smears and DES exposure. The latest therapeutic modalities are available including radical pelvic surgery, advanced reconstructive procedures and laparoscopic surgery. In addition to standard chemotherapy, cutting-edge clinical trials employing novel anti-neoplastic agents, anti-angiogenic and other biological strategies are available to appropriate patients.

#### GYNECOLOGY

The gynecology division provides preventive and therapeutic health services for women. Preventive services include routine annual examinations with Pap smears, breast examinations and referrals for mammography, contraception management and menopause management. Therapeutic services include colposcopy for the evaluation of abnormal Pap smears, other diagnostic evaluations, and medical and surgical treatments for gynecologic problems such as menstrual irregularities, fibroids and pelvic organ prolapse. The division has special interest and expertise in vaginal hysterectomy, vaginal reconstructive surgery, and operative laparoscopy and hysteroscopy in addition to traditional gynecologic surgery. The division also provides urodynamics testing and surgical and medical treatment for urinary incontinence.

#### MATERNAL-FETAL MEDICINE

617-667-4507

Maternal-fetal medicine provides continuous care and consultation for women with high-risk pregnancies including patients with medical conditions such as hypertension, diabetes or heart disease; pregnancies complicated by conditions such as multiple gestation, fetal anomalies, intrauterine growth retardation, pregnancy-induced hypertension and preterm labor; and a history of pregnancy loss. A corresponding 40-bed neonatal intensive care unit provides specialized services for infants. The division offers specific programs to manage patients who have a history of mid-trimester loss, DES exposure or stillbirth. The perinatal service is staffed by maternal fetal medicine specialists and perinatal clinical nurses. The division has an active prenatal diagnosis service including first and second trimester screening by ultrasound, CVS and amniocentesis. In addition, there is a fully staffed antepartum testing unit that provides fetal heart rate testing, ultrasound, Doppler and cordocentesis.

### MATERNAL-FETAL MEDICINE PROGRAMS

#### Diabetes and Pregnancy Program

**Patient Scheduling:**
617-732-2496

The Joslin Diabetes and Pregnancy Program, which is a joint service of Beth Israel Deaconess Medical Center and the Joslin Clinic, brings together a team of professionals who specialize in diabetes—including physicians, nurse practitioners, nurse educators and nutritionists—to offer comprehensive diabetes and obstetric care and consultation services for women with diabetes. The team can supplement the care of referring obstetricians and endocrinologists or provide primary obstetric and endocrine care throughout pregnancy, and it works closely with other Beth Israel Deaconess and Joslin departments, such as ophthalmology, neonatology, nephrology and genetic counseling. Services ranging from pre-pregnancy planning to postpartum care are provided.

**Patients Appropriate for Referral:**
- Women with diabetes who are pregnant or who are preparing to become pregnant
### MINIMALLY INVASIVE GYN

617-667-4030 Gynecologic surgery includes an array of specialized services for comprehensive care of the diverse needs of women. The dept of obstetrics and gynecology includes cutting-edge gynecologic surgeons with specialized minimally invasive surgical (MIS) training for advanced MIS procedures. Hysteroscopic, laparoscopic or vaginal modes of surgery are minimally invasive options that can treat gynecologic conditions such as fibroids, pelvic pain, pelvic prolapse, urinary incontinence, ovarian cysts, menstrual disorders and other gynecologic issues. The advances in MIS allow for smaller (5mm-1cm) or no incisions, more outpatient/office procedures, fewer hospitalizations, quicker recoveries and shorter hospital stays. Incisionless tubal sterilizations performed in the office or operating room and total laparoscopic hysterectomies are examples of the many minimally invasive gynecologic surgeries being offered to women today.

### OBSTETRICS

The obstetrics and gynecology division provides comprehensive obstetrics and gynecologic services for women. Physicians practice at the main hospital and at locations in Boston, Brookline, Burlington, Cambridge, Chelsea, Chestnut Hill, Dorchester, Lexington, Medford, Needham, Newton, Roxbury, Wellesley and West Roxbury.

### REPRODUCTIVE ENDOCRINOLOGY

781-434-6400 The division of reproductive endocrinology and infertility offers comprehensive infertility and endocrinology services to women and men of reproductive age. The clinical services are provided by faculty members who have their clinical offices at Boston IVF, one of the most experienced and successful IVF centers in the United States. Services are available for the evaluation and treatment of a myriad of infertility and endocrine disorders. Patients appropriate for referral include couples with infertility due to both female and male causes such as: recurrent pregnancy loss; endometriosis; polycystic ovarian syndrome; and reproductive failure. The faculty are also expert in managing menstrual disorders and congenital anomalies of the reproductive tract. Infertility services include ovulation induction and intrauterine insemination (IUI), in vitro fertilization (IVF), intracytoplasmic sperm injection (ICSI) and preimplantation genetic diagnosis (PGD). Third-party reproductive services include sperm donation, oocyte donation and gestational carrier services. Boston IVF also offers fertility preservation for men and women with cancer who will be undergoing chemotherapy or radiation therapy and for women who are not currently attempting conception but who anticipate starting or adding to their families later in life. The on-site Domar Center for Mind/Body Health offers mind/body programs, acupuncture, massage, yoga, individual and couples counseling, and nutrition support.

### UROGYNECOLOGY

The division of urogynecology and pelvic reconstructive surgery offers comprehensive evaluation and treatment services for patients with pelvic organ prolapse, urinary dysfunction, and urinary and fecal incontinence. Cytoscopy and multichannel urodynamic testing can be performed in the office. All surgical and non-surgical treatment options are discussed with patients, their families and their primary care physicians. Consultations with urologic colleagues are readily available if necessary. Non-surgical therapies include biofeedback, pelvic muscle rehabilitation, vaginal pessaries and neuromodulation. Beth Israel Deaconess urogynecology surgeons are skilled in vaginal laparoscopic and abdominal surgery with an emphasis on a minimally invasive approach. The division is also actively involved in clinical research.

The Carl J. Shapiro Department of Orthopaedics offers an outstanding, full-service orthopaedic program that is among the best in New England. The department's superb team of highly qualified surgeons offers the most advanced orthopaedic services and technology available. The department offers a unique multidisciplinary, collaborative care model that includes musculoskeletal medicine and primary care sports medicine among its various disciplines. The department also offers: multidisciplinary care for senior patients and those with musculoskeletal tumors; the latest surgical options for upper extremity conditions; and novel minimally invasive techniques. Members of the orthopaedic team are proud of the high-caliber staff, the diversity and sophistication of clinical services, the research taking place in the active biomechanics laboratory, and the training opportunities available for residents. Equally important are the collaborative, long-term relationships with referring physicians.

### GENERAL ORTHOPAEDICS PROGRAMS

The Spine Center provides comprehensive, integrated, patient-centered care for all acute and chronic spine conditions. The center brings together specialists in neurosurgery, orthopaedic surgery, physical therapy, pain management, neurology, physical therapy and radiology. Team members collaborate within a model of care that involves the appropriate specialty at the appropriate time to yield the fewest interventional approaches and optimal recovery. Patients benefit from convenient locations and same-day coordination of multiple provider visits, leading to timely development and initiation of treatment plans. Evaluation encompasses: comprehensive musculoskeletal evaluation; comprehensive radiology imaging; EMG/nerve conduction studies; neurology evaluation; evaluation for inflammatory arthritis and discography. Leading-edge approaches to pain management include injections, pain medication consultation, spinal cord stimulators and radiofrequency ablation. Physical therapy approaches include manual therapy, strengthening, range-of-motion and core exercises, and aqua therapy. Spine Center surgeons have expertise in the most advanced surgical techniques including minimally invasive approaches and new technologies to treat conditions from the cervical to the lumbar spine.

**Patients Appropriate for Referral:**
- degenerative disease (lumbar and spinal stenosis, degenerative disc disease, herniated disc, osteoporosis and fragility/compression fractures of the spine, spondylolisthesis)
- myelopathy of the cervical and thoracic spine
- radiculopathy of the cervical, thoracic or lumbar spine
- tumors of the spine and spinal cord
- spinal deformities such as scoliosis and kyphosis
- spine trauma and spinal cord injuries
- acute or chronic back and neck pain

### FOOT AND ANKLE SURGERY

The foot and ankle service provides treatment for common foot problems such as bunions, neuromas, and claw and hammer toes. The service also specializes in the treatment of foot and ankle fractures, achilles tendon ruptures, arthritic conditions, rheumatoid foot deformities, and diabetic foot and ankle complications. The staff has specialty training in ankle arthroscopy for sports injuries, ankle joint replacement, and ligament reconstruction for ankle instability and ruptures, and flat foot reconstructions. A satellite clinic at Milton Hospital, an affiliate of Beth Israel Deaconess Medical Center, provides foot and ankle services in that community.

### HAND SURGERY

The hand surgery service offers comprehensive care for elbow, hand, wrist, and finger injuries and diseases including fractures, tumors, trigger fingers, ligament disruptions, arthritis, carpal/cubital tunnel syndrome, sports-related injuries and tendonitis. Innovative treatments include total wrist arthroplasty and minimally invasive endoscopic carpal tunnel release. Other novel techniques for restoring and maximizing mobility of the wrist and hand include treatment for fractures without the use of external fixators. The orthopaedic hand service works closely with the plastic surgery hand service to provide the full gamut of care of patients with upper extremity problems.

### JOINT REPLACEMENT AND RECONSTRUCTION

The joint replacement and reconstruction surgeons at Beth Israel Deaconess Medical Center offer state-of-the-art surgical treatment for patients with arthritis. Expertise includes primary and revision total hip, knee and shoulder replacement as well as hip resurfacing. A multidisciplinary surgical approach is tailored to each specific patient. A broad spectrum of patients are treated, from young adults to the elderly with osteoarthritis, rheumatoid/inflammatory arthritis and other joint-related illnesses and injuries. The use of regional anesthesia and contemporary minimally invasive surgical techniques in joint replacement reduces length of hospital stay and speeds the recovery process for patients.

### MUSCULOSKELETAL MEDICINE

The musculoskeletal medicine unit provides diagnosis and medical management for acute, sub-acute and chronic non-surgical musculoskeletal complaints. Treatments include: physical therapy; joint aspiration; trigger point injections; chronic pain interventions; and bracing and casting for a wide variety of disorders. The program offers expertise in the diagnosis of osteoarthritis, rheumatoid arthritis and other rheumatoid diseases as well as soft tissue rheumatic disease. The team works closely with surgeons in the department to ensure that the appropriate medical or surgical care is provided to all patients. The musculoskeletal unit collaborates with the Spine Center and the Pain Clinic for further therapeutic management of chronic pain syndromes. Appointments are available within 48 hours of a referral.
**ORTHOPAEDICS**

### ORTHOPAEDIC ONCOLOGY
Orthopaedic oncology offers a multidisciplinary team of experts specializing in the care of patients with bone and soft tissue sarcomas, rare connective tissue neoplasms that affect adults and adolescents. Each member of the team is involved in the processes of staging, treatment and follow-up. The team includes medical, surgical and radiation oncologists, radiologists and pathologists with experience and specialized training in multi-modality treatment and follow-up care. Patients with metastatic carcinoma to bone and those with benign and soft tissue neoplasms are also treated.

### ORTHOPAEDIC TRAUMA SERVICE
The orthopaedic trauma service offers comprehensive trauma management care for all forms of musculoskeletal trauma and injuries. Advanced surgical procedures are available for all extremity, pelvic and spine fractures, dislocations and all forms of musculoskeletal injuries. Beth Israel Deaconess Medical Center is a Level I Trauma Center that is open 24 hours a day, seven days a week and has a dedicated trauma team and a state-of-the-art trauma operating room.

### SPINAL SURGERY
The spinal surgery service offers a full range of surgical interventions for patients with complex spine deformity, tumors, disc disease as well as spine fractures, dislocations and injuries. The service provides advanced surgical treatments including fusion procedures, discectomy, decompressions and spinal instrumentation and offers non-operative treatment options for patients with neck and back pain.

### SPORTS MEDICINE
The sports medicine service offers the latest arthroscopic techniques, joint preservation and reconstruction, open surgical treatment and minimally invasive procedures for shoulder, knee, ankle and elbow disorders. Emphasis is placed on early post-operative rehabilitation and primary care sports medicine interventions for non-operative sports injuries and chronic pain.

Board Certification(s):
- Am Bd Orthopaedic Surgery

Clinical Interest(s):
- Sports Medicine
- Trauma
- Knee, Ankle and Shoulder Surgery
**PATHOLOGY**

Department Chief: Dr. Jeffrey Saffitz

The department of pathology provides comprehensive pathologic services in the areas of anatomic pathology and laboratory medicine, and has a very active research division. Residency and fellowship training programs are also provided within the department.

---

**ANATOMIC PATHOLOGY**

617-667-4344 The division of anatomic pathology provides gross and microscopic diagnosis of biopsies and surgical specimens including immunohistochemistry, electron microscopy, and cytopathologic examination of direct smears, body fluids and fine-needle aspirates. Autopsies are also performed by anatomic pathologists.

---

**CLINICAL PATHOLOGY**

617-667-3648 The division of laboratory and transfusion medicine manages Beth Israel Deaconess Medical Center’s clinical laboratories including: clinical chemistry; hematology; microbiology; cytogentic; blood banking; and transfusion medicine. The laboratories provide comprehensive testing and consultations.

The department of psychiatry is dedicated to the comprehensive assessment and treatment of adult psychiatric disorders. Services include a general adult inpatient psychiatry service with 25 inpatient beds. Outpatient and consultation services are provided by a multidisciplinary team of psychiatrists, psychologists, social workers and nurse clinical specialists who perform diagnostic evaluations and treatments including: psychopharmacologic management of psychiatric disorders; short-term focused psychotherapy; individual and group psychotherapy; crisis intervention; couples and marital therapy; electroconvulsive therapy; and psychological and neuropsychological testing.

Physician Referral:
617-632-4735
Department Chief: Dr. William Greenberg

The mission of the Psychiatry Ambulatory Service is to provide excellent clinical care for patients receiving ongoing medical care at the Beth Israel Deaconess Medical Center. We actively collaborate with other BIDMC physicians to offer psychiatric consultation and recommendations for treatment. Included in the service is a General Psychiatry Practice, which includes Attending Psychiatrists and Licensed Social Workers as well as a Training Clinic, staffed by Harvard Longwood Psychiatric Residents. Patients, age 19 or older, are first seen for a psychiatric consultation. Following this evaluation, the patient may receive ongoing care within our clinic if clinically indicated. The predominant modes of treatment delivered include psychopharmacology and focal intermittent psychotherapy. Some patients require more specialized, comprehensive or intensive treatment and are referred outside our system to the appropriate clinical setting. Please call 617-667-4735 for consultation. Specific Services are offered within the Psychiatry Ambulatory Service.

Physician Referral:
617-667-4735

Outpatient appointments can be made by calling 617-667-4749. Inpatient appointments can be made by calling 617-667-4735. Specific Services are offered within the Psychiatry Ambulatory Service.

General Info/Outpatient: 617-667-7792

The Urgent Care Service is available for patients who have current medical providers at the BIDMC and are in need of an outpatient psychiatric evaluation within 24-72 hours. The patient’s current BIDMC provider speaks directly with a physician from our Psychiatric Consultation Service to schedule these appointments. Providers should call 617-667-7792 to arrange appointment.

Physician Referral:
617-667-7792

The Center for Cognitive Assessment provides comprehensive neuropsychological evaluations to assist with diagnosis, to guide patient management and to facilitate improved functioning of individuals. Outpatient assessments in neuropsychology include a review of medical, social, educational and behavioral health issues, a clinical diagnostic interview, administration of test instruments covering a spectrum of cognitive abilities, therapeutic consultation with the assessment team to discuss findings, and the preparation of a full test report. Each report includes tailored recommendations to address improved cognitive performance, and to advise providers and caregivers. Patients appropriate for referral include those who have: memory complaints, complex attention problems, evidence of change in cognitive status, known or suspected cognitive problems secondary to medical illness, psychiatric illness, dementia, and/or mild cognitive impairment. Specialized evaluations to address academic or vocational concerns are also available for individuals with learning disabilities and attention deficits disorders. Outpatient appointments can be made by calling 617-667-4749. Inpatient neuropsychology consultations are available by calling 617-632-PAGE #30665.

Perinatal Psychiatry Service

Physician Referral:
617-667-4735

The Perinatal Psychiatry Service provides outpatient psychiatric consultation to women receiving their obstetrical care through the BIDMC OB-GYN Department. Pregnant and post partum women are referred the to the Perinatal Service directly by their OB-GYN providers for the evaluation of emotional reactions and mental health disorders which can occur concurrently with pregnancy, ranging from adjustment reactions to mood, anxiety and psychotic disorders. Liaison with OB-GYN staff as well as current mental health providers in the community is central to the mission of the service. Treatment recommendations, including psychotherapeutic and psychopharmacologic, are offered, and some forms of treatment are provided pre and post nataly. Referrals to providers in the community are made for women who need psychiatric care beyond the post partum period and referrals for more intensive levels of care are made as indicated. Providers should call 617-667-4735 to arrange a consult.

Physician Referral:
617-667-4735

The Psycho-oncology Clinic within the Psychiatry Ambulatory Service is available to those BIDMC patients who are being treated for cancer. Common symptoms that may develop during cancer treatment include fatigue, anxiety and depressed mood. Relationship difficulties and problems with substance use may also arise. Counseling and, in some cases, medication may help. Beginning with a consultation to assess psychiatric needs, psychiatrists can recommend, prescribe and monitor medicines, as needed, over time. In addition, parents diagnosed with cancer can meet in consultation with a child psychiatrist to discuss and make recommendations about how best to support children so they understand the parent’s diagnosis and treatment in a way that is most helpful to them. The Psycho-Oncology Clinic works closely with oncology teams and with therapists, both within Beth Israel Deaconess Medical Center and in the community, to ensure that care is well-coordinated. Appointments can be scheduled by calling the Psychiatry Ambulatory Service at 617-667-4735.

Physician Referral:
617-667-4735
## Affective Disorders Consultation Service

**Physician Referral:**
617-667-4735

The Affective Disorders Consultation Service is another component of the Psychiatric Ambulatory Service. This service provides timely, comprehensive outpatient clinical evaluation and treatment recommendations for patients with complex or treatment refractory mood disorders. The consultant works collaboratively with patients and their present clinicians, focusing on integrated treatment recommendations including psychopharmacologic management and psychotherapeutic treatment of mood disorders. Please call 617-667-4735 for an appointment.

### Latino Mental Health Service

The Latino Mental Health Service is a multidisciplinary team including psychiatrists, neurologists, social workers, licensed mental health counselors and community resource specialists that provide general psychiatric evaluations for Latino patients in a culturally sensitive atmosphere. It also offers psychopharmacological treatment, psychotherapy (group and individual), neurological and neuropsychological evaluations in Spanish. All the providers are either bilingual or bicultural. Patient Scheduling: 617-667-4733

### Forensic Psychiatry Service

The Forensic Psychiatry Service provides consultation to attorneys, courts, employers, insurers and agencies to evaluate civil, criminal, correctional and regulatory legal issues. Set in a general hospital and academic medical center, this service emphasizes legal issues involving medical psychiatry, neuropsychology, and neuropsychiatry. Psychiatric, psychological, and neuropsychological evaluations relevant to address forensic issues can be provided by the multidisciplinary staff. Legal issues appropriate for consultation include: competence and guardianship issues, psychiatric disability determinations, fitness for duty evaluations, evaluation of psychological injury and insanity defense evaluations. Patient Scheduling: 617-667-8101

### Electroconvulsive Therapy (ECT)

During the ECT procedure, a psychiatrist administers a small amount of electrical current to the patient’s brain. The current triggers a seizure that affects the entire brain including the areas that control mood, thinking, sleep and appetite. Repeated treatments reconfigure the brain’s chemical messages and offer patients new hope for recovery from life-threatening depression and other mental illnesses. ECT can be offered on an inpatient or outpatient basis, depending on the patient’s needs. An ECT brochure is available upon request. Referrals are made by calling 617-667-4728.

RADIATION ONCOLOGY

<table>
<thead>
<tr>
<th>Program</th>
<th>Patient Scheduling</th>
<th>Details</th>
</tr>
</thead>
</table>
| **CyberKnife Image Guided Therapy** | **Patient Scheduling:** 617-667-4677 | The CyberKnife Image Guided Therapy Program is a state of the art clinic offering real-time robotic image guided therapy. The CyberKnife program is a multidisciplinary program offering treatment for CNS and non-CNS diseases. CyberKnife is a frameless system allowing superior targeting accuracy and provides full-body radiosurgery anywhere in the body. The CyberKnife uses real-time, image-guided, robotic radiotherapy. It is the only stereotactic radiosurgery system that continuously tracks the patient and target position, and automatically corrects for any motion throughout treatment. Patients with intra- and extra- cranial tumors of the neck, spine, pancreas, lung, liver, prostate; AVM; trigeminal neuralgia; recurrent disease and tumors that require respiratory tracking.

**Patients Appropriate for Referral:**
- Patients with intra- and extra- cranial tumors of the neck, spine, pancreas, lung, liver, prostate; AVM; trigeminal neuralgia; recurrent disease and tumors that require respiratory tracking

| **Intensity Modulated Radiotherapy** | **Patient Scheduling:** 617-667-2345 | Intensity Modulated Radiotherapy (IMRT) is the most modern form of conformal radiotherapy. IMRT offers the ability to deliver higher doses more safely than standard External Beam Radiotherapy (XRT) by dramatically limiting the radiation dose to healthy tissue. IMRT is suitable for tumors that require a high degree of dose conformity, such as tumors located next to radiation-sensitive tissues. IMRT delivers a more uniform dose throughout the tumor volume. Since the radiation dose is concentrated on the tumor, diseases that traditionally had severe side effects, such as certain head and neck cancers, can be treated with minimal side effects.

**Patients Appropriate for Referral:**
- Any patients suitable for radiation therapy

| **Prostate Implant Program** | **Patient Scheduling:** 617-667-4726 | The Prostate Implant Program is a multidisciplinary program that includes urology, radiation oncology, radiation safety and radiology. The program offers patients an alternative treatment for early-stage prostate cancer in which radioactive seeds are placed directly into the prostate gland. Current research projects include intraoperative MRI image fusion, real-time intraoperative dosimetry using fluoroscopic and ultrasound imaging, virtual reality guided implants and CT ultrasound implants.

**Patients Appropriate for Referral:**
- Patients with early-stage prostate cancer

| **Stereotactic Radiosurgery/Therapy** | **Patient Scheduling:** 617-667-2345 | In addition to the standard radiation treatments for brain tumors, stereotactic radiosurgery and radiation therapy are available for the precise delivery of radiation to tumors including high-grade gliomas, meningiomas, acoustic neuromas, metastatic tumors and pituitary tumors, as well as vascular malformations. This is a joint program offered through the departments of radiation oncology and neurosurgery.

**Patients Appropriate for Referral:**
- Patients with small primary brain tumors or other metastatic tumors
Total Body Irradiation/Total Lymphoid Irradiation

Patient Scheduling:
617-667-2345

The Total Body Irradiation (TBI) Program allows for whole body irradiation for marrow ablation in preparation for allogeneic bone marrow transplantation. TBI utilizes large, high-energy radiation fields with custom-fabricated compensators applied to the patient at an extended distance to ensure full coverage of the entire body. The radiation dose is by monitored surface dosimeters to ensure that the optimal dose is delivered. The Total Lymphoid Irradiation (TLI) Program allows for selective irradiation of lymphoid tissue as part of a reduced intensity conditioning regimen prior to allogeneic transplantation. In this strategy, the radiation treatment serves as immunosuppressive rather than ablative therapy, allowing for eradication of disease through donor lymphocyte mediated graft versus tumor effect. Patients experience far less treatment related toxicity with this regimen, thus allowing the use of allogeneic transplantation in patient populations for which it had not been readily applicable in the past. TLI utilizes high-energy radiation fields with custom-fabricated blocks and immobilization to allow targeted treatment of lymphoid tissue while sparing critical adjacent normal tissue/ organs.

Patients Appropriate for Referral:
- Patients on protocols requiring allogenic transplantation for hematological malignancies

The department of radiology offers complete diagnostic services including general radiology, CT scans, magnetic resonance imaging (MRI), ultrasounds, mammography, nuclear medicine and interventional radiology.

### GENERAL RADIOLOGY

BIDMC 617-667-2515
Brookline 617-731-5250
Chelsea 617-660-6700
Chestnut Hill 617-754-0313
Lexington 781-672-2010
Needham 781-453-3044

General radiology services are available at all BIDMC radiology locations.

### 3-D/Advanced Imaging Laboratory

Patient Scheduling:
617-667-2515

3Dlab@caregroup.harvard.edu

Staffed by radiologists, technologists, an imaging scientist and a computer scientist, the 3-D/Advanced Imaging Laboratory creates 3-D models and vessels mapping from scan data obtained during a conventional CT scan. Advanced images are created through specific scan techniques and protocols obtained in a non-invasive manner. Pre- and postoperative evaluations determine surgical feasibility and improve surgical planning and follow-up. Advanced imaging models are post-processed in the lab after the patient has been scanned, so this does not add any additional time to the patient’s exam. Color 3-D models and vessel maps can be obtained in hard copy print or computer format.

**Patients Appropriate for Referral:**
- pre/post organ donation
- hepatobiliary tumors
- pancreatic tumors
- renal tumors
- bi-dimensional and volumetric measurements
- dynamic perfusion studies
- endovascular stent grafts
- CT angiography (brain, neck, chest, abdomen, pelvis, peripheral vascular, male infertility)
- nasopharyngeal-airway

### RADLINE

Patient Scheduling:
617-632-7243
Pager 31079

RADLINE is a radiology consult service for physicians. To hear preliminary radiology results, call the Radiology Listen Line at 617-754-8583.

### ABDOMINAL IMAGING

617-667-2515

The abdominal imaging division, which includes all cross-sectional imaging modalities (CT, MRI, ultrasound and fluoroscopy), provides a full range of diagnostic examinations and therapeutic procedures pertaining to the abdominal organs, including GI, GU, vascular (CT and MR angiography) and image-guided percutaneous procedures.

### ABDOMINAL IMAGING RELATED PROGRAMS

#### 3-D/Advanced Imaging Laboratory

Patient Scheduling:
617-667-2515

See program description under the Radiology Tab.
BREAST IMAGING/MAMMOGRAPHY

The Breast Imaging Center offers a comprehensive imaging program for the diagnosis of breast diseases. Our radiologists, who subspecialize in breast imaging, work in close collaboration with medical and psychological subspecialists of the BreastCare Center – hematologists, oncologists, pathologists, radiation oncologists, general surgeons and oncology social workers. The Breast Imaging Center integrates the expertise of a highly trained team to screen and diagnose breast problems. The radiology department at Beth Israel Deaconess Medical Center is one of only 18 sites in the country chosen to be a part of the American College of Radiology Imaging Network (ACRIN) trial funded by the National Cancer Institute. Imaging at the center is performed by a staff of exceptionally skilled female technologists. All diagnostic mammography patients have the results of their studies at the end of their appointments. When a study yields questionable results, advanced diagnostic tools are available including stereotactic core biopsy, ultrasound core biopsy, fine-needle aspiration, needle wire localization followed by surgical excision, galactography (ductography), MR imaging of the breast, and cyst aspiration of abscess drainage. Referring providers are notified immediately of any significant findings and receive a dictated report within one week.

CARDIOVASCULAR AND INTERVENTIONAL (CVIR)

617-667-2101

The division of cardiovascular and interventional radiology provides a wide variety of both vascular and non-vascular procedures. The division also provides specialized consultations. Procedures available include: fibroid embolizations; tubal recanalization; thoracic, pulmonary and peripheral arteriography; diagnosis and treatment of peripheral vascular disease; angiography; venography; angioplasty; atherectomy; stent placement; complex venous reconstructions including Sharp recanalization; thrombolysis; inferior vena caval filter placement; removal of intravascular foreign bodies; arterial and venous sampling; percutaneous biliary drainage, recanalization and stenting; percutaneous nephro-uretal intervention; lymphangiography; varicocele embolizations; stone removal; aortic stent graph; pulmonary suction thrombectomy; custom stenting including the production of custom devices; tumor embolizations; and central venous access (IVs and filters).

CARDIOVASCULAR AND INTERVENTIONAL (CVIR) PROGRAMS

Cardiac MR Center

Patient Scheduling:
617-667-8555

Since its establishment in 1995 as a joint effort of the Beth Israel Deaconess Medical Center departments of medicine (cardiovascular division) and radiology, the BIDMC Cardiac MR Center has been one of the world’s leaders in this new imaging modality. The laboratory features a state-of-the-art, ST dedicated Philips Cardiac MR system, providing the full range of cardiac MR applications. All studies are interpreted at reading sessions staffed by both cardiology and radiology physician faculty.

Patients Appropriate for Referral:
- assessment of quantitative left and right ventricular function/mass
- assessment for suspected pericardial disease
- assessment of myocardial viability
- cardiomyopathy assessment including ARVD, hemochromatosis, etc.
- congenital heart disease
- evaluation for coronary anomalies/coronary artery and coronary bypass graft integrity

HeartScan

Patient Scheduling:
800-896-1048

The HeartScan Program offers patients an innovative 15-minute, non-invasive procedure that can help discover early or asymptomatic heart disease before there is a significant narrowing of the arteries. Early detection may provide the chance to halt or reverse the progression of coronary artery disease. The risk of coronary artery disease increases with age and the presence of risk factors.

Patients Appropriate for Referral:
- Men over age 40
- Women over age 50
- Individuals with a high-stress lifestyle
- Individuals with a history of smoking
- Individuals with high cholesterol
- Individuals with a family history of heart disease
- Obese individuals
- Individuals with diabetes mellitus
- Individuals who lead a sedentary lifestyle
- Individuals with peripheral vascular disease
## CHEST

617-667-2515 The chest division of radiology provides a variety of thoracic imaging studies including conventional chest radiographs, computed tomography (CT) of the chest, high-resolution computed tomography (CT) of the chest, and low-dose computed tomography (CT) of the chest (for lung cancer screening). The division also performs dedicated computed tomography (CT) examinations of the airway including 3-D reconstruction images.

## CHEST RELATED PROGRAMS

### 3-D/Advanced Imaging Laboratory

**Patient Scheduling:**
617-667-2515

See program description under the Radiology Tab.

## INTERVENTIONAL NEURORADIOLOGY

Radiology 617-754-2521 Neurosurgery 617-632-9911 Staffed by interventional neuroradiologists, radiologists, and technologists, the Neurointervention/Endovascular Neurosurgery Center offers a wide variety of minimally invasive procedures and innovative techniques. The medical center now has a regional/national reputation for performing neurointerventional procedures. The overall perspective for neurointervention is that the patient be able to achieve a more rapid recovery with minimal discomfort and decreased risk. This center performs a full variety of minimally invasive CNS-based vascular and musculoskeletal procedures. Vascular procedures include emergency stroke therapy, intracranial angioplasty, extracranial angioplasty, carotid and vertebral artery stenting, aneurysm coil occlusion, embolization for bleeding, treatment of vasospasm, embolization of tumors or vascular lesions, intra-arterial chemotherapy for brain and head and neck tumors, temporary test occlusion of vessels, permanent vascular occlusion, and baseline carotid/cerebral angiogram. Musculoskeletal procedures include vertebroplasty/balloon-assisted kyphoplasty for compression fractures, and intradiscal nucleoplasty for herniated discs.

## MAGNETIC RESONANCE IMAGING (MRI)

617-667-2515 Beth Israel Deaconess Medical Center department of radiology radiologists, technologists, imaging scientists and physicists offer advanced magnetic resonance imaging (MRI) to provide patients with a full range of sophisticated exams. MRIs are performed with the most technologically advanced equipment available including 3T and 1.5T magnets. The newest 1.5 T machines have an open architecture design. The department’s vital research program offers the possibility for individuals to participate in the development of new MR imaging techniques. Areas of particular expertise include: • magnetic resonance angiography and venography (MRA and MRV) for non-invasive imaging of vascular disease • stroke care • 3-D volumetric body imaging • fetal MRI • breast MRI • MR spectroscopy Patients appropriate for referral include those who require sophisticated radiological exams for diagnosis of a variety of conditions.

## MUSCULOSKELETAL RADIOLOGY

617-667-2515 The musculoskeletal radiology division offers a full range of examinations related to the musculoskeletal system, including X rays and diagnostic and therapeutic arthrograms.

## NEURORADIOLOGY

617-667-2515 The division of neuroradiology provides radiological services utilizing MRI, CT and catheter angiography to image central nervous system diseases.

## NON-INVASIVE VASCULAR LAB

617-754-2630 The non-invasive vascular lab provides a full range of studies and procedures including: carotid evaluation; assessment for peripheral vascular disease; bypass graft surveillance; pre-operative assessment prior to arteriovenous fistula creation; and minimally invasive femoral pseudoaneurysm repair.

## NUCLEAR MEDICINE

617-667-2071 The division of nuclear medicine provides a full range of examinations including bone, cardiac, endocrine and oncologic imaging.

## NUCLEAR MEDICINE PROGRAMS

### PET (Positron Emission Tomography)

The PET scan at Beth Israel Deaconess Medical Center offers patients and referring physicians a state-of-the-art clinical tool for the diagnosis and management of cancer and diseases of the heart and brain. The PET scan is extremely useful in the evaluation, treatment and management of cancer. The oncologic benefits of PET are that it can detect tumors early and accurately, assess tumor aggressiveness, and monitor the success of therapy. It may also help to determine whether a suspicious site is benign or malignant, and can scan the whole body to detect metastatic disease. The neurologic benefits of PET are the scan's ability to evaluate dementia, cerebrovascular disease, movement disorders and intractable seizures. The PET scan is an important diagnostic tool in cardiology because of its ability to define myocardial viability by assessing regional metabolic function in patients who are being considered for coronary bypass, angioplasty and cardiac transplantation. Patients Appropriate for Referral: Patients with cancer or diseases of the brain or heart.
**ULTRASOUND**

617-667-2515 The division of ultrasound provides a full range of examinations including abdominal, pelvic, obstetric and gynecologic, small parts (including thyroid and parathyroid, salivary glands, testes and scrotum), chest and vascular studies. Other procedures in which ultrasound is used include intra-operative and interventional procedures (find needle and core biopsies, abscess and fluid collection drainages).

Hadassah Medical School in Surgery, 1995

Medical School:
Hadassah Medical School

Board Certification(s):
Am Bd Surgery

Clinical Interest(s):
Maintenance of the Hemodialysis Access
Interventional Oncology

Language(s):
Hebrew
Kane, Robert A., MD
Harvard Medical Faculty Physicians (HMFP) at Beth Israel Deaconess Medical Center
BIDMC - Department of Radiology-West
One Deaconess Rd.
Boston, MA 02215
Phone: 617-754-2519; Fax: 617-754-2545

Fellowship(s):
Beth Israel Deaconess Medical Center in Radiology, 1976

Residency(ies):
Massachusetts General Hospital in Radiology, 1975

Medical School:
Tufts University School of Medicine

Board Certification(s):
Am Bd Radiology (Diagnostic Radiology)

Clinical Interest(s):
Intraoperative Ultrasound
Liver Imaging
Gastrointestinal/Genitourinary Imaging
Prostate Cancer
Tumor Ablation Methods
Ultrasound Contrast Agents for Characterization of Liver and Kidney Masses

Raptopoulos, Vassilios D., MD
Harvard Medical Faculty Physicians (HMFP) at Beth Israel Deaconess Medical Center
BIDMC - Department of Radiology
330 Brookline Ave.
Boston, MA 02215
Phone: 617-667-1283; Fax: 617-667-8212

Fellowship(s):
Vanderbilt University Medical Center in Computed Tomography, 1977

Residency(ies):
Georgetown University Medical Center in Radiology, 1976
424 General Military Hospital in Internal Medicine, 1970

Medical School:
Aristotle University of Thessaloniki

Board Certification(s):
Am Bd Radiology (Diagnostic Radiology)

Kruskal, Jonathan Bruce, MD
Harvard Medical Faculty Physicians (HMFP) at Beth Israel Deaconess Medical Center
Department of Radiology-West
One Deaconess Rd.
Boston, MA 02215
Phone: 617-754-2519; Fax: 617-754-2545

Fellowship(s):
Vanderbilt University Medical Center in Anesthesiology, 1989

Residency(ies):
Beth Israel Deaconess Medical Center in Diagnostic Radiology, 1994

Medical School:
University of Cape Town

Board Certification(s):
Am Bd Radiology (Diagnostic Radiology)

Rosen, Max P., MD, MPH
Harvard Medical Faculty Physicians (HMFP) at Beth Israel Deaconess Medical Center
BIDMC - Department of Radiology
330 Brookline Ave.
Boston, MA 02215
Phone: 617-667-2506; Fax: 617-667-8212

Residency(ies):
Boston Medical Center in Diagnostic Radiology, 1991

Medical School:
Harvard School of Public Health
Tufts University School of Medicine

Board Certification(s):
Am Bd Radiology (Diagnostic Radiology)
Sheiman, Robert G., MD
Harvard Medical Faculty Physicians (HMFP) at Beth Israel Deaconess Medical Center
BIDMC - Department of Radiology
330 Brookline Ave.
Boston, MA 02215
Phone: 617-754-2529; Fax: 617-754-2525
Fellowship(s):
UMass Memorial Medical Center in Radiology, 1989
Residency(ies):
UMass Memorial Medical Center in Radiology, 1993
Columbia Presbyterian Hospital in Otolaryngology, 1989
Beth Israel Deaconess Medical Center in Surgery, 1987
Medical School:
Columbia University College of Physicians and Surgeons
Board Certification(s):
Am Bd Radiology (Diagnostic Radiology)

Tyagi, Girish, MD
Harvard Medical Faculty Physicians (HMFP) at Beth Israel Deaconess Medical Center
Department of Radiology
330 Brookline Ave.
Boston, MA 02215

# REHABILITATION SERVICES

617-667-4328 Department Administrator: Kathy Shillue
Beth Israel Deaconess Medical Center’s rehabilitation services department provides comprehensive medical management and interdisciplinary approaches to treatment. Providers who participate in patients’ rehabilitative treatment include skilled physicians, nurses, therapists, psychologists, social workers and other caregivers. Areas of focus include cardiopulmonary rehabilitation, respiratory rehabilitation, geriatric rehabilitation, sports injury rehabilitation, rehabilitation for people who have chronic pain and many others.

## REHABILITATION SERVICES PROGRAMS

### Aquatic Therapy

**Patient Scheduling:**
617-667-4328

The Aquatic Therapy Program provides patients with a comprehensive evaluation followed by recommendations for an individual treatment program. Programs may include:
- passive and assisted range-of-motion exercise
- active and resistive strengthening
- postural awareness activities
- cardiovascular fitness training
- interval training
- progressive weight bearing
- spinal mobility exercise

**Patients Appropriate for Referral:**
- Individuals who would benefit from exercising in a warm, gravity-eliminated, buoyancy-assisted water environment

### Arthritis Program

**Patient Scheduling:**
617-667-4328

The Arthritis Program offers a thorough evaluation of impairments and functional limitations for patients with rheumatologic diseases. Treatment is based on the individual’s needs and may include:
- therapeutic exercises for strengthening, improving flexibility and aerobic conditioning
- aquatic therapy with transition to a community-based pool if appropriate
- education about posture and body mechanics
- manual therapy techniques for pain and inflammation control such as rest or activity modification, thermal or electro-therapeutic modalities
- relaxation exercises
- consultation regarding splints, assistive devices or aids for gait or joint protection

**Patients Appropriate for Referral:**
- Individuals with impairments and functional limitations due to rheumatologic diseases such as osteoarthritis, rheumatoid arthritis and fibromyalgia

### Chronic Pain Rehabilitation Program

**Patient Scheduling:**
617-667-4328

The Chronic Pain Rehabilitation Program evaluates and treats patients’ musculoskeletal and functional impairments. Treatment plans include:
- exercise prescriptions to correct musculoskeletal deficits
- conditioning programs
- instruction in techniques for self-management of pain, including relaxation and stress management techniques, stretching, ice, massage and TENS

**Patients Appropriate for Referral:**
- Individuals with functional impairments due to chronic pain

### Exercise Conditioning for the Cardiopulmonary Population

**Patient Scheduling:**
617-667-4328

Patients referred to Beth Israel Deaconess Medical Center’s rehabilitation services department with medical diagnoses that affect cardiopulmonary function undergo a thorough evaluation and the treatment plan is catered to each patient’s individual needs. Treatments may include:
- secretion clearance
- breathing retraining, pacing and energy conservation
- oxygen titration — assessment and instruction for use during rest and activity
- inspiratory muscle training endurance/strengthening exercise program
- a home exercise prescription
- cardiopulmonary exercise tolerance testing
- other treatments to reduce symptoms

**Patients Appropriate for Referral:**
- Individuals with medical diagnoses that affect cardiopulmonary function, such as CHF, COPD, emphysema, asthma, pulmonary fibrosis, sarcoidosis and restrictive lung disease
- Individuals who are being considered for thoracic surgery such as wedge resection, lobectomy, pneumonectomy or solid organ transplantation
Functional Training Program: Activities of Daily Living

**Patient Scheduling:**
617-667-4328

After an initial evaluation using standardized measures, the Activities of Daily Living Program provides treatment that may include: • instruction in specific self-care techniques, including adaptations to clothing • prescription for and training in the use of adaptive equipment • cognitive/perceptual retraining • instruction in work simplification, energy conservation and joint protection techniques

**Patients Appropriate for Referral:**
- Individuals with functional limitations in:
  - self-care tasks including a decreased ability to carry out routine daily activities such as bathing, dressing, eating and grooming
  - the ability to write or use the telephone
  - the ability to move independently and safely in one's environment including transfers from the bed, toilet or car

---

Functional Training Program: Home Management/Home Safety

**Patient Scheduling:**
617-667-4328

After an initial evaluation, the Home Management/Home Safety Program provides information and instruction on: • home safety techniques • environmental modifications for architectural barriers • adaptive equipment to facilitate independence • work simplification, energy conservation and joint protection techniques

**Patients Appropriate for Referral:**
- Individuals with functional limitations that may potentially jeopardize home safety and the ability to perform essential home-management activities such as:
  - meal preparation/cleanup
  - money management
  - safety procedures
  - household maintenance
  - clothing care
  - caring for others
  - community mobility/transportation

---

Neuromuscular/Neurobehavioral Rehabilitation

**Patient Scheduling:**
617-667-4328

The Neuromuscular/Neurobehavioral Program provides patients with a comprehensive evaluation and recommends appropriate therapeutic activities including: • range-of-motion and strengthening exercises • gait and balance training • equipment prescription to increase function and mobility (wheelchair evaluation) • cognitive skill training and sensory integration training • fine motor coordination and bilateral integration activities of daily living/home management and safety

**Patients Appropriate for Referral:**
- Individuals with central nervous system dysfunction from disease or trauma that results in or puts the patient at risk for: loss of range of motion, strength and coordination; impaired safety awareness; loss of sensation or hypersensitivity; postural defo
- Patients with medical diagnoses such as multiple sclerosis, Parkinson's disease, CVA, dementia, TBI or spinal cord injury
- Individuals with peripheral nerve injury and disease (crush injuries, RSD, neuropathy) resulting in: loss of strength and sensation; soft-tissue changes or risk for soft-tissue injury pain contributing to impaired functional mobility; decreased endurance

---

Orthotic Fabrication

**Patient Scheduling:**
617-667-4328

Rehabilitation services staff members provide patients with a biomedical evaluation of gait and lower extremity and follow up with appropriate treatments including:
- Prescription for/fabrication of customized orthotics
- Modalities to treat inflammation and to promote healing
- An exercise prescription to improve alignment, decrease muscle imbalances and improve joint range of motion and mobility
- Instruction in techniques to reduce the risk of sports-related injuries

**Patients Appropriate for Referral:**
- Individuals with impaired gait due to foot, ankle or lower-extremity problems including:
  - pain
  - poor mechanical alignment of bony structures
  - soft tissue impairment
  - loss of skin/soft tissue integrity
## Osteoporosis Program

**Patient Scheduling:** 617-667-4328

Through the Osteoporosis Program, patients undergo a thorough evaluation to determine impairments and the scope of their functional limitations. Various treatment interventions are offered such as: • postural correction exercises focusing on the abdominal and periscapula muscles • weight-bearing exercises • education in body mechanics and ergonomics to reduce spinal stress • balance exercises and safety awareness training • consultation for bracing, assistive devices or ambulatory aids • instruction in techniques for self-management of symptoms including relaxation exercises, stretching, TENS, ice and massage

**Patients Appropriate for Referral:**
- Individuals at risk for bone demineralization who have already developed osteoporosis or who have sustained injuries such as stress fractures as a result of osteoporosis

## Oxygen Assessment

**Patient Scheduling:** 617-667-4328

The oxygen assessment service provides: • functional assessment to determine the need for supplemental oxygen titration of oxygen for rest and activity • assessment of the need for airway management/secretion clearance measures • consultation with the referring physician • referral to appropriate home-care providers for equipment and supplies

**Patients Appropriate for Referral:**
- Individuals who have a variety of lung disorders or those who have, or are at risk for, hypoxemia at rest and/or with activity

## Pregnancy and Postpartum Program

**Patient Scheduling:** 617-667-4328

Through the Pregnancy and Postpartum Program, individuals are seen to determine their underlying impairments and functional limitations. Treatment interventions may include: • strengthening of postural muscles • techniques to help manage symptoms, including stretching and relaxation exercises, ice, massage and positioning • education about body mechanics and posture • consultation about and fabrication of splints, braces or assistive devices, as needed

**Patients Appropriate for Referral:**
- Individuals with functional limitations due to musculoskeletal disorders related to physical changes during pregnancy or to the increased physical demands of providing infant care will benefit from this program.
- Problems may include: back pain or sacroiliac joint pain; foot pain; carpal tunnel syndrome; and de Quervain’s tenosynovitis.

## Sports Injury Rehabilitation

**Patient Scheduling:** 617-667-4328

Patients who are referred to rehabilitation services for a sports injury receive a comprehensive evaluation of their current functional status, including fitness level and performance in light of acute and/or chronic injuries. Individual treatment prescriptions address areas targeted for improving performance and facilitate rapid rehabilitation. Personal goals are set by each patient for his/her return to participation in sports and other functional activities. The rehabilitation services staff has extensive experience in treating all patient populations, including senior athletes and artistic performers such as musicians and dancers. Treatments may include: • strengthening, flexibility and endurance exercises to improve movement during sports and other functional activities • patient education to improve posture and body mechanics • instruction in a home exercise program • joint and soft tissue mobilization to increase range of motion and freedom of movement • modalities to increase tissue extensibility, decrease pain and edema, and promote healing • consultation regarding bracing, taping, protective equipment or orthotics

**Patients Appropriate for Referral:**
- Individuals who require evaluation and management of acute or chronic sports-related injuries
- Individuals who are interested in initiating a comprehensive fitness program
- Individuals with strains or sprains, meniscal injuries, surgical repairs, patellar femoral pain, impingement syndromes, or plantar fasciitis

## Transtracheal Oxygen Program

**Patient Scheduling:** 617-667-4328

The Transtracheal Oxygen Program provides: • preoperative patient assessment and teaching • postoperative joint visit with a pulmonologist to transition to Scoop I catheter • instruction in cleaning Scoop I • catheter management and training • transition to Scoop II catheter and teaching

**Patients Appropriate for Referral:**
- Individuals who are currently receiving supplemental oxygen and who demonstrate inadequate oxygen saturation with delivery by nasal cannula
- Patients who require continuous supplemental oxygen, but desire a more discreet means of delivery
Upper-Extremity/Hand Rehabilitation Program

Patient Scheduling:
617-667-4328

Through the Upper Extremity/Hand Rehabilitation program, patients are seen for a comprehensive evaluation which is followed by treatment and therapeutic activities, including:
• exercise
• wound management
• soft tissue mobilization
• postural re-education
• activities of daily living training
• work conditioning
• ergonomic evaluation and recommendations
• customized hand splints
• home exercise programs

Patients Appropriate for Referral:
- Individuals with neuromuscular and/or musculoskeletal disorders of the upper extremity or hand, including:
  - sprains, strains, impingement syndromes, dislocations and fractures
  - repetitive motion injuries
  - inflammatory diseases
  - changes in sensation, posture, endurance and fine-motor coordination
  - thoracic outlet syndrome
  - peripheral nerve injury and disease (crush injuries, RSD, neuropathy)

Vestibular Rehabilitation

Patient Scheduling:
617-667-4328

The Vestibular Rehabilitation Program provides a comprehensive evaluation of balance, gait, and vestibular-ocular or vestibular-spinal dysfunction. Treatment interventions may include:
• balance and gait retraining
• Brandt-Daroff exercises
• Epley maneuver
• habituation, substitution or adaptation exercises
• postural control training

Patients Appropriate for Referral:
- Individuals with:
  - a history of falls
  - complaints of dizziness, spinning and lightheadedness
  - decreased activity due to feelings of imbalance
  - unsteady gait
  - identified vestibular dysfunction

REHABILITATION SERVICES RELATED PROGRAMS

Asthma and Dyspnea Center

Patient Scheduling:
617-667-LUNG
617-667-5864

See program description under the Medicine Tab.

Drivewise: A Driving Fitness Evaluation Program

Patient Scheduling:
617-667-4074

See program description under the Neurology Tab.

Spine Center

Patient Scheduling:
617-667-8900

See program description under the Surgery Tab.
Clinical social workers are available for counseling and support to patients and families who present with a variety of issues, including: emotional reactions to illness and hospitalization; marital and/or family problems; symptoms of anxiety or depression; addictions and/or substance abuse; and women’s health and pregnancy concerns. Staff members also provide information, referrals and liaison to community-based programs and services such as financial aid, housing and legal services. Social work staff are also available on most inpatient services and in hospital-based primary and specialty units. In addition, the department sponsors several specialty programs including: The Center for Violence Prevention and Recovery; Patient-to-Patient, Heart-to-Heart, a peer support program for cancer survivors; a specialized epilepsy and dementia program; and Room Away From Home, a housing program that assists financially needy out-of-town patients and families with suitable lodging for extended stays in Boston during medical treatment.

**SOCIAL WORK PROGRAMS**

**Center for Violence Prevention and Recovery (CVPR)**

**Physician Referral:**
Page 617-667-4700
Page ID 31389

**Patient Scheduling:**
617-667-8147

The Center for Violence Prevention and Recovery provides and coordinates services for victims and survivors of interpersonal violence. Program initiatives include: the Rape Crisis Intervention Program; Safe Transitions Domestic Violence Intervention Program; The Community Violence Program (includes those who have lost a loved one to homicide); and The Advocacy Education and Support Project - a program that addresses secondary traumatic stress with providers. Services also include advocacy, safety planning, court accompaniment, assistance accessing services and resources, short-and long-term counseling, support and therapy groups, consultation and training for employees of the medical center and its affiliates, coordination with the emergency department to provide comprehensive medical care, counseling and forensic evidence collection for sexual assault survivors.

**Patients Appropriate for Referral:**
- Patients, employees and community members affected by violence or abuse including men, and women who are straight, gay, lesbian, bisexual and transgender

**Medication Assistance**

**Patient Scheduling:**
617-667-3448

A medication assistance counselor is available to assist uninsured or underinsured patients who need to obtain medications through the various pharmaceutical company assistance programs. If patients meet eligibility criteria, they may be able to obtain their medications for little or no cost through these programs. Patients will meet with the medication counselor to complete the necessary applications and to supply needed financial verifications.

**Patients Appropriate for Referral:**
- Patients who are uninsured or underinsured who need assistance obtaining their prescription medications

**Patient-to-Patient, Heart-to-Heart**

**Patient Scheduling:**
617-667-2661

Patient-to-Patient, Heart-to-Heart is a cancer peer support program designed to meet the needs of patients and families at all stages of diagnosis, treatment and survival. Patients and family members are matched with volunteers to speak to or meet with as it seems helpful. Patient-to-Patient, Heart-to-Heart volunteers are also available daily in the hematology/oncology unit to talk with patients and families.

**Patients Appropriate for Referral:**
- Cancer patients and their families
### Room Away From Home Program

**Patient Scheduling:**  
617-667-3421

The Room Away From Home Program is a joint program of the social work departments of Beth Israel Deaconess Medical Center, Brigham and Women’s Hospital and Dana-Farber Cancer Institute. The program assists financially needy out-of-town patients and families who require suitable lodging for short stays in Boston while they are undergoing treatment. In collaboration with local hotels, eligible patients and families are offered appropriate accommodations for 1-3 nights at reduced rates ($25 per night, payable in advance) based upon availability.

### Social Work Group Program

**Patient Scheduling:**  
617-667-1830

The Social Work Group Program offers more than 20 groups for adults including support, psychoeducational and psychotherapy groups. Some groups focus specifically on adjusting to or coping with a particular medical diagnosis, traumatic event or loss. The program also offers ongoing psychotherapy groups in which thoughts, feelings and behaviors that may impede personal or professional satisfaction are examined. The program also offers support groups in which members, who are experiencing the same illness or life stage come together to get support from one another. These groups include medical inpatient and outpatient groups, The Group Program includes groups for people who have multiple sclerosis, disabled men, men who are HIV positive, liver transplant patients, families in the NICU, cancer patients, parents who need support, people affected by addictions and people who are recovering from trauma.
**ACUTE CARE SURGERY**

This service provides care for patients in need of immediate surgical intervention including trauma and emergency general surgery patients. With an in-house attending surgeon available 24 hours a day, this service will provide more rapid delivery of care to patients and provide a higher level of supervision for the residents. Research has shown that Acute Care Surgery services reduce wait times for urgent and emergent surgery as well as reduce the hospital length of stay. Comprehensive, tertiary level trauma care is provided consistent with our Level 1 Trauma Center designation.

**CARDIO THORACIC SURGERY**

BIDMC thoracic surgeons, interventional pulmonologists and other specialists draw on extensive expertise and a range of approaches to customize care to each patient’s needs. Their multidisciplinary approach to both benign and malignant chest diseases leverages the maximum available information – obtained from state-of-the-art imaging and endoscopic staging tools – to generate a treatment plan with the best chance for cure while limiting risk. All BIDMC thoracic surgeons are board-certified – an indicator for the best quality outcomes. They continue to push the boundaries of state-of-the-art care, with an emphasis on minimally invasive methods. BIDMC offers special expertise in the diagnosis and treatment of lung and esophageal cancer, as well as leading-edge care for pleural disease and tumors of the thymus, mediastinum, chest wall and airway. Patients with benign airway diseases such as emphysema and asthma have access to the most advanced interventional pulmonology and surgical options, as well as various clinical trials.

**CARDIO THORACIC SURGERY PROGRAMS**

**Complex Airway Center**

**Patient Scheduling:**
617-632-6252

The Complex Airway Center is a specialized multidisciplinary program for the evaluation and treatment of patients with malignant and benign diseases affecting the trachea and central bronchi. Patients are evaluated with a variety of advanced diagnostic instruments including white light and fluorescent bronchoscopy and endobronchial ultrasound. New technology is allowing physicians to use image-guidance to steer diagnostic and therapeutic tools toward smaller lesions in the lung periphery. The center also offer a variety of therapeutic interventions using rigid endoscopy including laser photoresection, microdebridement, photodynamic therapy and stenting. Urgent evaluation and intervention can be arranged within 24 hours.

**Patients Appropriate for Referral:**
- Patients with central airway lesions
- Patients with stridor

**Pleural Disease Center**

**Patient Scheduling:**
617-632-6252

The Pleural Disease Center is a specialized multidisciplinary program for the evaluation and treatment of diseases affecting the linings around the lungs. Patients with pleural effusions or pleural masses are evaluated for possible thoracentesis, pleuroscopy (both medical and surgical) and/or biopsy. Pleural manometry is routinely performed, and home drainage systems are implanted when appropriate. In most cases, urgent thoracentesis can be arranged within 24 hours.

**Patients Appropriate for Referral:**
- Patients with diseases affecting the linings around the lungs
- Patients with pleural effusions for diagnosis and treatment

**Thoracic Oncology**

**Patient Scheduling:**
617-667-1901

A multidisciplinary conference follows weekly patient sessions in the Thoracic Oncology Program to address all approaches to care including innovative treatments and investigational protocols for patients with lung cancer, esophageal cancer, or pleural or mediastinal tumors. State-of-the-art treatment includes: • extended resection for pleural and mediastinal tumors and esophageal cancer • thorascopic thoracic surgery, including minimally invasive lung resections, diagnostic procedures, video-assisted surgery and laser bronchoscopy.
## COLON AND RECTAL SURGERY

**Division Chief:** Deborah Nagle, MD

The colon and rectal surgery division at Beth Israel Deaconess Medical Center offers expertise in the treatment of diseases of the small intestine, colon or large intestine, rectum and anus. Providers offer comprehensive treatment for benign and malignant diseases. The most common surgical diseases treated are diverticulitis, inflammatory bowel disease and colorectal cancer. Colon and rectal surgery staff have extensive experience and skill in sphincter-preserving surgery for both cancer and colitis. The division also provides evaluation and treatment both office-based and surgical, for common anorectal disorders such as hemorrhoids, fissures and fistula disease.

### COLON AND RECTAL SURGERY PROGRAMS

#### BIDMC Pathway for Perioperative Management of Colectomy Patients

**Patient Scheduling:**

617-667-4159

In 2007, we developed and launched an institutional pathway for the perioperative management of patients who have colectomy surgery at Beth Israel Deaconess Medical Center. The opportunity to define and standardize care for our patients was a collaborative effort across multiple hospital services. The pathway is a guide and template to the daily management of patients who have surgery. Each patient receives a copy of the pathway to help them understand the process around their surgery. Physicians, nurses and other team members utilize the pathway to increase quality, safety and efficiency of care. Team members of the pathway group continue to meet weekly to assess pathway implementation and metrics of outcome.

#### Laparoscopic and Minimally Invasive Colon and Rectal Surgery

**Patient Scheduling:**

617-667-4159

Minimally-invasive surgery is a combination of surgical techniques that offer operative therapy through smaller, less painful incisions with a better cosmetic outcome. Minimally-invasive surgery is not just about appearance, though. Surgical patients can expect multiple benefits including shorter hospital stays, earlier return to functional status, less blood loss during surgery, and decreased risk of hernia and post-operative bowel obstruction. Beth Israel Deaconess Medical Center offers all forms of minimally-invasive colorectal surgery. The staff have particular experience and expertise in laparoscopic colectomy. All patients, including those who require total proctocolectomy, are considered for this procedure. Minimally-invasive transanal resection of rectal prolapse, polyps and early stage cancers is also available, as are combination endoscopic and laparoscopic procedures for appropriate patients.

#### Multidisciplinary Rectal Cancer Clinic

**Patient Scheduling:**

617-667-4159

The Multidisciplinary Rectal Cancer Clinic is a multi-specialty clinic focusing on state-of-the-art and innovative treatment of rectal lesions, most often cancers. Patients are evaluated jointly by a colon and rectal surgeon, a medical oncologist and a radiation oncologist. Within in two weeks of when they initially contacted with the program, patients will have completed appropriate evaluation studies and be seen in the clinic. The clinic’s well-orchestrated plan for evaluation and management allows patients to begin treatment as quickly as possible. During and after treatment, patients are seen by the appropriate medical and nursing personnel at each visit. The core oncology specialties in this multidisciplinary clinic work closely with specialists in radiology, pathology and gastroenterology. Clinical research trials are open for enrollment and each patient is evaluated for possible participation opportunities. The psychological and social stresses of diagnosis and treatment are supported by the Beth Israel Deaconess Medical Center social work department, whose staff are available to provide counseling and assistance with practical challenges such as insurance, parking and housing.

#### Wound/Ostomy Care

**Patient Scheduling:**

617-632-8185

617-632-7874

The Wound/Ostomy Care Program provides multi-modality consultation for the acute and rehabilitative care of individuals with select disorders of the gastrointestinal, genitourinary and integumentary systems. Program providers also assist in assessing and recommending ways to manage fistula/wound care, dermal ulcer care and skin breakdown associated with urinary and/or fecal incontinence. Perioperative care for the patient who has or may need the creation of an ostomy is central to the mission of the Wound/Ostomy/Continence nurses (WOC), a society of enterostomal therapy nurses. The certified nurse-specialists at Beth Israel Deaconess Medical Center offer: • preoperative teaching and stoma site selection • postoperative stoma care and teaching • peristomal skin evaluation of the effectiveness of the pouching system Supportive counseling is interwoven throughout treatment to help patients who are adjusting to living with a temporary or permanent ostomy. Dietary, activity, sexual and vocational issues are also evaluated as needed.

### COLON AND RECTAL SURGERY RELATED PROGRAMS

#### Center for Inflammatory Bowel Disease

**Patient Scheduling:**

617-667-2135

See program description under the Medicine Tab.

#### Hereditary Colorectal Cancer Program

**Patient Scheduling:**

617-667-1905

617-632-7706

See program description under the Medicine Tab.

Rapid Access Line

Patient Scheduling:
617-667-3738

By calling the General Surgery Rapid Access Line, physicians can speak to a registered nurse who will facilitate coordinating an appointment with the appropriate surgeon for their patient. After speaking to the referring physician, the nurse will call the physician’s office back with the first available appointment. The service is available during regular business hours. Note: All surgeons welcome direct inquiries and referrals, and all providers can be contacted directly to facilitate consultations and inter-hospital transfer of high-acuity patients to Beth Israel Deaconess Medical Center.

GENERAL SURGERY

BIDMC 617-667-3787 Needham 781-453-3650 The division of general surgery provides primary, secondary and tertiary care for the entire spectrum of general surgical diseases. Services are available at Beth Israel Deaconess Medical Center and at Beth Israel Deaconess Hospital-Needham. General surgeons offer both open and minimally invasive surgical treatments for the broad range of general surgical problems and needs, including: • esophageal disease • heartburn • stomach disease, including cancer • weight loss surgery • gallbladder surgery • advanced pancreatic and hepatobiliary disease • Whipple procedure • small intestinal and colon disease • cancer • breast diseases, especially cancer • soft tissue tumors, including sarcoma • melanoma • hernia surgery • thyroid, parathyroid and adrenal surgery • trauma and surgical critical care services • advanced re-operative general surgery • multidisciplinary and surgical oncology

GENERAL SURGERY RELATED PROGRAMS

BreastCare Program

Patient Scheduling:
617-667-2900

Staffed by a team of specialists, the BreastCare Center offers a complete range of diagnostic and treatment services, including mammograms. The program provides comprehensive evaluation and treatment for breast disorders such as lumps, nipple discharge, abnormal mammograms and breast pain; genetic risk assessment; and breast cancer care. Breast cancer services include evaluations and second opinions in our multidisciplinary breast cancer program, surgery and breast reconstruction, radiology, medical oncology, radiation oncology, counseling and support groups.

Center for Inflammatory Bowel Disease

617-667-2135

See program description under the Medicine Tab.

Gastrointestinal and Hepatobiliary Oncology Program

Patient Scheduling:
617-667-1941

See program description under the Medicine Tab.
Liver Center

**Physician Referral:**
Liver Research Center 617-632-1118

**Patient Scheduling:**
- General Liver Disease 617-632-1070
- Transplantation 617-632-9700

The Liver Center at Beth Israel Deaconess Medical Center has brought together an exceptional team of providers from multiple disciplines to provide personalized care and the most advanced treatment options to patients with all types of liver conditions and diseases. Specialists in the fields of gastroenterology, infectious disease, interventional radiology, hepatology, oncology, pathology, radiology, surgery and transplantation are all active and important members of this cohesive team. The Liver Center’s physicians and staff also are recognized nationally as the leaders in cutting-edge, liver-related basic and clinical research. The center’s unified philosophy facilitates the provision of a full spectrum of care for both patients with common liver conditions and those who have complex medical or surgical needs. • The Liver Transplant Program offers a team of nationally recognized surgeons who are experts in adult living donor transplants, split- and reduced-size liver transplant, and organ donor transplant. This state-of-the-art program provides a complete spectrum of care including transplant evaluation, social services, pre-surgical care, surgery, postoperative care, and follow-up care after hospital discharge. • The Liver Tumor Clinic combines the knowledge and experience of professionals in the fields of hepatology, medicine, radiology, oncology and surgery to treat primary and metastatic tumors. Treatment options include surgical removal, chemotherapy, cryosurgery, chemoembolization and the use of microwaves, radiofrequency waves or laser energy to destroy tumors. Beth Israel Deaconess Medical Center is a leading provider of hepatocellular cancer care in New England. • The Viral Hepatitis Program offers the most advanced clinical therapies to patients with hepatitis B and C, including trials of new, long-acting interferons given in combination with other anti-viral treatments including novel proteases and polymerases. The program specializes in treating patients who are co-infected with HIV and hepatitis C, and in using new therapies to prevent progression of liver disease. Beth Israel Deaconess Medical Center has also established a dedicated liver inpatient unit, where an integrated team of physicians and nurses care for patients with liver failure who are recovering from complex liver surgery and those who have undergone transplantation surgery. The liver inpatient unit is technically and professionally state-of-the-art.

**BREAST SURGERY**

BreastCare Center Patient Scheduling: 617-667-2900 Staffed by a team of specialists, the BreastCare Center offers a complete range of diagnostic and treatment services including mammograms. The center provides: comprehensive evaluation and treatment for: breast disorders such as lumps, nipple discharge, abnormal mammograms and breast pain; genetic risk assessment; and breast cancer care. Breast cancer services include evaluations and second opinions in our Multidisciplinary Breast Cancer Clinic, surgery and breast reconstruction, radiology, medical oncology, radiation oncology, counseling and support groups.

---

**CENTRAL LINE SERVICE**

Nurse Coordinator 617-754-3263 The Line Service is made up of a team of surgeons who provide venous access for patients who require chemotherapy, nutritional support or antimicrobial therapy. The service evaluates and coordinates central venous access including internal jugular and subclavian lines, Hickmans and portacaths.

---

**ENDOCRINE SURGERY**

Beth Israel Deaconess Medical Center provides a broad range of endocrine surgery including thyroidectomy, parathyroidectomy and laparoscopic adrenalectomy.

---

**MINIMALLY INVASIVE SURGERY**

Patient Scheduling: 617-667-5100 The Center for Minimally Invasive Surgery at Beth Israel Deaconess Medical Center brings the newest advanced laparoscopic techniques to Boston. The center offers surgeons and physicians innovative clinical expertise and training in New England’s most comprehensive educational and research facility for advanced laparoscopic surgery. It extends minimally invasive techniques perfected at the medical center for cardiac, bariatric and endovascular procedures to specialties such as gynecology, urology, orthopaedics and gastroenterology.
PANCREATIC AND BILIARY SURGERY

The Pancreatic and Biliary Surgery Program at Beth Israel Deaconess Medical Center continues to grow dramatically. Annually, more than 160 major pancreatic operations are performed, placing BIDMC among the highest volume pancreatic surgery centers in America. Today, BIDMC is regarded as a regional and national leader in surgical quality and management of advanced pancreatic disease. We care for the full spectrum of pancreatic and biliary disease including malignant, premalignant and benign conditions. These include pancreatic cancer, ampullary and biliary tumors, cystic disease of the pancreas, and acute and chronic pancreatitis. Pancreatic operations performed include pancreaticoduodenectomy (Whipple’s resection), distal pancreatectomy, parenchymal preserving pancreatic resections, and minimally invasive pancreatic surgery for diagnostic and therapeutic purposes. Common biliary procedures include laparoscopic and open cholecystectomy, biliary bypass, other complex techniques for biliary stone problems, and bile duct injury repair. As a component of the Pancreas Center at BIDMC, our patient care is full integrated with other disciplines including interventional endoscopy, radiation and medical oncology, interventional and diagnostic radiology, and medical pancreatology. Up to a quarter of our patients are over the age of 75, and we have developed streamlined approaches to their care in conjunction with skilled gerontologists. We also feature counseling, screening and treatment for patients at high-risk for developing pancreatic cancer (those with family history or known cancer syndromes).

SURGICAL CRITICAL CARE

Surgical intensive care provides a comprehensive tertiary level of ICU management. This service, which integrates surgery and anesthesia critical care, provides state-of-the-art care for patients with postoperative cardiac and respiratory collapse, and coordinates multilevel care for patients with trauma and multiorgan failure. The ICU service also provides consultation through telemedicine to networked ICUs.

SURGICAL ONCOLOGY

Center offers the full spectrum of diagnostic, treatment and follow-up care for patients with both benign and malignant tumors. Surgical oncologists possess additional specialty training in cancer surgery and offer the most specialized, expert surgical care. Surgical oncologists work closely with a multidisciplinary team of physicians and other healthcare professionals including medical and radiation oncologists, radiologists, pathologists and nurses to develop an individualized treatment plan for each patient. Weekly multidisciplinary conferences are specifically devoted to each of the following malignancies: melanomas and other skin cancers; sarcomas; breast cancers; and gastrointestinal cancers. As a member organization of Dana Farber/Harvard Cancer Center, Beth Israel Deaconess Medical Center provides patients with the opportunity to enroll in innovative treatment protocols and clinical trials. The medical center’s cancer program is the only program in Massachusetts to receive the Outstanding Achievement Award from the Commission on Cancer, a consortium of professional organizations that seeks to reduce the morbidity and mortality of cancer through education, and monitor the quality of care that is delivered.

WEIGHT LOSS SURGERY

Patient Scheduling: 617-667-2845 Beth Israel Deaconess Medical Center’s Bariatric Surgery Program is one of the largest and most comprehensive obesity surgery programs in Massachusetts, performing more than 200 gastric bypass procedures annually. The program’s multidisciplinary team includes dedicated surgeons and nurses, along with experts in the nutritional, psychological and medical aspects of obesity treatment. Its multidisciplinary approach results in well-screened and informed patients who participate in a safe and effective surgical and post-surgical therapy for severe obesity. In addition to significant weight loss, bariatric surgery helps restore healthy organ function and may resolve other obesity-related medical problems. The main goal is to achieve enhanced quality of life for each patient through safe surgical therapy.
The Spine Center provides comprehensive, integrated, patient-centered care for all acute and chronic spine conditions. The center brings together specialists in neurosurgery, orthopaedic surgery, physiatry, pain management, neurology, physical therapy and radiology. Team members collaborate within a model of care that involves the appropriate specialty at the appropriate time to yield the fewest interventional approaches and optimal recovery. Patients benefit from convenient locations and same-day coordination of multiple provider visits, leading to timely development and initiation of treatment plans. Evaluation encompasses: complete musculoskeletal evaluation; comprehensive radiology imaging; EMG/nerve conduction studies; neurology evaluation; and cooperation among the emergency and neurosurgery departments, the neurosurgical intensive care unit (NSICU), the endovascular suite and the operating rooms allow for seamless integration of cutting-edge medical technology in the treatment of neurosurgical diseases and emergencies. The division provides consultation for and treatment of all intracranial, spinal and peripheral nerve problems. Performing more than 1,000 procedures annually, the neurosurgery staff members possess a full range of special expertise.

### Brain Tumor Center

**Patient Scheduling:**
617-667-1665

The Brain Tumor Center at Beth Israel Deaconess Medical Center offers a multidisciplinary approach to the evaluation, treatment and research of primary or metastatic brain tumors. Staff with expertise in neurosurgery, neurology, medical oncology, radiation oncology and neuropathology collaborate to provide coordinated multidisciplinary treatment. The staff are also members of the Dana-Farber Cancer Institute. The Brain Tumor Center offers the most recently developed drugs for treatment of brain tumors as well. State-of-the-art surgical treatment modalities and diagnostic facilities are available including: • stereotactic surgical technology for biopsy, excision of deep-seated tumors and implantation of radioactive seeds • 3-D computer-assisted surgical navigation to precisely locate brain tumors lasers • ultrasonic aspirators and an EMF vaporizer for precise removal of tumors from critical structures • skull base surgical approaches for the removal of tumors in the base of the skull such as meningiomas, vestibular (acoustic) schwannomas, sarcomas, dermoids and chordomas with minimum brain retraction and injury • MRS (magnetic resonance spectroscopy), functional MRI and MR angiography for the diagnosis and precise localization of brain tumors • stereotactic radiosurgery and radiation therapy for precise delivery of radiation to tumors including high-grade gliomas, meningiomas, vestibular schwannomas, metastatic and pituitary tumors, and vascular malformations • endoscopic approaches for the treatment of pituitary and intraventricular tumors. Active research projects within the Brain Tumor Center include: • clinical protocols for treatment of gliomas, meningiomas, ependymomas, lymphomas and metastases • identification of genetic abnormalities in brain tumors to aid in developing new treatments to correct or inhibit these abnormalities • research on mechanisms of metastatic tumor invasion of the brain and blood barrier The neuro-oncology unit within the Brain Tumor Center works to diagnose and manage neurological disorders related to cancers including complications with chemotherapy and radiation therapy.

**Patients Appropriate for Referral:**
- Patients who have been diagnosed with a brain tumor

### Spine Center

**Patient Scheduling:**
617-667-8900

The Spine Center provides comprehensive, integrated, patient-centered care for all acute and chronic spine conditions. The center brings together specialists in neurosurgery, orthopaedic surgery, physiatry, pain management, neurology, physical therapy and radiology. Team members collaborate within a model of care that involves the appropriate specialty at the appropriate time to yield the fewest interventional approaches and optimal recovery. Patients benefit from convenient locations and same-day coordination of multiple provider visits, leading to timely development and initiation of treatment plans. Evaluation encompasses: complete musculoskeletal evaluation; comprehensive radiology imaging; EMG/nerve conduction studies; neurology evaluation; evaluation for inflammatory arthritis and discography. Leading-edge approaches to pain management include injections, pain medication consultation, spinal cord stimulators and radiofrequency ablation. Physical therapy approaches include manual therapy, strengthening, range-of-motion and core exercises, and aqua therapy. Spine Center surgeons have expertise in the most advanced surgical techniques including minimally invasive approaches and new technologies to treat conditions from the cervical to the lumbar spine.

**Patients Appropriate for Referral:**
- degenerative disease (lumbar and spinal stenosis, degenerative disc disease, herniated disc, osteoporosis and fragility/compression fractures of the spine, spondylolisthesis
- myelopathy of the cervical and thoracic spine
- radiculopathy of the cervical, thoracic or lumbar spine
- arthropathies of the spine
- tumors of the spine and spinal cord
- spinal deformities such as scoliosis and kyphosis
- spine trauma and spinal cord injuries
- acute or chronic back and neck pain

### Trigeminal Neuralgia

**Patient Scheduling:**
617-632-7246

A team of pain specialists and neurosurgeons treats trigeminal neuralgia, glossopharyngeal neuralgia and hemifacial spasm with medical mangement, microvascular decompression or radiofrequency lesioning. Non surgical options such as CyberKnife® Image Guided Therapy are also utilized if necessary.
NEUROSURGERY RELATED PROGRAMS

Cerebrovascular/Stroke

**Patient Scheduling:**
617-667-3090

Beth Israel Deaconess Medical Center’s cerebrovascular/stroke service offers: outpatient evaluations; emergency consultations and inpatient consultations for patients with stroke due to occlusion of cerebral blood vessels or to intracranial hemorrhage; new experimental therapies for stroke prevention; and treatment and new diagnostic and functional neuroimagery procedures. Staff members also provide second opinions concerning surgery for carotid or intracranial vascular disorders.

CyberKnife Image Guided Therapy

**Patient Scheduling:**
617-667-4677

See program description under the Radiation Oncology Tab.

Epilepsy

The Comprehensive Epilepsy Center at Beth Israel Deaconess Medical Center offers diagnostic evaluations, medical management and medication trials for patients with epilepsy, particularly intractable epilepsy. The first program of its kind in Massachusetts, its staff includes neurologists, neurology fellows, neurosurgeons, neurophysiologists, neuropsychologists, psychiatrists, engineers, epilepsy nurse specialists, EEG nurse specialists and social workers. The center is affiliated with other Beth Israel Deaconess neurology specialties, including behavioral neurology, neuroendocrinology and neuroradiology.

Movement Disorders

**Patient Scheduling:**
617-667-0519

An outpatient service devoted to the diagnosis and treatment of patients with movement disorders, the movement disorders service provides comprehensive care ranging from neurological evaluation to trials of new medications, injections of botulinum toxin, and innovative surgical procedures—including pallidotomy guided by microelectrode recording. Staff include neurologists, neurosurgeons and a research nurse with expertise in movement disorders. These individuals work together with a multidisciplinary team of physicians and allied health professionals to provide specialized care to patients with these conditions. Patients appropriate for referral include those with movement disorders such as Parkinson’s disease, parkinsonian syndromes, tremors, gait disorders, chorea and drug-induced movement disorders.

Neuro-oncology

**Patient Scheduling:**
617-667-1665

Neuro-oncology offers multidisciplinary evaluation and comprehensive treatment of cancer patients. Staffed by neuro-oncologists, neurosurgeons, oncologists and radiation oncologists, the service provides state-of-the-art surgical treatment modalities and diagnostic facilities. In addition, the neuro-oncology section provides consultation for the diagnosis and management of neurological disorders related to cancer including complications related to chemotherapy and radiation therapy. Referred patients are assessed initially by a neuro-oncologist. When necessary, additional diagnostic studies or consultations with subspecialists, such as neurosurgeons or radiation oncologists, can be performed at the medical center after discussion with the referring physician, or can be arranged directly by the referring physician. For patients unable to travel to Boston, a second option can be provided.

**Patients Appropriate for Referral:**
- Patients with neurological disorders, neurological complications, and brain or spinal cord tumors—including primary gliomas and metastases to the nervous system.

Stereotactic Radiosurgery/Therapy

**Patient Scheduling:**
617-667-2345

See program description under the Radiation Oncology Tab.

OPHTHALMOLOGY

617-667-3391
Division Chief: Dr. Frank Berson

The division of ophthalmology/Longwood Medical Eye Center provides comprehensive medical and surgical treatment of eye diseases including subspecialty services in glaucoma, cataract, retina, and neuro-ophthalmology. Optometry services are also provided. A variety of ancillary testing is available including fluorescein angiography, fundus photography, ophthalmic ultrasound and visual fields. Ophthalmic laser treatments can be performed on-site.
OPHTHALMOLOGY PROGRAMS

Neuro-ophthalmology Clinic

Patient Scheduling:
617-667-3391

The Neuro-ophthalmology Clinic provides diagnostic and treatment services for patients with neurosurgical disorders affecting the visual, eye movement and vestibule system. Clinical staff works closely with the multiple sclerosis and general ophthalmology clinics.

Patients Appropriate for Referral:
- Patients with decreased vision due to diseases of the optic nerve or brain
- Patients with eye movement problems causing double vision, drooping eyelids or abnormal pupils
- Patients with dizziness due to brain or inner ear problems

OTOLARYNGOLOGY

Division Chief: Dr. Robert Frankenthaler

The division of otolaryngology (head and neck surgery) provides general and multidisciplinary services for the ears, nose, and throat as well as management of advanced head and neck cancers, voice and swallowing disorders, hearing loss, balance disorders and facial plastic surgery. Each multispecialty service includes physicians from complementary specialties from the areas of voice, speech and hearing. Audiology services are also available as both a diagnostic and a rehabilitation-based service devoted to pathologies of the auditory and the vestibular systems.

OTOLARYNGOLOGY PROGRAMS

Balance Center

Patient Scheduling:
617-632-7300

The Balance Center focuses on comprehensive diagnoses and treatment of the dizzy patient. The center’s staff works closely with rehabilitation services specialists through the Vestibular Rehabilitation Program to provide appropriate treatments. Patients’ comprehensive evaluations include ENG tests of sensory organization performance and screening of ocular motor, vertebral artery, cervicospinal and proprioceptive input to the vestibular system. Evaluation of migraine-related dizziness and the need for fall prevention rehabilitation are part of the protocol.

Hearing Aid Dispensing Center

Patient Scheduling:
617-632-7300

The otolaryngology division has developed a comprehensive program to properly evaluate hearing loss to allow patients to be fit with the most current amplification technology available. Today’s digital circuits are complex and are constantly being upgraded. Therefore, staff at the Hearing Aid Dispensing Center are committed to ongoing training to stay abreast of new technological advancements. The program’s focus is on patient service and quality assurance and its comprehensive dispensing protocol encourages use of its easy access, “open door” policy for hearing aid wearers. Patient satisfaction and optimal use of amplification are the primary goals of the center’s staff.

Hearing Center

Patient Scheduling:
617-632-7300

The Hearing Center offers comprehensive evaluation and testing for disorders related to the hearing mechanism. Using leading edge technology and instrumentation, we are capable of performing audiologic assessments, impedance testing for assessment of the middle ear, otoacoustic emissions testing for the assessment of the cochlear and the auditory evoked potentials for the assessment of retrocochlear pathologies. We are also equipped to examine the nature and the extent of hearing loss, assess and differentiate pathologies of the middle ear, respond to sudden sensorineural loss, and evaluate tinnitus.

Voice, Speech and Swallowing Center

Patient Scheduling:
617-632-7400

Speech-language pathologists in the Voice, Speech and Swallowing Center specialize in swallowing disorders in the adult population and voice rehabilitation for those with Parkinson’s disease using the Lee Silverman Voice Training® program. The division also offers professional voice training.

Patients Appropriate for Referral:
- People who have oropharyngeal swallowing dysfunction of any origin
SURGERY

OTOLARYNGOLOGY RELATED PROGRAMS

CyberKnife Image Guided Therapy

Patient Scheduling:
617-667-4677

See program description under the Radiation Oncology Tab.

PLASTIC AND RECONSTRUCTIVE SURGERY

617-632-7838
Acting Division Chief: Robert Frankenthaler, MD The division of plastic surgery offers a full spectrum of services including: face lifts; eyelid plastic surgery; breast enlargement, reduction and lifting; body contouring, including liposuction, abdominoplasty, and plastic surgery for massive weight loss (bariatric surgery); and breast reconstruction after breast cancer treatment, including DIEP flaps.

AESTHETIC AND RECONSTRUCTIVE BREAST SURGERY

The recently established Peter Jay Sharp Program in Aesthetic and Reconstructive Breast Surgery offers the newest techniques in autologous breast reconstruction, and Beth Israel Deaconess Medical Center is one of only a few medical centers the country offering complex perforator flaps. These state-of-the-art microsurgical procedures, including deep inferior epigastric artery (DIEP), superior gluteal artery (SGAP), and superficial inferior epigastric artery (SIEA), are now performed on a regular basis at the medical center. These advances in breast reconstruction surgery have opened the opportunity of reconstruction to women who previously were not suitable candidates. The procedures also shorten recovery times. Because underlying muscles are not sacrificed, nearly all patients are able to return to vigorous activity including swimming, biking, running, or playing tennis.

HAND SURGERY

The hand surgery service offers comprehensive care for elbow, hand, wrist, and finger injuries and diseases including fractures, tumors, trigger fingers, ligament disruptions, arthritis, carpal/cubital tunnel syndrome, sports-related injuries and tendinitis. Innovative treatments include total wrist arthroplasty and minimally invasive endoscopic carpal tunnel release. Other novel techniques for restoring and maximizing mobility of the wrist and hand include treatment for fractures without the use of external fixators. The orthopaedic hand service works closely with the plastic surgery hand service to provide the full gamut of care of patients with upper extremity problems.

LYMPHEDEMA

617-632-7827 The Program for the Treatment and Study of Lymphedema offers people with lymphedema a high level of medical care, as well as education and support for patients and their families. It provides advanced methods of diagnosis and treatment including surgical alternatives for patients with lymphedema.

PODIATRY

617-632-8428
Division Chief: Dr. John Giurini

The podiatry division provides medical and surgical management of acute and chronic foot problems for adolescents, adults and geriatric patients. In addition to primary care podiatric medicine, sports medicine and surgery, particular expertise is offered in the management of the diabetic, arthritic and dysvascular foot. A conservative approach to primary foot care is emphasized, with foot rehabilitation as the preferred therapeutic goal.

PODIATRY PROGRAMS

Center for Reconstructive Foot Surgery

Patient Scheduling:
617-632-8428
888-SAV-FEET
(728-3338)

The Center for Reconstructive Foot Surgery offers patients an experienced and caring approach to the most complicated foot deformities. As nationally known experts in podiatric surgery and research, faculty members perform procedures to correct deformities related to flat feet, rheumatoid and degenerative arthritis, sports-related injuries and trauma. In addition, the center routinely treats bunions, hammertoes, neuromas and heel spurs.

Patients Appropriate for Referral:
- Patients with bunions, hammertoes, neuromas, heel spurs, flat feet or arthritis
Joslin-Beth Israel Deaconess Foot Center

**Patient Scheduling:**
617-632-8428  
888-SAV-FEET  
888-728-3338

The Joslin-Beth Israel Deaconess Foot Center provides comprehensive services for the prevention and treatment of lower-extremity problems. While the center offers a full range of services for treating lower-extremity complications, its physicians have special expertise in the treatment of the diabetic foot. The Foot Center is staffed by a multidisciplinary team of physicians specializing in podiatry, vascular surgery, infectious disease, orthopaedics, plastic/reconstructive surgery and diabetology, along with support staff who are nurses and orthotic technicians. Many new treatments including vascular surgery bypass techniques and reconstructive foot surgery procedures are performed. The Foot Center is also actively involved in cutting-edge research studies to explore new and pioneering techniques for the treatment of lower-extremity complications. Services include: • comprehensive foot care and treatment for people with diabetes • treatment for ulcers • treatment for peripheral vascular disease • revascularization procedures for diabetic lower extremities to provide for healing of ulcers • plastic and reconstructive lower-extremity surgery • prevention of complications of diabetes through periodic maintenance and care of corns, calluses, and nails • follow-up care for ulcers • trauma care (fractures, dislocations, contusions, burns, deep lacerations, ruptured or torn ligaments) • surgical treatment for structural deformities • prevention of lower-extremity amputations • treatment of severe acute and chronic infections of the foot • orthotic devices • diabetes education

**Patients Appropriate for Referral:**
- Patients with foot ulcers, foot deformities, foot infections or peripheral vascular disease

Podiatric Sports Medicine Center

**Patient Scheduling:**
617-632-8428  
888-SAV-FEET  
(728-3338)

The Podiatric Sports Medicine Center provides care for all types of sports-related conditions of the lower extremity. Utilizing the latest in diagnostic and therapeutic modalities, members of this multidisciplinary team provide the patient with a coordinated approach that allows the athlete a quicker return to full activity. Podiatrists, orthopaedic and plastic/reconstructive surgeons, physical therapists, orthotic technicians and nurses employ both conservative and surgical techniques that utilize the strengths of each specialty while focusing on the patient. The program also provides custom-made orthoses and bracing, advanced surgical techniques, and an individualized approach to physical therapy and rehabilitation.

**Patients Appropriate for Referral:**
- Patients with plantar fasciitis, heel pain, tendinitis, fractures/dislocations or knee pain, as well as those who have suffered a running injury or those who require orthotic devices

TRANSPLANTATION

617-632-9700

The division of transplantation is dedicated to the evaluation and management of patients with diseases of the kidney, liver and pancreas that lead to organ failure. The division's state-of-the-art, multidisciplinary approach involves medical and surgical specialists. The division is a fully certified member of the United Network for Organ Sharing (UNOS) and an approved fellowship training facility for the American Society for Transplant Surgery (ASTS).

TRANSPLANTATION PROGRAMS

Dialysis Access Center

**Patient Scheduling:**
Monday-Friday 8 am-5 pm 617-632-9817  
Weekends and after hours 617-632-9700

Through the Dialysis Access Service, board-certified surgeons provide prompt, state-of-the-art care to patients who need to have a vascular access created or repaired before undergoing or continuing hemodialysis and those who require placement of a peritoneal dialysis catheter. A dialysis access nurse facilitates patient referrals, same-day or next-day service for access-related complications, and a two-week or sooner timeframe to establish permanent vascular access.

**Patients Appropriate for Referral:**
- Patients who need dialysis access created or repaired

Hepatobiliary Surgery

**Patient Scheduling:**
617-632-9700

Board-certified surgeons in the hepatobiliary section provide care for patients with non-transplant hepatobiliary diseases requiring surgical or radiological intervention including: • hepatic resection for malignant or benign diseases of the liver • surgery of gallbladder and bile duct for benign and malignant diseases, including laparoscopic bile duct injuries • portal decompressive procedures for portal hypertension or bleeding varices Strong collaboration exists with radiology, gastroenterology, oncology and hepatobiliary care of patients with hepatobiliary disease.

**Patients Appropriate for Referral:**
- Patients who need non-transplant hepatobiliary surgery for benign and malignant diseases
### Kidney Transplantation

**Patient Scheduling:**

617-632-9700

The multidisciplinary kidney transplant team is dedicated to providing care to patients with end-stage renal disease who are candidates for kidney transplantation. In addition to performing deceased-donor and living-donor transplants, the board-certified transplant surgeons perform general surgery for dialysis and transplant patients. Transplant nephrologists work closely with transplant surgeons throughout the evaluation, pre-operative and post-operative phases of transplantation.

**Patients Appropriate for Referral:**

- Patients with diseases of the kidney that lead to organ failure or the need for transplant
- Dialysis and transplant patients needing general surgery

### Liver Transplantation

**Patient Scheduling:**

617-632-9700

The multidisciplinary liver transplant team is dedicated to the management of patients with a variety of acute and chronic liver conditions who are candidates for liver transplantation. Board-certified transplant surgeons perform whole, split and reduced-size deceased donor transplants and adult living-donor transplants as well as general surgery for transplant patients. Transplant hepatologists work closely with transplant surgeons throughout the evaluation, pre-operative and post-operative phases of transplantation.

**Patients Appropriate for Referral:**

- Patients with diseases of the liver that lead to organ failure or the need for transplant
- Transplant patients needing general surgery

### Pancreas Transplantation

**Patient Scheduling:**

617-632-9700

Board-certified transplant surgeons offer specialized expertise in:

- pancreas and kidney transplants at the same time
- pancreas transplantation for certain patients with diabetes who have had a kidney transplant
- pancreas transplantation alone
- general surgery for transplant patients

Transplant nephrologists work closely with the transplant surgeons throughout the evaluation, pre-operative and post-operative phases of transplantation.

**Patients Appropriate for Referral:**

- Patients with diabetes mellitus or other diseases of the pancreas that lead to organ failure or the need for transplant
- Transplant patients needing general surgery

### Transplant Behavioral Health

**Patient Scheduling:**

617-632-9700

Behavioral health services available for transplant patients include: comprehensive psychosocial and psychological evaluation; individual counseling or psychotherapy; couples therapy; and family therapy. Behavioral health providers collaborate with neuropsychologists, psychiatrists and psychopharmacologists who have considerable experience with transplant patients. In addition, they work closely with medical and mental health providers from surrounding communities to ensure seamless medical, psychological and psychiatric treatment.
## TRANSMPLANTATION RELATED PROGRAMS

### Advanced Vascular (AV) Care Center
**Patient Scheduling:** 617-783-5200

No Primary Description Found...

### Liver Center
**Physician Referral:**
Liver Research Center 617-632-1118

**Patient Scheduling:**
- General Liver Disease 617-632-1070
- Transplantation 617-632-9700

See program description under the Surgery Tab.

### Pancreas Center
**Patient Scheduling:** 617-667-5576

The director of the Pancreatic Disease Center has pioneered new diagnostic methods and innovative therapies for chronic pancreatitis. The center provides state-of-the-art diagnosis and treatment for patients with diseases of the pancreas. During the initial visit, patients referred for consultation may see a gastroenterologist, oncologist, and surgeon. This multidisciplinary team works with patients to develop and implement appropriate treatment plans. Diagnostic and treatment options include ERCP, pancreatic secretion test, ultrasound, CT scan, MRI, surgical interventions, and nutrition and pain management consultations.

**Patients Appropriate for Referral:**
- Patients with chronic or acute pancreatitis, hereditary pancreatitis, pancreatic insufficiency, pancreas cysts, cystic fibrosis (CF) and pancreatic cancer

### UROLOGIC SURGERY

**Division Chief:** William C. DeWolf, MD

The division of urologic surgery at Beth Israel Deaconess Medical Center represents many subspecialties of urologic surgery and provides comprehensive services for all aspects of urologic disease. The basis for this expertise lies in a significant commitment to research and development of new surgical techniques. Over the years, the division has been awarded National Institutes of Health grants to study cancer and aspects of infertility. Several staff members also sit on national and international committees of urologic healthcare professionals. The division offers a complete range of services involving all aspects of urologic disease using the latest technology and expertise. These include medical and surgical management of urologic cancer, prostate disease, incontinence, comprehensive kidney stone management, minimally invasive surgery, female urology, infertility, impotence and consultative urologic nursing and administration. Patients appropriate for referral include those with urologic conditions such as cancer, prostate disease, incontinence, kidney stones, infertility and impotence.

### Center for Neuro-urology and Continence
**Patient Scheduling:** 617-667-5619

The Center for Neuro-urology and Continence provides state-of-the-art care for patients with urological problems related to neurologic disease such as multiple sclerosis, stroke, spina bifida and spinal cord injury. The center also provides the most advanced diagnostic and treatment modalities including videourodynamic and electrodiagnostic studies for the diagnosis and treatment of urinary incontinence in both men and women, along with complete treatment of pelvic prolapse in women and urethral reconstruction in men. The center combines the expertise of specially trained urologists, gynecologists, colon and rectal surgeons, and trained nurses to provide the best available multidisciplinary care. All the physicians who work at the center hold academic appointments at Harvard Medical School.

**Patients Appropriate for Referral:**
- Patients with urological problems related to neurologic disease
## Prostate Care Center

### Patient Scheduling:

617-667-7777

The Prostate Cancer Care Center is unique in its focus on a multidisciplinary continuum of prostate cancer care ranging from evaluating elevated PSA and performing prostate biopsies, to providing surgical, radiation, systemic or expectant (watchful waiting) treatment, as deemed appropriate based on individual patients’ prostate cancer severity and their personal lifestyle priorities. For patients with newly diagnosed prostate cancer, the Beth Israel Deaconess Medical Center Prostate Cancer Care Center offers multidisciplinary care in which a team of prostate cancer specialists from urology, radiation oncology and medical oncology evaluate and counsel prostate cancer patients and their spouses/partners regarding treatment options and expected outcomes. By providing treatment recommendations and explanations from multiple disciplines in a single setting, the Prostate Cancer Care Center approach eliminates the inconvenience of multiple visits to separate specialists with sometimes mutually contradictory recommendations. The center’s specialists provide patients with practitioner-specific, published data regarding their patients’ outcomes. These quality of life and cancer control outcome data are the basis for regional and national benchmarks of quality prostate cancer care. For patients with elevated PSA or abnormal digital rectal exam of the prostate, the Prostate Cancer Care Center provides trans-rectal ultrasound and prostate biopsy services.

### Patients Appropriate for Referral:

- Patients newly diagnosed with prostate cancer
- Patients with elevated PSA or abnormal digital rectal exam of the prostate

## Robotic Radical Prostatectomy Program

### Patient Scheduling:

617-667-2898

The Robotic Radical Prostatectomy Program at Beth Israel Deaconess Medical Center is led by fellowship-trained experts in prostate cancer care. The da Vinci® Robotic Surgical System provides patients with an alternative to traditional open surgery. This allows appropriately trained surgeons to perform even the most complex and delicate procedures, like nerve-sparing radical prostatectomy, through several tiny incisions with unmatched 3-D visualization and precision. Our data has shown that patients receive equivalent outcomes to open surgery but with much less blood loss, less postoperative pain, and a quicker recovery than traditional surgery.

### Patients Appropriate for Referral:

- Patients who require prostate surgery

In addition to offering patient services at the main campus in the Longwood Medical Area, as well as at a number of off-site physicians’ offices, Beth Israel Deaconess Medical Center owns and operates a 41-bed capacity acute care hospital, two medical care centers, a community health center and a cancer care center. The medical center is also affiliated with several other community health centers. Patients and providers may call any center directly for more information or directions.

### BETH ISRAEL DEACONESS HEALTHCARE - CHELSEA

1000 Broadway, MA 02150 617-660-6000

Beth Israel Deaconess HealthCare-Chelsea, located on the Chelsea/Revere border, offers primary and specialty healthcare services for the entire family in a state-of-the-art facility that provides the comfort of a private office setting. Services include primary care; obstetrics and gynecology; specialty services including allergy and immunology, cardiology, gastroenterology, liver, orthopaedics, podiatry, urology and vascular surgery; on-site radiology including diagnostic X-rays, mammography, bone densitometry, ultrasound and echocardiography; pulmonary function testing; physical therapy; and laboratory services. ### COMMUNITY HEALTH CENTERS

**JOSEPH M. SMITH COMMUNITY HEALTH CENTER**

287 Western Avenue, Allston, MA 02134 617-783-0500

564 Main Street Waltham, MA 02451 781-693-3800 at Gardner Pilot Academy 30 Athol Street Allston, MA 02134 617-783-0500

Joséph M. Smith Community Health Center provides comprehensive healthcare services in Allston/Brighton and Waltham, as well as their surrounding areas. The health center’s goal is to improve the overall health of area residents through the provision of high-quality care, regardless of a person’s financial situation. With a special focus on prevention and wellness, the health center provides coordinated care to connect patients to primary and preventive services. Available services include: pediatrics; adolescent health; adult medicine; podiatry; prenatal care; family planning; nutrition counseling; dental services; counseling; family support; and health promotion. The health center provides these services in more than 20 languages to ensure culturally and linguistically appropriate care.

**COMMUNITY HEALTH CENTERS**

Strongly committed to providing care for the underserved, Beth Israel Deaconess Medical Center is affiliated with seven community health centers collectively known as the Community Care Alliance. These centers are a vital part of our diverse communities’ neighborhoods, and are uniquely positioned to provide accessible primary care, maternal and child healthcare, certain specialty services, health education and social services. Bowdoin Street Health Center is licensed and operated by Beth Israel Deaconess Medical Center.

**BOWDOIN STREET HEALTH CENTER**

230 Bowdoin Street, Dorchester, MA 02122 617-754-0100 bowdoinstreethealth.org

Licensed and operated by Beth Israel Deaconess Medical Center, Bowdoin Street Health Center has been an integral part of the Dorchester community since 1973. Services include: pediatric and adult preventive and primary care, family practice; psychiatry; management of chronic diseases such as diabetes and asthma; geriatrics; obstetrics and gynecology; physical therapy; optometry; mental health counseling; nutrition services; and community health programs. The health center has a long history of working in partnership with residents, businesses and organizations on identified issues of importance to the community.

**THE DIMOCK CENTER**

55 Dimock Street, Roxbury, MA 02119 617-442-8800 dimock.org

Affiliated with Beth Israel Deaconess Medical Center, The Dimock Center is located on a nine-acre historic campus in Roxbury. The center’s mission is to enhance the health, well-being and potential of the people it serves by providing high-quality, accessible health and human services through three service areas: Health and HIV Care; Behavioral Health; and Child and Family Development. This comprehensive model of care permits referrals across the system for clients with multiple needs. The affiliation with Beth Israel Deaconess provides additional medical services ranging from primary and specialty care for adults to obstetrics and gynecology services provided by a multi-ethnic, multilingual staff.

**FENWAY HEALTH**

Fenway Health 1340 Boylston Street, Boston, MA 02215 617-267-0900

South End Associates 142 Berkeley Street, Boston, MA 02116 617-247-7555 fenwayhealth.org

Since 1971, Fenway Health has pioneered efforts to provide comprehensive, high-quality healthcare that is sensitive to the needs of lesbian, gay, bisexual and transgender (LGBT) individuals. Affiliated with Beth Israel Deaconess Medical Center, Fenway Health provides primary care and is internationally known for its work on LGBT health and HIV prevention, treatment and research. Fenway Health is a leader in women’s health, particularly in understanding the unique needs of lesbians. The alternative insemination program and LGBT family and parenting services have helped empower the first generation of openly gay families. In addition, Fenway Health’s innovative acupuncture detoxification program has been widely studied and has served as a model for other organizations. Both health center sites, located in Boston’s Fenway area and in Boston’s South End, serve those who live and work in these diverse multicultural neighborhoods, from students to seniors. At Fenway Health, medical care, mental health services, complementary therapies, education and support are integrated so providers are better able to care for the whole person. Specialty care includes: infectious disease; gynecology; psychiatry; gerontology; nutrition; and podiatry.
The South Cove Community Health Center offers medical and behavioral health services and youth and family programs at four locations in the greater Boston area. The health center’s mission is to improve the health and well-being of Asian Americans in Massachusetts, with a special focus on the medically underserved, by providing high-quality, community-based health care and programs. The center offers comprehensive bilingual/bicultural primary care in: adult medicine; obstetrics and gynecology; dentistry; pediatrics; nutrition counseling; podiatry; community health; early intervention; mental health; family planning; optometry; social services; and health education.

The Sidney Borum Jr. Health Center provides high-quality comprehensive healthcare to Boston’s most at-risk adolescents and young adults, including: street-identified and homeless youth; inner-city gay, lesbian, bisexual, transgendered and questioning (GLBTQ) youth; and teens and young adults who are HIV positive. The Borum provides primary care including regular wellness visits, vaccinations, and management of chronic illnesses such as asthma. It also provides urgent and acute care daily, offering walk-in and same-day appointments. Free family planning and STD screening and treatment is also available for both males and females. In fact, The Borum is one of the first care providers in the region to offer free, rapid HIV screening tests. Other services include case management for patients with complicated psychosocial needs and focused case management for HIV+ patients. Supplemental services include shower and changing facilities for homeless youth. Staff members at The Borum understand the trauma that many patients have experienced and use a non-judgmental, harm reduction model that enables them to provide high-quality care supported by their commitment to respecting patients’ dignity and earning their trust. The Borum is staffed by physicians, nurse practitioners, a nutritionist and a child/adolescent psychologist. Referrals for specialty care are made to Beth Israel Deaconess Medical Center, with which the center is affiliated.

Brighton/Allston After School Enrichment Program (BASE) S Saint Luke’s Road Allston, MA 02134 617-745-0280 617-787-1087 South Street Center 145 South Street Boston, MA 02111 617-521-6730 North Quincy Center 435 Hancock Street Quincy, MA 02171 617-482-7555 southco.org Affiliated with Beth Israel Deaconess Medical Center, South Cove Community Health Center is New England’s premier primary and preventive health center for Asian Americans. Founded in 1972, South Cove provides medical and behavioral health services and youth and family programs at four locations in the greater Boston area. The health center’s mission is to improve the health and well-being of Asian Americans in Massachusetts, with a special focus on the medically underserved, by providing high-quality, community-based health care and programs. The center offers comprehensive bilingual/bicultural primary care in: adult medicine; obstetrics and gynecology; dentistry; pediatrics; nutrition counseling; podiatry; community health; early intervention; mental health; family planning; optometry; social services; and health education.

482 Bedford Street Lexington, MA 02420 781-672-2000 Beth Israel Deaconess HealthCare-Lexington—operated jointly by Beth Israel Deaconess Medical Center and Children’s Hospital Boston—provides a full range of outpatient services for adults and children. The center is easily accessible—only moments off Route 128—where free parking on the premises. Adult services include primary care; obstetrics and gynecology; an extensive variety of specialty and consultative services (see detailed list below); rehabilitation services; endoscopy; radiology (including general X-ray, mammography and ultrasound); phlebotomy services; and other diagnostic and support services. The center is staffed by full-time primary care physicians for adults, medical and surgical specialists, and obstetricians and gynecologists. Key Contact Numbers For services not listed, please call the main number at 781-672-2000. Internal Medicine - 781-672-2250 Obstetrics and Gynecology - 781-672-2150 Specialties: Allergy - 781-672-2350 Bone Density - 781-672-2201 Breast Surgery - 781-672-2250 Cardiology - 781-672-2350 EMG Lab - 781-672-2350 Otolaryngology - 781-672-2350 Gastroenterology - 781-672-2350 Neurology - 781-672-2350 Orthopedics - 781-672-2350 Podiatry - 781-672-2350 Pulmonary, Critical Care and Sleep Medicine - 781-672-2350 Radiology - 781-672-2350 Urology - 781-672-2350 Vascular Surgery - 781-672-2350

148 Chestnut Street Needham, MA 02492 Phone: 781-453-3000 Beth Israel Deaconess Hospital-Needham, an acute care hospital with a 41-bed capacity, has served the residents of Needham, Dedham, Westwood, Dover, Medfield and other communities for more than 90 years. In 2002, Beth Israel Deaconess Medical Center and Deaconess-Glover Hospital formalized their long-standing, collaborative relationship with a direct affiliation in order to enhance clinical programs and increase access to care. The two hospitals’ emergency departments were clinically integrated in 2008. The 2002 direct affiliation facilitated the integration of staff and resources in other clinical areas such as hospital medicine (hospitalists), cardiology, radiology, general surgery, oncology and pathology. Beth Israel Deaconess Hospital Needham provides inpatient care and outpatient services in the following areas: 24-hour emergency services; cardiology and cardiac testing; endocrinology including diabetes management in association with Joslin Clinic; gastroenterology; general surgery; orthopaedics; plastic, hand and reconstructive surgery; thoracic surgery; vascular surgery; urology; ophthalmology; gynecology; podiatry; dermatology; gerontology; hematology/oncology; rehabilitation medicine; physiatry; respiratory therapy; nutrition counseling; occupational health services; and primary care. Diagnostic facilities include a 24-hour histopathology laboratory and blood banking services. Diagnostic imaging services include: bone densitometry; CT scanning; fluoroscopy; nuclear medicine; digital mammography; plain film radiology; ultrasonic cardiology; and ultrasound. Beth Israel Deaconess Hospital-Needham also offers community service programs including preventive health screenings and educational lectures; CPR; Lifeline; and smoking cessation programs. Key Contact Numbers For services not listed, please call the main number at 781-453-3000. 9 Hope Avenue Waltham, MA 02453 Phone: 617-754-0515 Beth Israel Deaconess Cancer Care at Waltham is a fully licensed Beth Israel Deaconess Medical Center facility that offers a sophisticated level of radiation therapy services. Equipment includes a state-of-the-art Varian 21EX linear accelerator that facilitates the delivery of 3-D conformal radiation therapy and IMRT. Radiation therapy treatment planning is performed at BIDMC and then implemented at the Waltham facility, truly allowing university quality care in the community. Radiation oncologists are members of the department of radiation oncology at Beth Israel Deaconess Medical Center and full-time faculty members at Harvard Medical School. The center offers full access to clinical trials including ECOG, RTOG and DFCI/HCC protocols. The cancer care facility is also home to the Mary Eagan Garden, a healing garden that provides patients a serene, comfortable place to spend time alone or with family and friends. Patients and for treatment.
